

PPS-Exempt Cancer Hospital Quality Reporting (PCHQR) Program

Web-Based Application for Surgical Care Improvement Project (SCIP) Measures

Online Data Entry Tool Content for FY 2016 and Subsequent Years

Overview

This document provides instructions for using the CMS online web application for reporting the Population and Sampling data for the Surgical Care Improvement Project (SCIP) Measures.

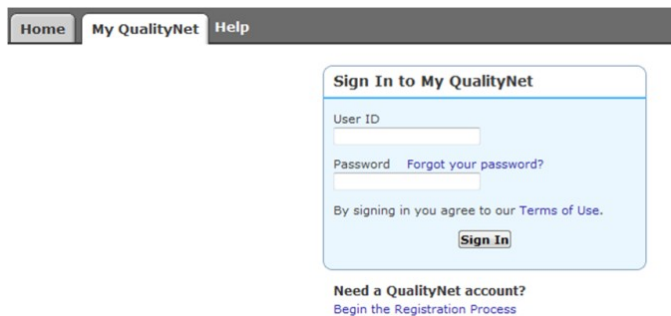

The Population and Sampling application enables a PPS-Exempt Cancer Hospital user or their contracted vendor to enter the population data of Medicare and non-Medicare patients that meet the inclusion criteria for the Surgical Care Improvement Project (SCIP) measure set. The user or their contracted vendor can also indicate if they are submitting all of the records that meet the inclusion criteria, or if sending a sample, they can identify the frequency of sampling and the number of records that will be included in the sample.

CMS uses both Medicare claims counts and hospital self-reported total population (Medicare and Non-Medicare combined) counts to assess hospital compliance with submitting patient-level data in accordance with the minimum sampling requirements. The larger of the two numbers for each measure set/SCIP strata will be used to determine compliance with sampling requirements.

Accessing the Web-Based Application

The user enters their assigned User ID and password to access the secure site and information for their individual hospital.

Figure 1 Sign In

The screenshot shows a web application interface for signing in. At the top, there is a navigation bar with three tabs: "Home", "My QualityNet", and "Help". The main content area is titled "Sign In to My QualityNet". It contains a form with two input fields: "User ID" and "Password". Below the "Password" field is a link that says "Forgot your password?". Below the form is a line of text: "By signing in you agree to our Terms of Use." followed by a "Sign In" button. At the bottom of the page, there is a link that says "Need a QualityNet account? Begin the Registration Process".

Manage Measures

After selecting the “View / Edit Population and Sampling” link under Manage Measures, the user selects the Reporting Period and selects the **[Continue]** button:

Figure 2 View/Edit Population & Sampling Selections

Sampling Frequency Selection

The user will insert their sampling frequency of Quarterly or Not Sampled.

The Surgical Care Improvement Project (SCIP) measure set is divided into 8 strata. Based on the selection above, the user will enter the population and sample size for each of the 8 stratum.

Reporting – Initial Inpatient Population and Sample Size

The reporting is identified as Medicare and Non-Medicare. The examples below are for a hospital performing quarterly sampling (Strata 1 through 5) and Not Sampling (Strata 6):

Figure 1 SCIP - Strata 1 (Coronary Artery Bypass Graft)

Sample Frequency: Quarterly

Initial Inpatient Population

Initial Inpatient Population	Quarter 1	Quarter 2	Quarter 3	Quarter 4	Total
Medicare	29	22	16	10	77
Non-Medicare	14	11	14	39	78
Total	43	33	30	49	155

PRA Disclosure Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1175. The time required to complete this information collection is estimated to average 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26
