In Cooperation with the Iowa Department of Agriculture and Land Stewardship

February 19, 2015

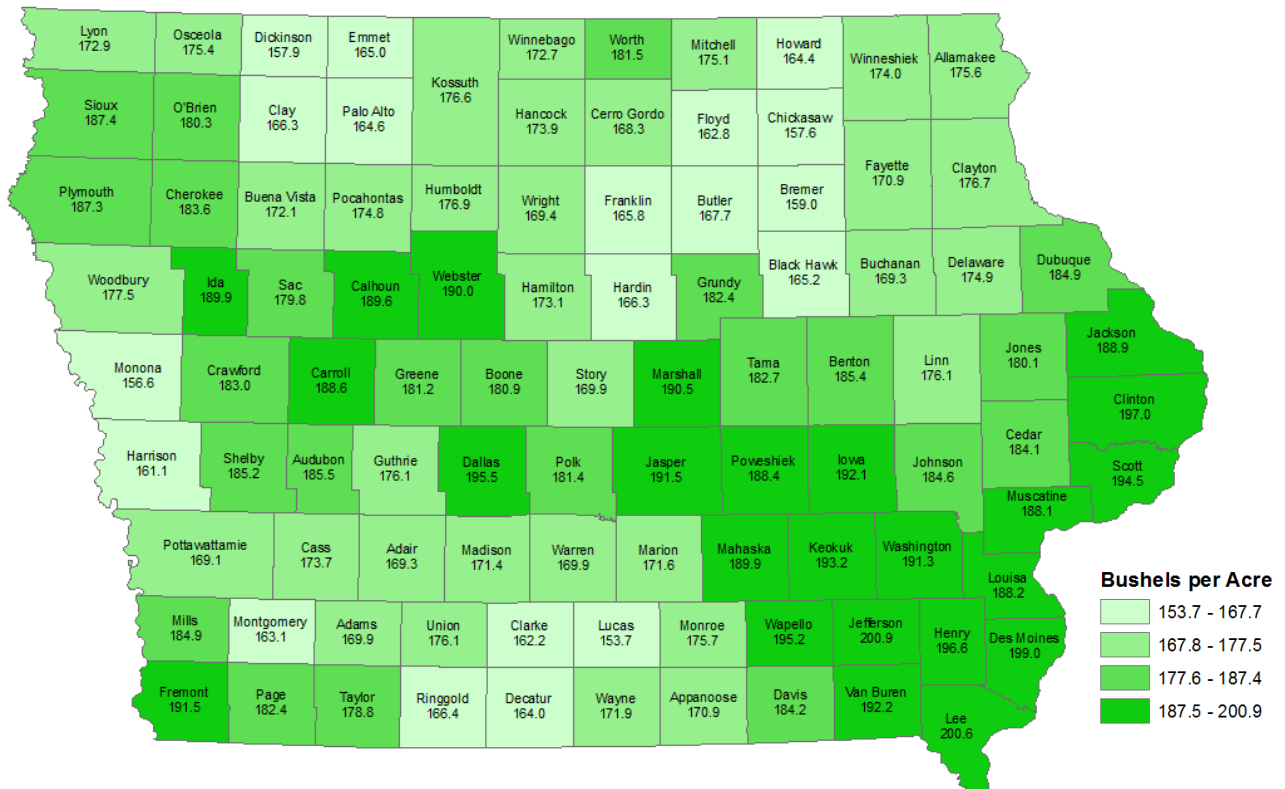

Media Contact: Greg Thessen

Iowa corn growers produced 2.37 billion bushels in 2014, the third largest on record, 2 percent below the record high set in 2009 and less than 1 percent below 2007 according to estimates released by the USDA, National Agricultural Statistics Service. Kossuth County was the largest corn producing county in Iowa with 57.2 million bushels. Webster, Plymouth, Sioux, and Pottawattamie rounded out the top five.

The Iowa corn yield, at 178 bushels per acre, was the third highest on record, trailing the record high of 181 set in 2004 and tied in 2009. Four of the five highest yielding counties were in the Southeast District. Jefferson led all counties with a county-wide average of 200.9 bushels per acre. Lee County also topped the 200 bushel level. Des Moines, Clinton, and Henry counties rounded out the top five.

Generally favorable conditions supported corn development during 2014, with widespread heavy rainfall during the last half of August. High grain moisture levels kept harvest 1 to 2 weeks behind normal throughout October before more favorable conditions in November let corn harvest finish on schedule.

2014 CORN YIELD

USDA is an equal opportunity provider and employer.
