

Hello, my name is _____, at the University of Wyoming. On behalf of the USDA Forest Service we are conducting a voluntary survey about Arizona, Colorado, New Mexico and Texas forest fire management. The purpose of this study is to help agencies with fire protection responsibilities to evaluate public understanding of prescribed burning and mechanical fuels reduction projects and programs, and the public's willingness to pay for implementing such programs. Can you hear me okay? This survey will take a few moments of your time now, and then we will send you a booklet in the mail. After you receive the booklet, we will call back to review the booklet with you and ask a few more questions, which will take about 10 minutes.

Before starting let me inform you that according to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-189. The time required to complete this information collection is estimated to average 15 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

We want to assure you that the information collected from this survey is kept confidential. Personally identifiable information is not included in any manuscripts, reports, or presentations and there will be no direct link between any personally identifiable information and your responses.
