PROGRAM: CREATE LOOPS FOLLOWING ROUTING INSTRUCTIONS FOR VARIOUS CIGAR TYPES:

Cigar Loops (non-blunt)

Items R03_YG1006_NB through R03_YG1072 are repeated once for each type of cigar the respondent has ever smoked with tobacco (non-blunts), following skips appropriately? If the respondent has smoked multiple cigar (non-blunt) types, these items are repeated in a loop for each cigar type? All loops about non-blunt cigar types are completed first before any/all blunt-only cigar loops. See R03_YGT04 for transition text shown at the start of each loop.

Cigar Loops (blunt-only)

Given the definitions of the groups, a respondent cannot be a user of a cigar type as both a non-blunt and blunt-only smoker; a respondent can only be one or the other or neither, but not both? When answering in the blunt-only loops, only a subset of items is asked about for cigar types smoked as blunt-only and include unique fills to be displayed only for these users (ie. blunt-related fills)? The blunt-only items are: R03_YG1108, R03_YG1011, R03_YG1112, R03_YG1130, R03_YG1131, R03_YG1118, R03_YG1123, R03_YG1030, R03_YG1032, R03_YG1033, R03_YG1039, R03_YG1040, R03_YG1034, R03_YG1047, R03_YG1048, R03_YG1070, R03_YG1049, and R03_YG1071.

Cigar Items Asked Once (of all respondents)

Items R03_YGT03 through R03_YG9148 are asked only once of all respondents? If respondent smokes multiple cigar/blunt types, these items are asked one time after the final loop is completed.

SMOKELESS TOBACCO

Box ID: R03_YST01

Las siguientes preguntas son acerca de tabaco que no se fuma, el cual se pone en la boca. Al consumir tabaco que no se fuma, normalmente la persona lo mastica, lo chupa o lo escupe, aunque no siempre es necesario hacer eso con algunos tipos de tabaco. El snus, por ejemplo, es una clase de tabaco que no se fuma sino que viene en una bolsita o saquito que se pone bajo el labio.

Hay muchas clases de tabaco que no se fuma, como por ejemplo bolsitas o saquitos de snus, rapé o tabaco de inhalar, dip y tabaco de mascar. Algunas marcas conocidas son Redman, Levi Garrett, Beechnut, Skoal, Grizzly, Nordic Ice y Copenhagen.

PROGRAM: CREATE LOOPS FOLLOWING ROUTING INSTRUCTIONS FOR VARIOUS CIGAR TYPES:

Cigar Loops (non-blunt)

Items R03_YG1006_NB through R03_YG1072 are repeated once for each type of cigar the respondent has ever smoked with tobacco (non-blunts), following skips appropriately? If the respondent has smoked multiple cigar (non-blunt) types, these items are repeated in a loop for each cigar type? All loops about non-blunt cigar types are completed first before any/all blunt-only cigar loops. See R03_YGT04 for transition text shown at the start of each loop.

Cigar Loops (blunt-only)

Given the definitions of the groups, a respondent cannot be a user of a cigar type as both a non-blunt and blunt-only smoker; a respondent can only be one or the other or neither, but not both? When answering in the blunt-only loops, only a subset of items is asked about for cigar types smoked as blunt-only and include unique fills to be displayed only for these users (ie. blunt-related fills)? The blunt-only items are: R03_YG1108, R03_YG1011, R03_YG1112, R03_YG1130, R03_YG1131, R03_YG1118, R03_YG1123, R03_YG1030, R03_YG1032, R03_YG1033, R03_YG1039, R03_YG1040, R03_YG1034, R03_YG1047, R03_YG1048, R03_YG1070, R03_YG1049, and R03_YG1071.

Cigar Items Asked Once (of all respondents)

Items R03_YGT03 through R03_YG9148 are asked only once of all respondents? If respondent smokes multiple cigar/blunt types, these items are asked one time after the final loop is completed.

Return to IMS and set the following:

(A) Create SP-level tasks for all SPs confirmed to have been living at linked W3 address:

Set R03_EventType = Adult (and) IMS, create SP Event Type = Adult if R03_ExpectedSPEventType = Adult.

OR

Set R03_EventType = Youth (and) IMS, create SP Event Type = Youth if R03_ExpectedSPEventType = Youth.

OR

Set R03_EventType = Adult (and) IMS, create SP Event Type = Adult if R03_ExpectedSPEventType = ExpectedAdult + R03_VTA20 = 1.

OR

Set R03_EventType = Youth (and) IMS, create SP Event Type = Youth if R03_ExpectedSPEventType = ExpectedAdult AND R03_VTA20 != 1.

Else, for SPs confirmed to have moved from R03_LINKED_ADDRESS, IMS, do not create SP-level tasks at this DUID, instead move and associate SPs with new DUID created by IMS; new DUID: R03_AddressType= NewVerify. IMS, create & display newly created DU on Browse Case screen in IMS.

Exception: If R03_AddressType = NewVerify and PID with R03_ExpectedSPEventType = ExpectedAdult was confirmed as 18+ in previous VT, create R03_EventType = Adult.

(B) Universe of status codes set in VT and returned then propagated forward by IMS:

Set Task 301 = FVS if PID has W3VTR = 1 and {CurrentSP_LD = 1 (or) W1Parent_LD = 1 (or) W2_Parent_LD = 1}. Else set Task 301 = FVO.

Exception: Set Task 301 = FVS if (R03_ExpectedSPEventType = ExpectedAdult + R03_CURRENT_AGE_LD >=18 + R03_AddressType = NewVerify).

Set Task 301 = FVM if the R03_FieldedAddress != R03_LINKED_ADDRESS (and) a new address was collected at R03_VTA00C, and defined as the R03_LINKED_ADDRESS in R03_VTABOXA. (Do not set status = FVM if the W3_FieldedAddress was simply corrected in R03_VTA00D.)

Set Task 301 = ISP (Split) for R03_AddressType = NewVerify in instances when a subset of SPs associated with the parent DUID have split from this R03_LINKED_ADDRESS.

Set Task 301 = IMV (Moved) for R03_AddressType = NewVerify in instances when a subset of SPs associated with the parent DUID have split from this R03_LINKED_ADDRESS and a full new address is not known (R03_VTA12 address fields contain any one or more address fields: Address line 1, City, State, Zip = Empty). Retain association of SPs who have moved and for whom a full address is not known until we know otherwise.

Set Task 312 (Adult SP) or Task 331 (Youth/SY) = IAW (Away) in instances when the SP is found to be temporarily away from the R03_LINKED_ADDRESS: R03_VTA16 = 1 (and) possible free text detail was provided in R03_VTA17. Extract free text entered in R03_VTA17 and display in Comments in the Activity Log, Blaise returns status to set SP (Task 312 (or) Task 331) = IAW.
