

Statement Event Roster

Pop-Up Specifications

Version 04.01.0000
8/12/2008

Roster Pop-Up Window Display:

Add Event Date -- Web Page Dialog

DontKnow | Refusal

Please select event type.

Event Type:

- ☐ Seperately billing lab (SL)
- ☐ Hospital emergency room (ER)
- ☐ Institutional stay (IU)
- ☐ Seperately billing doctor (SD)
- ☐ Hospital outpatient visit (OP)
- ☐ All other visits to medical providers (MP)
- ☐ Dental (DU)
- ☐ Hospital inpatient stay (IP)

Please select visit type and enter the event date(s).

Visit Type:

- ☐ Single Visit
- ☐ Repeat Visit

Event Start Date:

MM DD YY Number Of Visits

Event Stop Date:

MM DD YY

Add-And-Stay OK Cancel

Display instructions:

Visit Type: Display "Single Visit" as the default selection.

Display the following in the same blue font used for interviewer instructions:

"PLEASE SELECT EVENT TYPE."

"Event Type:"

"PLEASE SELECT VISIT TYPE AND ENTER THE EVENT DATE(S)."

6/24/2013 1:01 PM

“Visit Type:”

“Event Start Date:

“Event Stop Date:”

Fields:

Field #1: EVNT.STEVTYPE

Field #2: EVNT.VISTTYPE
If EVNT.STEVTYPE = 1/SL, 2/SD, 3/DU, 6/OP, or 10/MP,
enable EVNT.VISTTYPE.
Else, disable EVNT.VISTTYPE.

Field #3: EVNT.EVBEGMM

Field #4: EVNT.EVBEGDD
If EVNT.VISTTYPE \neq 2/RepeatVisit, enable EVNT.EVBEGDD.
Else disable EVNT.EVBEGDD.

Field #5: EVNT.EVBEGYY

Field #6: EVNT.RVTIMES
If EVNT.VISTTYPE = 2/RepeatVisit, enable EVNT.RVTIMES.
Else disable EVNT.RVTIMES.

Field #7: EVNT.EVENDMM
If EVNT.STEVTYPE = 5/IP or 7/IU, enable EVNT.EVENDMM.
Else disable EVNT.EVENDMM.

Field #8: EVNT.EVENDDD
If EVNT.STEVTYPE = 5/IP or 7/IU, enable EVNT.EVENDDD.
Else disable EVNT.EVENDDD.

Field #9: EVNT.EVENDYY
If EVNT.STEVTYPE = 5/IP or 7/IU, enable EVNT.EVENDYY.
Else disable EVNT.EVENDYY.

See Statement Event Pop-Up Window .pdf for additional specifications.

Background Variable Assignments:

Create a new Event for each visit/event added. Events are stored on EVNT:

EVNT key = EVNT.EVNTBASE + EVNT.EVNTNUM

BASE.LASTEVT holds the highest EVNT.EVNTNUM prior to fielding cases. Not all EVNT records are fielded. The first time an EVNT record is generated in the field, BASE.LASTEVT should be \geq to the highest EVNT.EVNTNUM fielded. The new EVNT.EVNTNUM should be calculated based on BASE.LASTEVT + 001. Each time an EVNT record is generated in the field, BASE.LASTEVT will be updated to match the highest EVNT.EVNTNUM in the field. Therefore, each time an EVNT record is generated in the field, the new EVNT.EVNTNUM should be calculated based on BASE.LASTEVT + 001. See detailed instructions below.

EVNT.EVNTBASE = BASE.BASEID

EVNT.EVNTNUM = EVNT.EVNTNUM = BASE.LASTEVT + 001.

This assumes that BASE.LASTEVT is incremented each time an EVNT record is generated in the field.

EVNT.EVNTRNDC = Current round

EVNT.EVNTTYPE =

Assign correct EVNT.EVNTTYPE based on EVNT.STEVTTYPE enumerated response:

If EVNT.STEVTTYPE = 1/SL, set EVNT.EVNTTYPE = 'SL'.

Else if EVNT.STEVTTYPE = 2/SD, set EVNT.EVNTTYPE = 'SD'.

Else if EVNT.STEVTTYPE = 3/DU, set EVNT.EVNTTYPE = 'DU'.

Else if EVNT.STEVTTYPE = 4/ER, set EVNT.EVNTTYPE = 'ER'.

Else if EVNT.STEVTTYPE = 5/IP, set EVNT.EVNTTYPE = 'IP'.

Else if EVNT.STEVTTYPE = 6/OP, set EVNT.EVNTTYPE = 'OP'.

Else if EVNT.STEVTTYPE = 7/IU, set EVNT.EVNTTYPE = 'IU'.

Else if EVNT.STEVTTYPE = 10/MP, set EVNT.EVNTTYPE = 'MP'.

If EVNT.STEVTTYPE = 5/IP, set EVNT.IPSTATUS = 2/Discharged.

EVNT.EVNTPROV = Set to EVNT.EVNTPROV = PROV.PROVNUM currently being asked about.

BASE.LASTEVT = Always holds the highest EVNT.EVNTNUM.
Set BASE.LASTEVT=EVNT.EVNTNUM just added.

See Background Variable .pdf for additional specifications.
