Q2.

Thank you for taking the time to speak with me today. We are conducting interviews with people who agreed to be in a study about a program offered at [CBONAME] called [STEDPRO]. The study is called the Subsidized and Transitional Employment Demonstration or STED for short. It is funded by the U.S. Department of Health and Human Services and my company, Decision Information Resources, or DIR, is conducting this survey. You may have received a letter recently about the STED study.

We need to talk with people who got into the program and those who did not. Your participation in this study will help policy-makers better understand how to help people find and keep jobs. This interview will include questions on your employment situation, your use of services, and your overall well being.

This interview should only take 30 minutes. We will mail you a \$25 gift card as a “thank you” for completing the interview.

All of your responses on this survey will be kept private; the research staff has been trained in protecting private information and your name will not appear in any written reports we produce. All of the study results will be reported for groups of individuals; no results will be analyzed or reported for individuals. Your responses to these questions are also completely voluntary. That means you may choose not to answer any question, or you may stop the interview if you wish, but we hope you don't. Your responses to these questions will in no way affect your participation in the [STEDPRO] program or affect your receipt of any kinds of public benefits or services.

According to the Paperwork Reduction Act (PRA), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection is 0970-XXXX and it expires XX/XX/XXXX.

And finally, this interview might be monitored or recorded for quality control purposes. May we begin?

Each of the next set of questions will ask you for your best guess at the chance that something will happen in the future. You can think of the **percent chance** that some event will occur as the number of **chances out of 100** that the event will take place. If you think that something is impossible, consider it as having a 0 percent chance. If you think the event is possible but

unlikely, you might say there is a 3 percent chance or a 15 percent chance. If you think the chance is pretty even, you can say there is a 46 percent chance or perhaps a 52 percent chance. If you think the event is likely, but not certain, you might say there is a 78 percent chance or a 94 percent chance. If you think it is certain to happen, give it a 100 percent chance.

Just to make sure that you are comfortable with the scale, I'd like you to do a few practice questions, and explain your answer to me.

Now I'm going to ask you some questions about your relationships with other people.

F1.

From time to time, most people discuss things that are important to them with others. These may include good or bad things that happen to you, problems you are having, or important concerns you may have. I'd like to ask you about the people with whom you often discuss things that are important to you. You may refer to these people in any way you want; for example you may use just their first names or nicknames or initials. I am not interested in the identities of these people. I just need to have some way to refer to them so that when I ask you a follow-up question we both know who we are talking about.

Over the last 6 months, who are the people with whom you most often discussed things that were important to you?

INTERVIEWER PROMPT: This could be a person you tend to talk to about things that are important to you.
