SUPPLEMENTARY INFORMATION:

Title: 30 CFR 250, Subpart J, *Pipelines and Pipeline Rights-of-Way (ROW)*.

Form: BSEE-0149.

OMB Control Number: 1014-0016.

Abstract: The Outer Continental Shelf (OCS) Lands Act at (43 U.S.C. 1334), authorizes the Secretary of the Interior to prescribe rules and regulations necessary for the administration of the leasing provisions of the Act related to mineral resources on the OCS. Such rules and regulations apply to all operations conducted under a lease, pipeline right-of-way (ROW), or a right-of-use and easement. Section 1334(e) authorizes the Secretary to grant ROWs through the submerged lands of the OCS for pipelines “. . . for the transportation of oil, natural gas, sulphur, or other minerals, or under such regulations and upon such conditions as may be prescribed by the Secretary, . . . including (as provided in Section 1347(b) of this title) assuring maximum environmental protection by utilization of the best available and safest technologies, including the safest practices for pipeline burial. . . .”

In addition to the general authority of OCSLA, section 301(a) of the Federal Oil and Gas Royalty Management Act (FOGRMA), 30 U.S.C. 1751(a), grants authority to the Secretary to prescribe such rules and regulations as are reasonably necessary to carry out FOGRMA's provisions. While the majority of FOGRMA is directed to royalty collection and enforcement, some provisions apply to offshore operations. For example, section 109(c)(2) and (d)(1), 30 U.S.C. 1719(c)(2) and (d)(1), impose substantial civil penalties for failure to permit lawful inspections and for knowing or willful preparation or submission of false, inaccurate, or misleading reports, records, or other information. The Secretary has delegated some of the authority under FOGRMA to BSEE.

The Independent Offices Appropriations Act (31 U.S.C. 9701), the

Omnibus Appropriations Bill (Pub. L. 104-133, 110 Stat. 1321, April 26, 1996), and OMB Circular A-25, authorize Federal agencies to recover the full cost of services that confer special benefits. Under the Department of the Interior's implementing policy, BSEE is required to charge the full cost for services that provide special benefits or privileges to an identifiable non-Federal recipient above and beyond those that accrue to the public at large. Several requests for approval required in Subpart K are subject to cost recovery and BSEE regulations specify service fees for these requests.

This authority and responsibility are among those delegated to BSEE. The regulations at 30 CFR 250, Subpart J, pertain to the regulatory requirements relating to pipelines and pipeline ROWs on the OCS and are the subject of this collection. This collection also covers the related Notices to Lessees and Operators (NLTs) that BSEE issues to clarify and provide additional guidance on some aspects of the regulations.

The current Subpart J regulations specify the use of form BSEE-0149, Assignment of Federal OCS Pipeline Right-of-Way Grant. BSEE uses the information on the information submitted via the form to track the holdership of pipeline ROWs; as well as use this information to update the corporate database that is used to determine what leases are available for a Lease Sale and the ownership of all OCS leases. In this collection, we made a minor revision to the form. Under Part A—Assignment—we added in the under legal description, “and any accessory information.” Under § 250.1012, pipeline ROW grants can include accessories. Therefore, when transferring a Pipeline ROW grant, the description of the pipeline ROW grant should identify everything. This will help facilitate BSEE's review when an application has been submitted.

Responses are mandatory or are required to obtain or retain a benefit. No questions of a sensitive nature are asked. BSEE protects information considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and DOI's implementing regulations (43 CFR 2), and under regulations at 30 CFR part 250.197, *Data and information to be made available to the public or for limited inspection*, 30 CFR part 252, *OCS Oil and Gas Information Program*.

Lessees and pipeline ROW holders design the pipelines that they install, maintain, and operate. To ensure those activities are performed in a safe manner, BSEE needs information concerning the proposed pipeline and safety equipment, inspections and tests, and natural and manmade hazards near the proposed pipeline route. BSEE uses the information to review pipeline designs prior to approving an application for an ROW or lease term pipeline to ensure that the pipeline, as constructed, will provide for safe transportation of minerals through the submerged lands of the OCS. BSEE reviews proposed pipeline routes to ensure that the pipelines would not conflict with any State requirements or unduly interfere with other OCS activities. BSEE reviews proposals for taking pipeline safety equipment out of service to ensure alternate measures are used that will properly provide for the safety of the pipeline and associated facilities (platform, etc.). BSEE reviews notifications of relinquishment of ROW grants and requests to decommission pipelines for regulatory compliance and to ensure that all legal obligations are met. BSEE monitors the records concerning pipeline inspections and tests to ensure safety of operations and protection of the environment and to schedule witnessing trips and inspections. Information is also necessary to determine the point at which DOI or Department of Transportation (DOT) has regulatory responsibility for a pipeline and to be informed of the identified operator if not the same as the pipeline ROW holder.

Frequency: On occasion and as required by regulations.

Description of Respondents: Potential respondents include Federal OCS lessees, lease operators, and holders of pipeline ROWs.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this information collection is a total of 36,564 hours. The following chart details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.
