1110-0009 Justification

Under the terms of Generic Clearance (OMB #1110-0057), the FBI Uniform Crime Reporting (UCR) Program has permission to conduct procedures such as cognitive interviews in order to test and improve its data collection. The following submission details the procedures to provide a description of the data collection activities that will provide cognitive testing of upcoming changes to the Law Enforcement Officers Killed and Assaulted (LEOKA) Program Data Collection, which is a part of the UCR Program. The LEOKA Wizard, the instrument undergoing testing, will allow users to electronically complete forms 1-701, *Law Enforcement Officers Killed and Assaulted Program; Analysis of Officers Feloniously Killed and Assaulted* and 1-701a, *Law Enforcement Officers Killed and Assaulted Program; Analysis of Officers Accidentally Killed* (OMB No. 1110-0009). The goal of the cognitive interviews is to assess the impact of moving from a paper-based collection instrument to a web-based collection instrument. The information gained from the series of cognitive tests will be used to improve the data collection instrument and its instructions.
