Notes: Variables for these Household Nonrespondent Adjustment Cells are the RDD frame variables. Median of the Percentages for a particular variable refers to the median value of the set of percentages provided for that variable by the telephone sample vendor for all telephone exchanges in the country for which the vendor has data. Median of the Medians for a particular variable similarly refers to the median value of the set of median values provided for that variable by the telephone sample vendor for all telephone in the country for which the vendor has data.
