NPS and iNaturalist

The National Park Service is using features of the California Academy of Sciences' iNaturalist mobile and web-based tools to record and manage natural history observations on NPS lands. These observations will be valuable to park staff to inform management decisions and interpretation and education programming. Your collection of these data is completely voluntary; if you wish to share your experiences and observations, please select from the projects listed below.

Select a park/project:

- Acadia National Park
- Pinnacles National Park
- Pinnacles NP BioBlitz 2015
- Yosemite National Park

Paperwork Reduction and Privacy Act Statement: The National Park Service is authorized by 16 USC, 1a-7 to collect this information. This information collection will provide data for the National Park Service to better understand which species occur on its lands and where those species occur. Response to this request is voluntary. No action may be taken against you for refusing to supply the information requested. The permanent data will be anonymous. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

BURDEN ESTIMATE Public reporting burden for this form is estimated to average 5 minutes per response. Direct comments regarding the burden estimate or any other aspect of this form to: Simon Kingston (970-225-3551); or Phodrea Ponds, NPS Information Collection Review Coordinator.
