Why did I receive this survey?

Authorized by Title 13, U.S. Code, Section 182, the Census Bureau surveys state and local governments annually. The Census Bureau selects about 11,000 governments to participate in the annual survey.

Your response to this survey is important. This information will provide insight about government activity and allow your community leaders the opportunity to make informed decisions. This survey provides the only source of data on government employment and payroll by job function.

Government employment represents approximately 15 percent of the total workforce and government payroll is a vital contribution to the U.S. Gross Domestic Product (GDP). This information is often requested by other governments, researchers, and media outlets to inform the public and develop policy for state and local governments.
