

RI 76 10(201510-3206-001)

The handling protocol for the RI 76-10(201510-3206-001) is the same as the SF 2823 (3206-0136) "Designation of Beneficiary": the information is "housed" by the Retirement Operations Center in the annuitant's retirement file.

It is not stored electronically by OPM/Retirement Services. It is in paper format only in the retirement file.

The information on the form typically is not used until the annuitant's death. At that time the FEGLI life insurance is certified by RS to OFEGLI (MetLife) accompanied by the assignment, which is used for payment to an assignee/beneficiary.
