Document History

<i>Date</i>	<i>Spec</i>	<i>App</i>	<i>Summary of Changes</i>	<i>Revised by</i>
12/20/04	1.0	1.0	Initial version.	Paul Sawyer
01/06/05	1.1	1.0	<p>Minor corrections to prompt styles and formatting. Filled in missing prompt text at 5150. Fixed prompt names in 5040, 5900 (KBA instead of GLB). Filled in list of U.S. territories.</p> <p>Changes based on review of 1/12/05: Clarify the transfer of control between the Global section and this section – removed use of the word “caller” to mean transfer of control and reserve that word for humans dialing the telephone. Add separate prompts within 1090 to handle different values of parameter which_name. Correct GO TO error in 1000: if names_to_collect is LAST and spelling_only is true, then go to 1010. Correct GO TO error in 1060: If BOTH and names_to_collect is FIRST_LAST, then go to 1070. Clarify different kinds of confirmation prompts in 1070. Add Requirement IDs where needed, mostly. Requirement IDs are mostly not included in the GetName procedure because it reflects code that is being reused from BEVE. The nested conditionals in these DMs prevent the simple addition of Requirement IDs, and restructuring the DM specifications would put the DM specs out of sync with the existing code.</p>	Paul Sawyer
02/18/05	1.2	1.0	<p>Change prompt name suffixes in 1090 to be more consistent with other DMs for the Full, Alt , and Maiden variations. Fix prompt wording as adjusted during the recording session. Change 5010 confirmations to “never” as is usual for yes/no dialogs.</p>	Paul Sawyer
03/04/05	1.3	1.0	Revised Requirement IDs in 5020, 5100, 5130, 5220, 5260, 5900, 1005, 1010, 1020, 1030, 1040, 1050, 1060, 1070, 1090, 1300, 1400	Steven Ligi
03/09/05	2.0	1.0	<ol style="list-style-type: none"> 1. Removed MaxNoMatch row from 1060. Normal max retries behavior applies to this DM – goes to 1300. 2. Added clarification comment in 5210 for default confirmation prompt. 3. Add success prompt for Yes in 5010. 4. Add success prompt for Yes in 5130. 5. Add success prompt for Yes in 5210. 6. Disable DTMF input for yes/no confirmation in 5020 (SSN input). 7. Add silence spacer prompts in 5200. 	Paul Sawyer
04/11/05	2.1	1.0	<p>Changes following user testing.</p> <ol style="list-style-type: none"> 1. Change prompts in 5020 to encourage callers to speak numbers quickly. Test participants came with the belief that the needed to speak s-l-o-w-l-y in order for the system to understand them, when in fact they were hitting timeouts due to speaking or punching keys too slowly. Also change timeout values. 2. Similar changes in 1010 and 1030 to encourage callers to spell faster. 	Paul Sawyer

04/22/05	2.2	1.0	Changes following review. 1. Show increased timeout value in 1030 (as in 1010) 2. Remove extra space between letters in 1040 spelling.	Paul Sawyer
05/02/05	2.3	1.0	Fixes to "administrative" bugs. 1. Fix prompt file names in 1040 – two prompts with same name. 2. Clarified timeout values in 5020 (getting SSN) and restore DTMF input for confirmation.	Paul Sawyer
05/06/05	2.4	1.0	1. Fix prompt text that changed during recording. 2. Remove superfluous "Got it" from beginning of 5200. Calls to GetName always end with an acknowledgement, so no need to further acknowledge the user input of a name.	Paul Sawyer
06/16/05	2.5	1.0	1. Clarify in 5900 that it handles DM failures only in the main part of KBA, not within GetName which has it's own failure handler (1300). 2. Clarify the values of maxnomatches and maxnoinputs within GetName. 3. 5150 prompt is set to short silence. The failure message to the caller has already been played within GetName.	Paul Sawyer
08/12/2005	2.6	1.0	Changes (Paul Sawyer): 1. In 1090, fix Nomatch1 & 2 prompts to have generic wording ("the" instead of "your") so that they prompts work for caller's last name, caller's alternate name, and mother's maiden last name. Changes following the tuning report recommendations (Nadine Ozkan): - Prompt changes are in red (style : Table: RevisedRecordings) - Structural changes are highlighted in yellow: o Replaced all GetName DMS (i.e. DMS 1000, 1005, 1010, 1020, 1030, 1040, 1050, 1060, 1070, 1090, 1300 and 1400) by new DMS corresponding to the Name OSDM version 2.0.1. o The inclusion of the Name OSDM also affects parameters passing in DMS 5030, 5110 and 5140.	Paul Sawyer & Nadine Ozkan
08/18/2005	2.7	1.0	Changes highlighted in yellow (highlights from previous version have been removed) - Changes to the Name OSMD specs: o Changes to DMS : 1070 and 1080 – conditions and actions descriptions are clarified. o DMS 1005 and 1020: removed the "NoMatch" condition - DMS 5030, 5110 and 5140: Changes to parameters passed to Name OSDM (exitfailureprompt and exitsuccessprompts parameter). Correspondingly added a note about the exit success prompt in 1400. - Prompt 1005-KBA-SayLastName-Prompt-initialprompt3-maiden: Minor prompt change.	Nadine Ozkan

10/22/05	2.8	1.0	<p>Changes following tuning 2.</p> <ol style="list-style-type: none"> 1. Speech parameter changes in Name DMs: 1005_SayLastName, 1020_SayFirstName, 1010_SpellLastName, 1030_SpellFirstName. 2. Add synonyms in 1060_GetMistake. 3. In 1070_RespellFirst and 1080_RespellLast, suggest adding silence between letters in playback of spelling. 4. In 5130, suggest adding silence between parts of the date readback, and suggest supporting one-step correction in confirmation.. 5. Remove the word "spelled" from the prompts for say-and-spell in 1005 and 1020. The grammar for the Name OSDM does not include "spelled". 	Paul Sawyer
11 Dec 05	2.9	1.0	<ol style="list-style-type: none"> 1. Restore name collection in Error! Reference source not found. To use old code and tables instead of Name OSDM. These are NOT marked as revisions. 2. Simplified 5020 Confirmation Retry and Confirmation Timeout prompts to use what can be implemented: I think you said <SSN>. Is that correct?" 3. Edit prompt text of 5900-KBA-Dmfailure-Prompt1 to match what was recorded. 	Paul Sawyer
2 Feb 06	2.10	1.0	<p>Changes following Tuning 3:</p> <ol style="list-style-type: none"> 1. Specify one-step correction in 5130, 5200, 1070, 1090. 2. Clarify that global grammars should not be active during name collection (1005, 1010, 1020, 1030, 1070, 1090). 3. In 5020, add synonyms to catch OOVs. Add "Yes or No" to end of Initial prompt. 4. Tweak prompts in 1005, 1010, 1020 to emphasize what caller should do. 5. Change (or re-emphasize) barge-in sensitivity in several Name collections. 	Paul Sawyer
5 Feb 06	2.11	1.0	<p>Add support for blocked accounts. Affects 5230, and adds 5270.</p> <p>Remove restriction in 5130 on date of birth.</p>	Paul Sawyer
15 Feb 06	2.12	1.0	<p>Changes following discussions and reviews: (previous revision marking left in place for SSA and CPT review):</p> <ol style="list-style-type: none"> 1. Back out recommendation for one-step correction in 5130, 1070, 1090. These were recommended back in Tuning 2 but are difficult to implement and not essential, so will be removed for now. 2. Revised prompt in 5000 to encourage callers to stick with automation. 	Paul Sawyer

21 Aug 06	2.13	1.0	Changes as a result of Tuning 4. 1. 5010: Remove agent synonyms from grammar. Tweak prompt to emphasize that exact dollar amount is needed (saves problems in 5210). 2. 5020: Increase incomplete timeout and max speech duration values. 3. 5020: Specify some optional prefixes to a SSN. Change low confidence threshold. 4. 1005: Tweak prompt to emphasize both saying and spelling. Tweak speech parameters. 5. 1005, 1010, 1020, 1030: Tweak speech parameters. 6. 1060: Add synonyms. Disable global commands. 7. 1070: Tweak speech parameters. 8. 5130: Tweak prompts to encourage correct statement of the date. Remove unneeded grammar options in dates. Remove global grammars. 9. 5200: Tweak prompt to encourage saying just STATE. Disable global Agent and Main Menu. Disable Agent from confirmation grammar. 10. 5210: Tweak speech parameters. Add "I don't know" option.	Paul Sawyer
19 Jan 07	2.14	1.0	Added Message Numbers to all prompts	Sean Stallings VZB
04 May 07	2.15	1.0	Made minor corrections to 1010, 1060, 1070,1090	Sean Stallings VZB
24 May 07	2.16	1.0	Made correction 5200	Sean Stallings VZB
19 July 07	2.16	1.0	Made correction 5000	Carol Cummings VZB

3 Aug 07	2.17	1.0	Removed "Quickly" from 50332 – 1030-SpellFirstName-VM Removed "Please" from 50333 - 1030-SpellFirstName-VM Added "Please say Yes or No" - 1040 ConfirmName Help Prompt Moved "Now" - 50208 (5020-KBA-GetSSNumber-ConfPrompt-SSN2)	Carol Cummings VZB
15 Aug 07	2.18	1.0	Updated 50346	Sean Stallings VZB
22 Aug 07	2.19	1.0	Updated Title and Headers	Sean Stallings VZB
06 Sept 07	2.20	1.0	Removed global defaults from retry 1 and retry 2 prompts	Sean Stallings VZB
08 Oct 07	2.21	1.0	Updated 1090 to resolve prompting issue for callers who have not spelled their first or last name yet.	Sean Stallings VZB
15 Oct 07	2.22	1.0	Added [Global Default] note to all retry 1 and 2 prompts (except for name capture)	Sean Stallings VZB

17 Oct 07	2.23	1.0	Corrected No Input/No match change to Timeout/ Retry	Sean Stallings VZB
19 Oct 07	2.24	1.0	Updated message 50367	Sean Stallings VZB
20 Feb 08	2.25	1.0	Added Check Condition modules, 5015, 5090, 5120, 5140,, 5190, 5205, 900 Added Privacy note to module notes for DM 5020, 5130, 5200, 5210, 1005, 1010, 1020, 1030, 1070, 1090 Added counter increment reporting to module notes for DM 5020, 5130, 5200, 5210, 1005, 1010, 1020, 1030, 1070, 1090	Sean Stallings VZB
26 Feb 08	2.26	1.0	Added DM 4999 Corrected Pathing for Name Collection Process Added DM 900	Sean Stallings VZB
27 Feb 08	2.27	1.0	Removed Name Collection DM's (900-1400) Added Name capture prompting/format from 1099	Sean Stallings VZB
28 Feb 08	2.28	1.0	Updated DM's 5035, 5045, 5090, 5140, changed confirmation from "if necessary" to ALWAYS.	Sean Stallings VZB
04 March 08	2.29	1.0	Added Privacy section the Global Behavior chapter	Sean Stallings VZB
10 March 08	2.3	1.0	Updated 5000 with new wording informer callers that they need to know the exact dollar amount of their last benefits payment. Removed 5010 Updated 5005, 5030, 5040, 5090, 5120, 5135, 5190, 5205; Corrected reporting information for "if else" conditions.	Sean Stallings VZB
19 March 08	2.31	1.0	Added new module, 5215 CantProceed-Msg.	Sean Stallings VZB
25 Mar 08	2.32	1.0	Corrected reporting string in module 5120	Sean Stallings VZB
04 Apr 08	2.33	1.0	Clarified wording for 4999 Check Null Condition Removed module 5025	Sean Stallings VZB
11 Apr 08	2.34	1.0	In order to assure that re-use items are properly reported, in Check Null Condition, if TVDC items to collect = 0, the call must then route to the next Check Condition Module. Prompt 50306 has been corrected. Module 5190 has been updated, added module note stating that DTMF 9 is disabled for this module.	Sean Stallings VZB
1 May 08	2.35	1.0	Added reporting string to modules 5020, 5035, 5045, 5100, 5110, 5130, 5140, 5200. 5210.	Sean Stallings VZB
12 May, 2008	2.36	1.0	Added reference to Reverse ANI lookup, per SARA, part 3. <ul style="list-style-type: none"> ➤ Added module 5003 to perform lookup ➤ Added text to Developer notes in module 5035 to reference use of parallel verification grammar for first name built from results of reverse ANI look-up ➤ Added text to Developer notes in module 5045 to reference use of parallel verification grammar for family name built from results of reverse ANI look-up 	Peter Modesto Nuance

12 May, 2008	2.37	1.0	Corrections from internal review: broken links, etc.	PM
14 May 2008	2.38	1.0	Added "avoidsamemistake" to Global descriptions, 2.3 Adjusted reporting tag in DM 5003 Reverse ANI Lookup	Kim Rothlis VzB
15 May 2008	2.38	1.0	Made minor grammatical error updates and adjusted the reporting triggers to have 4 digits (i.e. 0000 = success)	Becky Stallings, VzB
29 May 2008	2.39	1.0	Note how we will handle multiple first names and initials in first name collection using reverse ANI lookup (DM 5003).	Peter Modesto, Nuance
30 May 2008	2.40	1.0	Added additional rules in handling of name collection using Reverse ANI Lookup (DM 5003)	Kim Rothlis VzB
2 June 2008	2.41	1.0	Clarification provided to handling of last name collection using Reverse ANI Look up (DM 5003)	Kim Rothlis VzB
24 June 08	2.42	1.0	Moved Module 5003 Reverse-ANI Look up. Is now 5032 Reverse-ANI Look up. ANI Look up should not occur until after 5030-GetFirstName Check Condition.	Sean Stallings VzB
11 July 2008	2.43	1.0	Updated module 4999, added in correct routing for 'If TVDC Items to collect= 0' condition, now routes to module 5003. Moved Reverse ANI Look up module, it is now located just before the Social Security Check Condition module.	Sean Stallings VzB
23 July 2008	2.44	1.0	Updated Module 5003, added new field 'reporting'. Re-inserted module notes erroneously removed in 2.42	Sean Stallings VzB
04 September 2008	4.0	1.0	BBN Findings Effort a. Updated module 5100, updated retry 2, message 51003 b. Updated modules 5035, 5045, 5110, 5140, updated confirmation retry message 82055 c. Highlighted all BBN Findings changes in Green	Sean Stallings VzB

19 September 2008	4.01	1.0	<p>Merged KBA_v3.04_TNRS and KBA_4 UI's.</p> <p>Updated module 4999, added in correct routing for 'If TVDC Items to collect= 0" condition, now routes to module 5003.</p> <p>Moved Reverse ANI Look up module, it is now located just before the Social Security Check Condition module.</p> <p>Broke Module 5035 GetFirstName into A and B sections, Say and Spell and Spell Only – for TNRS effort</p> <p>Broke Module 5045 GetLastName into A and B sections, Say and Spell and Spell Only – for TNRS effort</p> <p>Broke Module 5110 GetAltName into A and B sections, Say and Spell and Spell Only – for TNRS effort</p> <p>Added Module 5115 PostSSN-DB – for TNRS effort</p> <p>Updated Module 5003, added new field 'reporting'. Re-inserted module notes erroneously removed in 2.42</p> <p>Added REQ ID's to modules 5035A, 5035B, 5045A, 5045B, 5110A, 5110B – for TNRS effort.</p> <p>Added explanatory note to top of modules 5035A, 5035B, 5045A, 5045B, 5110A, 5110B – for TNRS effort.</p> <p>Updated Modules 5110 A and 5110 B, corrected message name for confirmation apology, corrected 'condition' field for confirmation apology and success messages – this resolves tickets 22308 and 22307.</p> <p>Updated Modules 5045 A and 5045 B, corrected 'condition' field for confirmation apology and success messages – for TNRS effort – this resolves tickets 22306 and 22305.</p> <p>Updated Module 5120, added module 5100 to 'entering from' field – this resolves ticket 22309.</p> <p>Updated module 5135, updated 'entering from' field to show that callers will be entering in from module 5130-DOB Check Condition – this resolves ticket 22311.</p> <p>TNRS changes highlighted in Yellow</p> <p>Verizon Business proprietary statement added to title page and page footers.</p> <p>Updated Module 5110B, removed [global default] tag from retry 1/timeout 1. Because wording for this is contained in the message itself, the apology was playing twice – this resolves ticket 22347.</p> <p>Updated Module 5035A and 5035B, corrected typo in confirmation apology condition field – this resolves ticket 22349</p>	Sean Stallings VZB
22 September 2008	4.02	1.0	<p>Updated Module 5045B, corrected typo in ReqID field for the confirmation apology prompt.</p>	Sean Stallings VZB
30 September 2008	4.03	1.0	<p>Updated module 5140, updated wording for Retry 1 prompt. Since the name OSDM works best with spell only on the retry, new prompting will no longer ask callers to say and spell their name.</p>	Sean Stallings VZB

1 October 2008	4.04	1.0	<p>Updated module 5045A, added more explanation in module description, corrected typo's in timeout 1 and 2 message names.</p> <p>Updated module 5045B, corrected typo in Confirmation Apology message name.</p> <p>Updated module 5110A, added more explanation in module description.</p> <p>Updated module 5140, added correct text to confirmation retry 2, message 82055. Highlighted this change in Green.</p>	Sean Stallings VZB
7 October 2008	4.05	1.0	<p>Updated module 5110A, 'Confirmation' section 'Action' field now shows to play confirmation apology prompt on 'no' – this resolves ticket 22422.</p>	Sean Stallings VZB
21 October 2008	4.06	1.0	<p>Updated module 5035A; Added note to Action field for 'Max Retry', now plays [Global Default] message on exit. Updated 'action' column for Confirmation section, removing notes adding 'no' on confirmation condition.</p> <p>Updated module 5035B; consolidated initial 1 and initial 2, since callers will not be entering on a condition. Updated 'action' column for Confirmation section, removing notes adding 'no' on confirmation condition.</p> <p>Updated module 5045A; Added note to Action field for 'Max Retry', now plays [Global Default] message on exit. Updated 'action' column for Confirmation section, removing notes adding 'no' on confirmation condition.</p> <p>Updated module 5045B; consolidated initial 1 and initial 2, since callers will not be entering on a condition. Updated 'action' column for Confirmation section, removing notes adding 'no' on confirmation condition.</p> <p>Updated module 5110A; Added note to Action field for 'Max Retry', now plays [Global Default] message on exit. Updated 'action' column for Confirmation section, removing notes adding 'no' on confirmation condition.</p> <p>Updated module 5110B; consolidated initial 1 and initial 2, since callers will not be entering on a condition. Updated 'action' column for Confirmation section, removing notes adding 'no' on confirmation condition.</p> <p>Updated module 5115; consolidated all 'max retry' and 'no on confirmation' conditionals, since conditions are no longer in use. Conditions now only reference first, last and alt name.</p>	Sean Stallings VZB
29 October 2008	4.07	1.0	<p>Added REQID's to modules 4999, 5000, 5003, 5005, 5155, 5030, 5040, 5050, 5090, 5120, 5135, 5190, 5200, 5205. Renamed 'name' column as 'REQID' in all modules that did not already have a REQID column. Removed 'name' column from modules that had both.</p> <p>Renamed 'option' column as 'REQID' in all modules that did not already have a REQID column. Removed 'option' column from modules that had both.</p>	Sean Stallings VZB
4 November 2008	4.08	1.0	<p>Updated module 5115, added parameters for reporting associated app ID.</p>	Sean Stallings VZB
7 November 2008	4.09	1.0	<p>Updated modules 5035A, 5035B, 5045A, 5045B, 5110A, 5110B. Corrected REQID columns to show the current requirement ID's being used by SSA.</p>	Sean Stallings VZB

1 December 2008	4.10	1.0	COADD/BEVE-MRC Tuning 2 Effort-Recommendations From Nuance <ol style="list-style-type: none"> 1) Updated module 5035B, added entry to 'Module Notes' stating that confidence levels for this module should be set to .400. 2) Updated module 5045B, added entry to 'Module Notes' stating that confidence levels for this module should be set to .400. 3) Updated module 5110B, added entry to 'Module Notes' stating that confidence levels for this module should be set to .400. 	Sean Stallings VZB
2 February 2009	4.11	1.0	Updated Header	Sean Stallings VZB
9 March 2009	4.12	1.0	Updated modules 5035A and 5035B; added developer note stating that single character recognition will be treated as an out of grammar response.	Sean Stallings VZB
24 March 2009	4.13	1.0	Updated module 5035B, changed note regarding max retries/timeouts now reads as 4—this resolves ticket 606153.	Sean Stallings VZB
28 April 2009	4.14	1.0	Updated section 2.2 Timeouts and Retries. Added prompting for timeout global default.	Sean Stallings VZB
21 May 2009	4.15	1.0	Added Chapter 3: Global Commands and Global Prompts, detailing global command exceptions for this application. Updated module 4999, corrected entry for 'entering from' field, now reads COA-DD Global. Updated modules 5045A and 5045B, corrected reporting tags for these modules.	Sean Stallings VZB
25 June 2009	4.15.1	1.0	Cover page update.	Kim Rothlis VzB
22 March 2010	4.15.2	1.0	OMB Attestation Addition Change Added DM 5001_Attestation Flag Check and DM 5002 AttestationYN between modules 5000-Need2Ask-Msg and 5003-Reverse ANI Lookup. Updated modules 5000 and 5003 with correct routing/hyperlinks.	Kim Rothlis VzB
01 Apr 2010	4.15.3	1.0	SARA3 DD-COA Module Change Request (OMB Attestation Change – additional requirements) Updated the verbiage for message #'s 50001, 50002, and 50003 in DM 5000-Need2Ask-Msg	Becky Stallings, VzB
02 Apr 2010	4.15.4	1.0	SARA3 DD-COA Module Change Request (OMB Attestation Change – additional requirements) Updated wording to messages 50001, 50002 and 50003 in DM 5000-Need2Ask-Msg per customer review.	Kim Rothlis VzB

Chapter 1: Introduction

This document is one part of a set of documents that describe the user interface for the Social Security Administration (SSA) Change of Address (COA) and Direct Deposit (DD) application. This document describes only the interaction for **knowledge-based authentication** (KBA). The call flow has passed through initial introduction and caller qualification before getting to this section. A caller will pass through either this module, or through the password authentication (PWA) module, but not both.

Note that this entire section is jumped into from the Global part of the application and returns to it. The only entry point to this section is from COA-DD 1330-CallKBAAuth-Code. Exit from this section is by return to the same module (COA-DD 1330-CallKBAAuth-Code)

Chapter 2: Global Behavior

2.1 Privacy

The following information is considered confidential; SSN, First Name, Last Name, Mother's Maiden Name, Other Last Name (as it appears on their Social Security card), Date of Birth, Place of Birth, and Payment Amount. The confidential flag should be set to true for all dialog modules collecting this information from the caller.

2.2 Timeouts and Retries

Retry prompts are specified in the DialogModule tables, and they are preceded by the appropriate apology prompt:

Message Number 00110	retry 1	upon rejection of speech	apology_re1	I'm sorry, I didn't understand you.
Message Number 00111		upon confirmation	apology_re1 –	My mistake.
Message Number 00112	retry 2	upon rejection of speech	apology_re2	I'm sorry, I still didn't understand you.
Message Number 00113		upon confirmation	apology_re2 –	My mistake again.
Message Number 00132	Timeout 1	upon no input	apology_re1	I'm sorry, I didn't hear anything.
Message Number 00111		upon confirmation	apology_re1 –	My mistake.
Message Number 00133	Timeout 2	upon no input	apology_re2	I'm sorry, I still didn't hear anything.
Message Number 00113		upon confirmation	apology_re2 –	My mistake again.
	excess retries		[...]	<timeout / retry prompt(s) specified in DialogModule table>

If callers reach maximum timeouts or retries they will be sent to 5900-DMfailure-Msg and then routed back to Global. For all other global behavior see chapter 4 in the Change of Address/Direct Deposit Global user interface document.

2.3 Avoid Same Mistake

(This section documents the already-existing system behavior. It is not a change.)

In accordance with OSDM default settings, "AvoidSameMistake" is allowed in all collection DMs unless specified otherwise. This is a global parameter and has no specific context.

"AvoidSameMistake" disallows an utterance that is recognized if the utterance was previously rejected by a negative response (i.e. No) during confirmation. The application advances to a retry because the No response given in the initial collection caused the DM to remove the spoken utterance from the list of possible interpretations.

"AvoidSameMistake" is set to TRUE by default and if it needs to be disabled in any individual DM, the Dialog Module Notes section or Developer Notes section will specify "avoidsamemistake = False".

Chapter 3: Global Commands and Global Prompts

3.1 Global Commands

As per 4.5 Global Commands and Global Prompts section in COA-DD Global UI, 'Main Menu' global command will transfer to N8NN Main Menu module 1100-Main-DM.

Chapter 4: Detailed Dialog Specification

[0503 = Not Valid Data]

[0004 = Caller Hang Up]

Developer Notes

Reverse ANI lookup returns name data in many formats. The following rules apply to the handling of first and last names received from the Reverse ANI Lookup string.

For all names:

All punctuation shall be removed

Numbers shall be removed

Single and double letters shall be ignored

Any titles or common suffixes shall be removed (Dr Jr II etc.)

Any contiguous collection of non-whitespace characters beside the above are taken as a name.

Very short names like 'A' will be ignored on the assumption that these would fail to match SSA records.

First Names

Multiple names shall be broken down to individual names (i.e. John & Joan would be added to the verification grammar as 2 entries 1 for John and a second for Joan). These names will be sent to the parallel grammar referenced in DM 5035.

Last Name

Multiple last names will not be added individually to the verification grammar, but as a single entry (i.e. Smith-Jones would be added to the grammar as one entry Smith Jones.). This name will be sent to the parallel grammar referenced in DM 5045.

Developer notes

Collection Max Retry is set to 0.
 Collection Max Timeout is set to 2
 Single character recognition will be treated as an out of grammar response.
 If there is a no-match/rejection error, OR if the caller gives a "No" confirmation to the name, the system checks the ANI and SSN, loads all associated names into a custom grammar and then switches to the SPELL-ONLY fallback, which is announced in prompts Respell1, Respell2, Respell3, and SpellHelp. This matches the spell-only fallback strategy in TPPW, which is based on the Nuance Name OSDM callflow.
Set Confidential Flag to TRUE

5035B-GetFirstName Spell Only

	0311 = Caller Requested Agent	

Developer notes

If condition = Success, load all returned names into custom spell-only grammar
 If condition = Failure, use existing spell-only grammar
 Single character recognition will be treated as an out of grammar response.
 If there is a no-match/rejection error, OR if the caller gives a "No" confirmation to the name, the system checks the ANI and SSN, loads all associated names into a custom grammar and then switches to the SPELL-ONLY fallback, which is announced in prompts Respell1, Respell2, Respell3, and SpellHelp. This matches the spell-only fallback strategy in TPPW, which is based on the Nuance Name OSDM callflow.
 Respell 3 is conditional -- may not always play depending on the number of retries/confirmations played.
 Max Timeout/ Retry set to 4
Set Confidential Flag to TRUE
 When invoking recognition and the Caller-First-name variable is not null, invoke a parallel verification grammar provided by Nuance as a JSP, seeded with the contents of the Caller-First-name variable.
 Set confidence levels to .400

	0303 = Max No Confirm	
	0304 = Max Help	
	0310 = Caller Requested Main Menu	
	0311 = Caller Requested Agent	

Developer notes

If condition = Success, load all returned names into custom spell-only grammar

If condition = Failure, use existing spell-only grammar

If there is a no-match/rejection error, OR if the caller gives a "No" confirmation to the name, the system checks the ANI and SSN, loads all associated names into a custom grammar and then switches to the SPELL-ONLY fallback, which is announced in prompts Respell1, Respell2, Respell3, and SpellHelp. This matches the spell-only fallback strategy in TPPW, which is based on the Nuance Name OSDM callflow.

Respell 3 is conditional -- may not always play depending on the number of retries/confirmations played.

5135-Mother'sMaiden Check Condition	

Prompts				
Msg. Number	REQID	Condition	Wording	
50306	5140-GetMother'sMaiden-Prompt-Initial-1		What was your mother's MAIDEN LAST name including the spelling? For example if the name was Smith, you'd say "Smith, S M I T H". Go ahead.	
50307	5140-GetMother'sMaiden-Prompt-Timeout1		Sorry, I didn't hear you. Please give me the last name with the spelling.	
50308	5140-GetMother'sMaiden-Prompt-Timeout2		I'm afraid I still can't hear you. Please give me the last name and spell it.	
50311	5140-GetMother'sMaiden-Prompt-Retry1		[Global Default] Just spell your mother's maiden last name for me.	
50348	5140-FT-ConfirmationApology-Prompt	If "no" on confirmation	Sorry about that. Let's try again.	
50321	5140-GetMother'sMaiden-Prompt-Respell1		Using only the letters of the alphabet, please spell your mother's maiden last name quickly. For example, if her name was O'Connor, you would say O C O N N O R. Please spell her maiden last name now	
50317	5140-GetMother'sMaiden-Prompt-Respell2	If caller has Timeout1 OR Retry1	Sorry I didn't hear you. Using only the letters of the alphabet, please spell your mother's maiden last name quickly, one letter at a time.	
50322	5140-GetMother'sMaiden-Prompt-Respell3	If caller has Timeout OR Retry in response to the Respell2 prompt This prompt may not always play depending on the number of retries/confirmations played.	[Global Default] If the last name has an apostrophe, space or a hyphen in it, you can just skip that. For example, if it's a two part name like Folsom hyphen Jones, you should just drop the hyphen and not worry about capital letters. Just say f-o-l-s-o-m-j-o-n-e-s. Try spelling the last name one more time.	
50323	5140-GetMother'sMaiden-Prompt-SpellHelp	If last prompt was spell only	I need you to spell just the last name. If the last name has an apostrophe, space or a hyphen in it, you can just skip that. It works best if you use ONLY letters and speak at a quick pace. For example, to spell Smith, you don't need to say S as in Sam, M as in Michael, just say S M I T H ... try it again. Please spell the last name for me now.	
50312	5140-GetMother'sMaiden-Prompt-SayHelp	If last prompt was say and spell	I need you to say the last name and then spell it for me. For example, if the last name was O'Neal, you'd say "O'Neal, O N E A L".	
00120	5140-GetMother'sMaiden-Prompt-Success-1		Alright.

	0002 = Max No Input	
	0003 = Max No Match	
	0200 = Caller Hang Up	
	0303 = Max No Confirm	
	0304 = Max Help	
	0310 = Caller Requested Main Menu	
	0311 = Caller Requested Agent	

Developer notes

The following prompts use SAY AND SPELL grammars: Initial-1, Timeout1, Timeout2, and SayHelp.

If there is a no-match/rejection error, OR if the caller gives a "No" confirmation to the name, the system switches to the SPELL-ONLY fallback, which is announced in prompts Retry1, Retry2, Respell1, Respell2, Respell3, and SpellHelp. This matches the spell-only fallback strategy in TPPW, which is based on the Nuance Name OSDM callflow.

In spell-only fallback collections, use spell-only grammar.

Respell 3 is conditional -- may not always play depending on the number of retries/confirmations played.

Record = U-KBPW-DM_5210-(Call Duration at start),T-KBPW-	0000 = Success	-Call duration at process end
	0001 = Error	
	0002 = Max No Input	
	0003 = Max No Match	
	0200 = Caller Hang Up	
	0303 = Max No Confirm	
	0304 = Max Help	
	0310 = Caller Requested Main Menu	
	0311 = Caller Requested Agent	

Developer notes

Usability note: The back end will ignore the cents, but it's best to ask for it anyway to make explaining what to say easier. Also, the caller is likely to be looking at a written amount, so if they know the dollars they'll know the cents too.

Document History

<i>Date</i>	<i>Spec</i>	<i>App</i>	<i>Summary of Changes</i>	<i>Revised by</i>
12/06/04	1.0	1.0	Initial version for review of sample calls and basic global specifications. The top-level routing application is not here yet.	Paul Sawyer
12/10/04	1.1	1.0	Added top-level application tables. The tables are complete, but there is not yet text for retry, timeout, and help prompts.	Paul Sawyer
12/15/04	1.2	1.0	After first review. System timeout changed to 15 minutes. Prompt wording: 1040-Initial: retirement, survivor, disability. 1100-Help1: add that routing number is usually on left. 1200-Initial: "say xxx or press nnn" 1310-Initial and 1410-Initial: change "issued" to "set up" Other changes: 1370 COAdone renamed to just "done" 1450: several fixes relating to changing it to DD rather COA 1460 renamed to DDcheckstatus 1310 changes to Voice Menu rather than Yes/No to allow other responses. Several DMs added to check and handle system and operator availability, and details of max retries and timeouts, and global commands: 0010, 0020, 2010, 2100, 2110, 2211, 2212, 2213. 1200 goes away, replaced in function by 2010.	Paul Sawyer
12/17/04	1.3	1.0	Add prompt text for retry, timeout, and help prompts. These prompts are NOT flagged with Word revision marking. A few other minor corrections ARE flagged.	Paul Sawyer
12/21/04	1.4	1.0	Minor changes based on review: * Change "insurance" to "income" in 1050. * Clarify that saying Question repeatedly gets the same Help text each time (intro to section 5.2). * Fill in the list of U.S. territories in 1060. * Fill in password process in new 1032. One major change: Move the question about password to the beginning of the interaction, so that the correct service can be pinged as early as possible. Remove 1310, 1410. Replace them with internal branch tests. Add new 1032 to ask the password question, and 1038 to introduce the remaining questions. The ping and check now happens in 1034, 1035, and 1036.	Paul Sawyer

01/06/05	1.5	1.0	Correct the flow out of 1030 – don't ask if caller has password if we already know they do. Minor fixes to prompt styles and text. Filled in list of current and former U.S. territories. Eliminate redundant DMs: 1400, 1410, 1420, 1430, 1440, 1460. Added Requirement IDs to all conditionals and to conditions within PlayPrompts and DB accesses.	Paul Sawyer
01/28/05	1.6	1.0	Minor tweaks Correct the table and text in section 4.1 regarding timeouts and retries.	Paul Sawyer
03/01/05	1.7	1.0	Fix prompt text changed during recording.	Paul Sawyer
03/04/05	1.8	1.0	Revised Requirement IDs in 1010, 1020, 1030, 1038, 1300, 1310, 1340, 1360, 1500, 2010, 2100, 2110	Steven Ligi
03/09/05	2.0	1.0	1. Remove references to audio icons. They will not be used. 2. Add spacer silence prompts wherever multiple prompts are to be played. (1030, 1100, 1090, 1110) 3. Add success prompts to 1032. 4. Remove "yes or no" from 1050 Initial. 5. Add success prompt for "yes" in 1060.	Paul Sawyer
04/12/05	2.1	1.0	Changes following user testing. 1. Change 1120 to a play prompt that always transfers to 2100 for an agent if one is available. 2. Improve prompt wording in 2110, 2211. 3. Remove "Goodbye" as a global command. Recognize it only in ????. 4. Refer to "agent" everywhere instead of "representative". 5. Add 'retirement' etc. to grammar for 1040 in case a caller says one of those instead of simply 'yes'.	Paul Sawyer
04/21/05	2.2	1.0	Change following review of previous version. 1. Add a "wait a minute" feature for bank account info, as had been in the DD module. Changes to 1100, and new DM 1105.	Paul Sawyer
05/02/05	2.3	1.0	"Administrative" fixes for bugs found by Q/A and others. 1. Fix prompt text to match what was recorded in the studio. 2. Change file names of "I think you said" and "Is that correct?" to match current OSDM specifications. 3. Fix Requirement IDs for confirmation options in 2211. 4. Add list of common synonyms for "yes" and "no" grammars	Paul Sawyer
05/06/05	2.4	1.0	1. Fix prompt text changed during recording. 2. Fix DTMF assignments in 2211: Main menu is 9, no DTMF equivalent for goodbye (just hand up).	Paul Sawyer
06/03/05	2.5	1.0	1. Clarify reuse of prompts ("same as ...") in 1110, 1370, 1510. Some timeout 2 prompts lack the word "still", but it will have no effect on usability. Spec changes only – no code changes required.	Paul Sawyer
6/30/05	2.6	1.0	1. Make the conditions in 1000 more generic, since menu item numbers change for various reasons unrelated to COA-DD. Requirement IDs were NOT changed, so we don't mess up existing test cases. 2. Clarify cases where there are multiple prompt files associated with a single condition. Affects 1040, 1050, 1060, 1070, 1090, 1100, 1110. May require code change if the misunderstanding caused the code to be written differently.	Paul Sawyer

8/10/05	2.7	1.0	<p>Changes (Paul Sawyer):</p> <ol style="list-style-type: none"> 1. Correct spelling in 1370-GLB-done-Prompt-Timeout1 and 1370-GLB-done-Prompt-Timeout2. 2. Update ScanSoft address in Properties. 3. Add alternate entry phrases for the case of getting here from the new SpeakFreely Main Menu (added 1012, 1022). 4. Added DMs to describe handling of Voice Genie errors. New DMs are 2101, 2111, 2112. <p>Changes following the tuning report recommendations (Nadine Ozkan)</p> <ul style="list-style-type: none"> - All prompt changes are in red (style : Table: RevisedRecordings) - Other changes, like grammars, parameters & settings are highlighted in yellow. 	Paul Sawyer & Nadine Ozkan
10/21/05	2.8	1.0	<p>Changes following tuning 2</p> <ol style="list-style-type: none"> 1. Added 'agent' and synonyms to the confirmation (yes/no) grammar. 2. Open issues section added. 3. Improved Initial prompt for 1032 to clarify what we mean by password. 4. Added new DM 1130 for case where caller is not qualified to perform the function, offering Main Menu or hang up. This applies if caller says "no" in 1040, 1060, or 1070. 5. Improve synonyms in 'yes' grammar for 1050. 6. Change 1100 grammar from "I have the numbers" to "I'm ready" to avoid recognition confusion with "I don't have them". 7. In 1105, add synonyms for I'm Ready, and add a new option Repeat to allow callers to hear the question again. 8. In 1110, add some synonyms for several global commands. 	Paul Sawyer
10/25/05	2.9	1.0	<ol style="list-style-type: none"> 1. Change in policy from SSA: Of the four qualifying questions, only "not receiving benefits" should result in the message that the caller cannot do the function even with an agent. Failure in any of the other three qualifying questions should make the Agent option available, as had been done prior to versions 2.8. Affects 1060 and 1070, which have been reverted to their previous behavior, and prompt 1130-GLB-CantDoThat-Prompt-Initial1 which is now specific to not receiving benefits. 2. Add retry and timeout prompts to 1130 that had been inadvertently omitted. 	Paul Sawyer
10/27/05	2.10	1.0	<ol style="list-style-type: none"> 1. Correct prompt text for 1130-GLB-CantDoThat-Prompt-Help1. 	Paul Sawyer
12 Dec 05	2.11	1.0	<p>Edited prompt 1100-GLB-KnowBank-Prompt-Help3 to mention Don't Have Them and Wait A Minute.</p>	Paul Sawyer

2 Feb 06	2.12	1.0	<p>Changes for Tuning 3:</p> <ol style="list-style-type: none"> 1. Move Open Issues about one-step correction and grammar duplications into specific modules. Remove issue about touch tone sounds coming through to recognizer – seems to be fixed now. 2. Clarify that “help” in not in any grammar. 3. Improve the flexibility of the “agent” synonyms grammar. 4. Change the requirement regarding agent synonyms in confirmation (yes/no) grammars. 5. Downweight “I don’t know it” in the Help grammar. 6. Clarify Help option grammar in 1032. 7. In 1050, tweak grammar and set to Never confirm. 8. In 1100, change grammar for “I’m ready” to make “I’m” optional. Set DontHave option to Always Confirm. Improve the DontHave confirmation prompt so that it’s clear what a “no” response means. Specify one-step correction for “no, I have them”. 9. Highlight sensitivity setting in 1105, which was specified at the previous tuning but may not have been implemented. 10. Add Goodbye option in 1370. 11. Add synonyms for goodbye in 1510 to catch some OOVs. 	Paul Sawyer
5 Feb 06	2.13	1.0	<p>Changes after review and discussion:</p> <ol style="list-style-type: none"> 1. Add support for blocked accounts. Affects 1340. 2. Fixed wording in 1130 to explain other options when caller is disqualified. 	Paul Sawyer
3 March 06	2.14	1.0	<ol style="list-style-type: none"> 1. Remove conflicting specifications for the grammar for “agent” synonyms, and refer instead to the agent grammar in the N8NN UI spec. 2. Change handling of max retry and max timeout in 1510, so that it hangs up instead of the default behavior to go to 2010. Field experience showed a significant number of cases where infinite looping occurred when the caller said nothing. These may be undetected hang-ups, but even if a caller is still there, they’ve had every explicit opportunity to reach an agent or the main menu, so hanging up is a reasonable action. 	Paul Sawyer
21 Aug 06	2.15	1.0	<p>Changes based on Tuning 4.</p> <ol style="list-style-type: none"> 1. Note that “agent” grammar needs tightening. 2. 1032: Add “I don’t know” to “maybe” grammar so that it’s caught as “maybe” rather than as “no”. Remove “agent” global grammar for this DM. 3. 1130 remove Agent global grammar but keep other globals. Add “menu” as synonym for “main menu”. Tweak initial prompt to suggest they can try again. 4. 1050: Add “SSI” as another synonym for “yes”. Tweak low-confidence threshold. 5. 1040: Improve prompts to be clear that SSI benefits don’t count, and catch “SSI” as a synonym for “no”. 6. 1090: Remove agent synonyms for this DM. 7. 1100: Add “yes” and “I have it” as synonyms for “I’m ready”. Set barge-in sensitivity to less sensitive. 8. 1110: Add note about missing grammars for “main menu” and “question”. 9. 1510: Add “agent agent” as synonym for “agent” in this DM. 	Paul Sawyer

23 Aug 06	2.16	1.0	Change following review of tuning changes. 1. Re-order the qualification questions about getting benefits (1040) and getting SSI (1050). If we ask the SSI question first, the benefits question can be simpler. 2. Rework 1500 and 1510 to help reduce agent requests: Add silence after 1500. Flush speech input before entering 1510. Re-order the prompt options in 1510 to put Agent last. 3. Minor change to 1050-GLB-GetSSI-Prompt-Initial (removal of "First"), to improve flow from 1038.	Paul Sawyer
5 Sept 06	2.17	1.0	1. Rework handling of "more information" for 1130 so that the Agent synonyms are recognized only if the caller asks for and hears the "more information" message. 2. Edit prompts for 1090 to omit mention of Agent synonyms, which are no longer available in this DM. 3. Fixed 1050-GetSSI-YN which should send the caller to 1130 – not 11210 – if they are receiving SSI.	Paul Sawyer/Phil Profili
8 Sept 06	2.18	1.0	Removing the confusion over handling of SSI recipients: 1. In 1040, if a caller says "no" then 1130 is the correct destination, but if they say "SSI" then they should go to 1120 2. In 1050, callers who respond in the affirmative should go to 1120. Clarified confirmation prompting in 1130_CantDoThat_DM.	Phil Profili
23 Apr 07	2.18	1.0	Added DB 1065 Added DB 1365	Sean Stallings VZB
22 May 07	2.19	1.0	Changed message number for silences from 02000/03000 to 20000/30000	Sean Stallings VZB
25 May 07	2.20	1.0	Updated 1060	Sean Stallings VZB
25 May 07	2.21	1.0	Updated 1060	Sean Stallings VZB
09 August 07	2.22	1.0	Corrected DB 1065	Sean Stallings VZB
22 August 07	2.23	1.0	Corrected dates	Sean Stallings VZB
06 Sep 07	2.24	1.0	Removed default global from retry 1 and retry 2 messages Added appropriate prompting for 1110-GLB-CantProceed-Prompt-Help1 and Help2 Added "that" to text of Message Number 10407	Sean Stallings VZB
29 Feb 08	2.25	1.0	Added more detailed privacy statement to 1.1.5 Business rules	Sean Stallings VZB
15 April 08	2.26	1.0	Updated Module 1030, message 10303, reduced pause to 1 second. Updated Module 1500, reduced 3 second silence to 1 second.	Sean Stallings VZB
21 April 08	2.26	1.0	Updated footer to the correct UI version 2.26 Updated [silence] message numbers to reflect correct numbering system	Becky Stallings, VzB
05 May 08	2.27	1.0	Updated Section 1.1.5 Business Rules, removed wording regarding privacy statements in other applications. Added Privacy statement to Global Behavior chapter.	Sean Stallings VZB

26 August 08	2.28	1.0	Highlighted Barge-in changes in pink For BBN Findings Effort: <ol style="list-style-type: none"> 1. Updated module 1032, simplified wording for message 10323 2. Updated module 1040, simplified wording for message 10403 3. Updated Module 1050, simplified wording for message 10503 4. Updated module 1060, simplified wording for message 10603 5. Updated module 1070, simplified wording for message 10703 6. Updated module 1090, simplified wording for message 10903 	Sean Stallings VZB
05 September 08	2.29	1.0	Updated Module 1032, corrected wording for Retry 2, incorrect prompt had been changed for BBN Findings Effort.	Sean Stallings VZB
09 September 08	2.30	1.0	Updated modules 1032, 1040, 1050, 1060, 1070, 1090, 1100, 1105, 1110, 1130, 1140, 1370, 1510, 2211. Updated all retry 1 and retry prompts, [Global Default] tag now shows before the wording for each prompt – this resolves ticket 22304.	Sean Stallings VZB
16 September 08	2.31	1.0	Highlighted BBN Findings changes in Green Added Verizon proprietary statement to title page and page headers.	Sean Stallings VZB
01 December 08	2.32	1.0	COADD/BEVE-MRC Tuning 2 Effort-Recommendations From Nuance <ol style="list-style-type: none"> 1) Updated module 1060, added state and territory to vocabulary for Yes. 2) Updated module 1510, added representative, customer service, and [I have a] question to the vocabulary for Agent. 	Sean Stallings VZB
02 February 09	2.33	1.0	Updated Header	Sean Stallings VZB
21, May 09	2.34	1.0	FOAP Effort Updated section 4.5 Global Command and Global Prompts, added documentation to show that 'main menu' requests only route to module 2212 in COA-DD Global. In all other COA-DD applications 'main menu' will route to Main Menu module 1100. Updated module PP 2212, added flag check and routing for FOAP condition. Removed all highlights and struck through text for previous efforts.	Sean Stallings VZB
25 June 09	2.34.1	1.0	Added a hyperlink to DM 1100. Corrected typographical errors in DM's 1038, 1040, 1050, 1130, 1140, 1370 and 2212.	Kim Rothlis VzB
31 July 2009	2.34.2	1.0	DM 1510 :Updated the Action field for 'agent' to reflect current logic. DM 1140 : Updated the Action field for 'agent to reflect current logic. DM 2112: Updated the Action field for 'Condition 1' to reflect current logic.

Chapter 5: Background and Motivation

The Social Security Administration serves callers currently receiving benefits as well as the general population with self-service and informational assistance. SSA is looking for ways to improve self-service options for both calling populations. Existing self-service options are currently available from the SSA web site or via the SSA N8NN telephone interface. SSA would like to enhance the telephone based self-service options to include advanced speech with a real-time request processing. The self-service functions contained within the scope of this project are 1) Change of Address, and 2) Set-up or change of Direct Deposit.

5.1 Executive Summary

5.1.1 What the application does

The Change of Address / Direct Deposit application enables callers who are receiving Social Security benefits to change their mailing address and set up or change direct deposit of benefits to a bank account.

5.1.2 Social Security Administration's goals

Primary goals of the speech application are to:

- Provide universal access to the SSA's automated services by providing an access channel for callers including the visually impaired.
- Offer real-time handling of change-of-address and direct-deposit requests without needing to transcribe information collected by the existing automated Touch Tone system. Doing so will eliminate transcription time and transcription errors, as well as minimize the time lag between callers making the request and transcription of the request.

One business objective for the speech application is cost reduction. Automating calls and minimizing the number of calls to SSA agents is the primary mechanism towards this goal. As such, the application will be implemented in a way to streamline and automate requests.

5.1.3 Callers' goals

Callers are seeking simple self service.

5.1.4 Caller profiles

Callers who receive benefits are either retired or disabled.

5.1.5 Business rules

The privacy of caller's personal information must be protected. Caller identity must be verified before allowing changes to information that determines where benefit checks are sent.

5.2 Aesthetics

Jill converses with caller in a clean yet informal, role-appropriate female voice. She is friendly, competent and resourceful. Even when she's unable to complete a caller's request, she usually provides helpful suggestions on how they can proceed.

Chapter 6: About the Callers

Caller characteristics are believed to be mostly similar to those described in the UI specification for the BEVE-MRC application that is Phase 1 of the call automation project. Those characteristics are incorporated here by reference.

SSA anticipated that the number of repeat callers will be higher for the Change-of-Address function due to callers who spend time in two or more locations each year, such as living in Florida for the winter and a northern state for the summer. For this reason, this application needs to encourage callers to set up and use a Personal Identification Number (PIN) so that they can avoid the lengthy verification process on each call.

Chapter 7: Call Examples

Callers arrive at this portion of the system by navigating through the N8NN main menu system. This can take a minute or more of DTMF interactions. The design of the interactions should accommodate this change in interaction style between the DTMF portion of the larger system and the “conversational” nature of the Speech Application. This may be accomplished through audio iconography, signposting and prompt text.

Callers have explicitly chosen the self service route, and are transferred to the speech system AFTER choosing either the “change of address” or “direct deposit” path. The Speech system will receive a flag signifying the task the caller is attempting to complete. For both functions, caller identity must first be verified using either a social security number (SSN) plus password, or SSN plus several items of personal information such as mother’s maiden name.

The sample calls shown here are an early draft and do not necessarily reflect the current call flow or wording. Sample calls will be updated at a later time.

7.1 Sample Call Design Considerations

7.1.1 Verboseness

Jill’s audio and prompts are designed to accommodate the vast majority of callers whose VUI experience is either limited or perhaps nonexistent. The verbiage is designed to convey a clear mental model of how Jill behaves and what her capabilities are. This subtly helps callers remember to avoid chatty responses.

7.1.2 Confirmation Strategy

All of the actual data elements need to be confirmed at some point. Where possible confirmations are grouped, as with full name and full address so that with high-confidence recognitions, callers hear only one confirmation. Where confidence is lower, or where an item isn’t part of a logical group, individual data items are confirmed.

7.1.3 Longevity

Since callers aren’t expected to use the system frequently (say twice a year at most), Jill is slightly biased towards relatively severe hand-holding to minimize the number of callers who opt for a live agent. Jill doesn’t advertising operator assistance, though she will eventually recommend it as a path of last resort.

7.2 Call #1: Abbreviated knowledge base auth plus change of address, no problems

This example shows what the call flow *could* be if we're allowed to ask fewer questions for verification. The present client requirement is to ask all of the questions shown in Call 2, but there's a chance they'll be able to relax that requirement to the subset shown here.

prompt ID	prompt text
CallOne0010	[Leisurely pace, not too fast.] Hello! You've reached the automated Change of Address service. I'll be asking you several questions, and you can SPEAK your answers. Just be sure to speak clearly and loud enough for me to hear over the phone. Note that this call may be monitored or recorded for quality assurance purposes.
CallOne0015	If you've gotten to the wrong place, or you change your mind about proceeding, you can say * Main Menu * at any time. And if you have a question about anything I ask you, you can say * Question * at any time. <2 sec pause> OK, let's get started. First I have to ask a few questions to see whether you can use this automated service.
CallOne0020	Are you currently receiving Social Security disability, retirement, or survivor benefits? Yes or no.
CallOne0030	Yes.
CallOne0040	OK. And are you also receiving S S I or supplemental security insurance payments? Yes or no.
CallOne0050	No.
CallOne0060	Alright. Are you currently residing in a state or territory of the United States?
CallOne0070	Yes.
CallOne0080	Good. Is the change you're calling about for your OWN benefit or payment?
CallOne0090	Yes.
CallOne0100	Alright. Now, let's see what we need to update. Please say Change My Address, Change My Phone Number, or Change Both.
CallOne0110	Change address.
CallOne0120	OK, I can help you with that.
CallOne0130	Do you have a password that was issued to you by the Social Security Administration? Yes or No. <4 sec pause> If you aren't sure, just say NO and we'll go on.
CallOne0140	No.

CallOne0150	That's OK. Before I can make any changes, I'll need to ask you some questions to verify who you are. There are just four questions so it won't take long. You'll need to know your social security number, and the zip code of your new address. Do you have both of those numbers handy?
CallOne0160	Yes.
CallOne0170	Great. What's your social security number?
CallOne0180	<i>One two three, four five, four three two one.</i>
CallOne0190	So that's * one * two * three *** four * five *** four * three * two * one. Is that correct?
CallOne0200	Yes.
CallOne0210	Now I need your full name.
CallOne0220	Let's start with your last name. Please say and spell your last name. For example, if your last name was Kusack, you'd say "Kusack spelled K U S A C K."
CallOne0230	<i>Jones spelled J O N E S.</i>
CallOne0240	And now let me get your first name including spelling.
CallOne0250	<i>Christine spelled C H R I S T I N E.</i>
CallOne0260	Let me read that back. Last name * Jones * spelled * J O N E S. First name * Christine * spelled * C H R I S T I N E. Did I get that right?
CallOne0270	Yes.
CallOne0280	Next I need to know your date of birth with month, day, and year, such as January fifth, nineteen thirty five. What's your date of birth?
CallOne0290	<i>December twenty fifth nineteen thirty nine.</i>
CallOne0300	That's * December * twenty fifth * nineteen thirty nine. Is that correct?
CallOne0310	Yes.
CallOne0320	Got it. Hold on while I check our database. It may take a few seconds. <4 sec pause> OK, everything checks out. Now let's get on to your address change.
CallOne0330	I need to know the effective date for this change. You can say Immediately, or say a specific date in the next three months.
CallOne0340	<i>Immediately.</i>
CallOne0350	Got it. Now for the new address, ...
CallOne0360	I need to get the zip code first so I can look up the city and state. Please say the five-digit zip code now.
CallOne0370	<i>Oh two one three eight.</i>

CallOne0380	OK, I got the city and state information from your zip code. Now I need just your street address, P. O. Box, or rural route number. For example, you could say 1 2 3 Main Street West, or P. O. Box 1 2 3 4 5. Go ahead and say your address.
CallOne0390	<i>Eleven Garden Street</i>
CallOne0400	If there's an apartment number, please say it now. Otherwise, just say No Apartment.
CallOne0410	<i>No apartment.</i>
CallOne0420	Let me make sure I've got it right. I have * Eleven * Garden Street * Cambridge * Massachusetts * zero two one three eight. Is that correct?
CallOne0430	<i>Yes.</i>
CallOne0440	Hold on while I send your information. This may take a few seconds. <4 sec pause> OK, the update was accepted. Your information change has been sent for processing which may take up to three business days, and you won't be able to make any other changes during that time. As you requested, this change will be effective on * December * third * two thousand four.
CallOne0450	If there's anything else we can do for you, I can either put you back at the main menu, or transfer you to an agent. If you're finished, you can just hang up. So, Main Menu, Agent, or Goodbye?
CallOne0460	<i>Goodbye.</i>
CallOne0470	Thank you. Goodbye.

7.3 Call #2: Full knowledge base auth plus change of address, lots of confirmations

This example shows how lengthy a call could be with all the verification questions and trouble understanding the caller.

prompt ID	prompt text
CallTwo0010	[Leisurely pace, not too fast.] Hello! You've reached the automated Change of Address service. I'll be asking you several questions, and you can SPEAK your answers. Just be sure to speak clearly and loud enough for me to hear over the phone. Note that this call may be monitored or recorded for quality assurance purposes.
CallTwo0015	If you've gotten to the wrong place, or you change your mind about proceeding, you can say * Main Menu * at any time. And if you have a question about anything I ask you, you can say * Question * at any time. <2 sec pause> OK, let's get started. First I have to ask a few questions to see whether you can use this automated service.
CallTwo0020	Are you currently receiving Social Security disability, retirement, or survivor benefits? Yes or no.
CallTwo0030	<i>(something mumbled)</i>
CallTwo0040	Sorry, I didn't hear you. I need to know whether you're currently receiving Social Security benefits in the form of a check or direct deposit. Please speak clearly and say Yes or No.
CallTwo0050	<i>Yes.</i>
CallTwo0080	OK. And are you also receiving S S I or supplemental security insurance payments? Yes or no.
CallTwo0090	<i>No.</i>
CallTwo0100	Are you currently residing in a state or territory of the United States? Yes or no.
CallTwo0110	<i>Yes.</i>
CallTwo0120	Is the change you're calling about for your OWN benefit or payment?
CallTwo0130	<i>Yes.</i>
CallTwo0140	Alright. Now, let's see what we need to update. Please say Change My Address, Change My Phone Number, or Change Both.
CallTwo0150	<i>Well, I moved so I guess I need to change everything.</i>
CallTwo0160	I'm sorry, I didn't understand you. I only understand certain words, so let's try again. You can say Change My Address. Or you can say Change My Phone Number. Or, Change Both.
CallTwo0170	<i>Change both.</i>
CallTwo0180	OK, I can help you with that.

CallTwo0190	Do you have a seven-digit password that was issued to you by the Social Security Administration? Yes or No. <4 sec pause> If you aren't sure, just say NO and we'll go on.
CallTwo0200	<i>What?</i>
CallTwo0210	I'm sorry, I didn't understand you. If you have a seven-digit password that was mailed to you by the Social Security Administration, say YES. If you don't have a password, or you aren't sure, just say NO and we'll go on. <4 sec pause> Yes or No.
CallTwo0220	<i>No.</i>
CallTwo0230	That's OK. Before I can make any changes, I'll need to ask you some questions to verify who you are. There are eight questions and it'll take a couple of minutes to go through them. In addition to questions about your name and date and place of birth, you'll need to know your social security number, the dollar amount of your last benefit payment, and the zip code of your new address. Do you have all of those numbers handy?
CallTwo0240	<i>I think so.</i>
CallTwo0250	I'm sorry, I didn't understand you. If you have your social security number, the amount of your last benefit payment, AND your new zip code with you right now, please say YES. Otherwise, say NO.
CallTwo0260	<i>Yes.</i>
CallTwo0270	Great. What's your social security number?
CallTwo0280	<i>One two three, four five, four three two one.</i>
CallTwo0290	So that's * one * two * three *** four * five *** five * three * two * one. Is that correct?
CallTwo0300	<i>No.</i>
CallTwo0310	Sorry, my mistake. Let's try again. Please say your social security number, or enter it on your telephone keypad.
CallTwo0320	<i>One two three, four five, four three two one.</i>
CallTwo0330	So that's * one * two * three *** four * five *** four * three * two * one. Is that correct?
CallTwo0340	<i>Yeah.</i>
CallTwo0350	Sorry. Did I get the number correct? Yes or No.
CallTwo0360	<i>YES!</i>
CallTwo0370	Thank you. Now I need your full name.
CallTwo0380	Let's start with your last name. Please say and spell your last name. For example, if your last name was Kusack, you'd say "Kusack spelled K U S A C K.
CallTwo0390	<i>Smyth spelled S M Y T H.</i>
CallTwo0400	I think you said * Smith * spelled * S M I T H. Is that correct?

<i>CallTwo0410</i>	<i>No.</i>
<i>CallTwo0420</i>	<i>Sorry, just spell your last name for me.</i>
<i>CallTwo0430</i>	<i>S M Y T H.</i>
<i>CallTwo0440</i>	<i>I think you said * Smyth * spelled * S M Y T H. Is that correct.</i>
<i>CallTwo0450</i>	<i>Yes.</i>
<i>CallTwo0460</i>	<i>And now let me get your first name including spelling.</i>
<i>CallTwo0470</i>	<i>Dauida spelled D A V I D A.</i>
<i>CallTwo0480</i>	<i>I think you said Dauida spelled D A V I D A. Is that correct?</i>
<i>CallTwo0490</i>	<i>Yes.</i>
<i>CallTwo0500</i>	<i>Let me read that back. Last name * Smyth * spelled * S M Y T H. First name * Dauida * spelled * D A V I D A. Did I get that right?</i>
<i>CallTwo0510</i>	<i>Yes.</i>
<i>CallTwo0520</i>	<i>Good. Some people have another last name that is associated with their social security account, such as a maiden name or a professional name. Do you have an ALTERNATE last name? Yes or no?</i>
<i>CallTwo0530</i>	<i>Yes, Jones.</i>
<i>CallTwo0540</i>	<i>Please say and spell your other last name.</i>
<i>CallTwo0550</i>	<i>Jones spelled J O N E S.</i>
<i>CallTwo0560</i>	<i>Let me read that back. That's * Jones * spelled * J O N E S. Did I get that right?</i>
<i>CallTwo0570</i>	<i>Yes.</i>
<i>CallTwo0580</i>	<i>Next I need to know your date of birth with month, day, and year, such as January fifth, nineteen thirty five. What's your date of birth?</i>
<i>CallTwo0590</i>	<i>December twenty fifth, nineteen oh nine.</i>
<i>CallTwo0600</i>	<i>That's * December * twenty fifth * nineteen oh five. Is that correct?</i>
<i>CallTwo0610</i>	<i>No, it's nineteen oh NINE.</i>
<i>CallTwo0620</i>	<i>Sorry, my mistake. Please say your full date of birth one more time.</i>
<i>CallTwo0630</i>	<i>December twenty fifth nineteen oh nine.</i>
<i>CallTwo0640</i>	<i>That's * December * twenty fifth * nineteen oh nine. Is that correct?</i>
<i>CallTwo0650</i>	<i>Yes.</i>
<i>CallTwo0660</i>	<i>I also have to ask your mother's maiden name.</i>
<i>CallTwo0670</i>	<i>Please say and spell your mother's maiden last name.</i>
<i>CallTwo0680</i>	<i>Schwartz spelled S C H W A R T Z.</i>
<i>CallTwo0690</i>	<i>Let me read that back. That's * Schwartz * spelled S C H W A R T Z. Did I get that right?</i>

<i>CallTwo0700</i>	<i>Yes.</i>
<i>CallTwo0710</i>	<i>Got it. Only two more questions and you'll be verified.</i>
<i>CallTwo0720</i>	<i>I need to know where you were born. Please say the name of the STATE or territory where you were born, or say OTHER if it wasn't a state or territory.</i>
<i>CallTwo0730</i>	<i>North Dakota.</i>
<i>CallTwo0740</i>	<i>I think you said * South Dakota. Is that correct?</i>
<i>CallTwo0750</i>	<i>No, north.</i>
<i>CallTwo0760</i>	<i>Sorry, my mistake. Please tell me the state or territory again.</i>
<i>CallTwo0770</i>	<i>NORTH Dakota.</i>
<i>CallTwo0780</i>	<i>I think you said * North Dakota. Is that correct?</i>
<i>CallTwo0790</i>	<i>Yes.</i>
<i>CallTwo0800</i>	<i>One last question. What was the amount of the last benefit payment you received in dollars and cents?</i>
<i>CallTwo0810</i>	<i>One forty seven fifty three.</i>
<i>CallTwo0820</i>	<i>I'm sorry, I didn't understand that. Please say the amount as dollars and cents, such as one hundred twenty nine DOLLARS and thirty seven CENTS.</i>
<i>CallTwo0830</i>	<i>One hundred forty seven dollars and fifty three cents.</i>
<i>CallTwo0840</i>	<i>I think you said * one * hundred * forty seven * dollars and * fifty three * cents. Is that correct?</i>
<i>CallTwo0850</i>	<i>Yes.</i>
<i>CallTwo0860</i>	<i>Got it. Hold on while I check our database. It may take a few seconds. <4 sec pause> OK, everything checks out. Now let's get on to your address change.</i>
<i>CallTwo0870</i>	<i>I need to know the effective date for this change. You can say Immediately, or say a specific date in the next three months.</i>
<i>CallTwo0880</i>	<i>Immediately.</i>
<i>CallTwo0890</i>	<i>Got it. Now for the new address, ...</i>
<i>CallTwo0900</i>	<i>I need to get the zip code first so I can look up the city and state. Please say the five-digit zip code now.</i>
<i>CallTwo0910</i>	<i>Oh two one three eight.</i>
<i>CallTwo0920</i>	<i>Please say the five-digit zip code again, saying the digits one by one.</i>
<i>CallTwo0930</i>	<i>Oh. Two. One. Three. Eight.</i>
<i>CallTwo0940</i>	<i>OK, I got the city and state information from your zip code. Now I need just your street address, P. O. Box, or rural route number. For example, you could say 1 2 3 Main Street West, or P. O. Box 1 2 3 4 5. Go ahead and say your address.</i>

<i>CallTwo0950</i>	<i>Eleven Garden Street</i>
<i>CallTwo0960</i>	Sorry, I didn't understand that. I need your street address or P. O. box number. For example, you can say one twenty-four Belvedere Street, or P. O. Box 1 2 3 4 5. I also understand rural routes. Please say your address now.
<i>CallTwo0970</i>	<i>Eleven. Garden. Street.</i>
<i>CallTwo0980</i>	I think you said * eleven * Garden Street. Is that correct?
<i>CallTwo0990</i>	<i>Yes.</i>
<i>CallTwo1000</i>	If there's an apartment number, please say it now. Otherwise, just say No Apartment.
<i>CallTwo1010</i>	<i>No apartment.</i>
<i>CallTwo1020</i>	Let me make sure I've got it right. I have * eleven * Garden Street * Cambridge * Massachusetts * zero two one three eight. Is that correct?
<i>CallTwo1030</i>	<i>Yes.</i>
<i>CallTwo1040</i>	Great! Hold on while I send your information. This may take a few seconds. <4 sec pause> OK, the update was accepted. Your information change has been sent for processing which may take up to three business days, and you won't be able to make any other changes during that time. As you requested, this change will be effective on * December * third * two thousand four.
<i>CallTwo1050</i>	If there's anything else we can do for you, I can either put you back at the main menu, or transfer you to an agent. If you're finished, you can just hang up. So, Main Menu, Agent, or Goodbye?
<i>CallTwo1060</i>	<i>G'Bye.</i>
<i>CallTwo1070</i>	I think you said Goodbye. Is that correct?
<i>CallTwo1080</i>	<i>YES!</i>
<i>CallTwo1090</i>	Thank you. Goodbye.

7.4 Call #3: Password plus direct deposit, no problems

This example shows how quick the flow could be if the caller has a password. It also shows an example of help.

prompt ID	prompt text
CallThree0010	[Leisurely pace, not too fast.] Hello! You've reached the automated Direct Deposit service. I'll be asking you several questions, and you can SPEAK your answers. Just be sure to speak clearly and loud enough for me to hear over the phone. Note that this call may be monitored or recorded for quality assurance purposes.
CallThree0020	If you've gotten to the wrong place, or you change your mind about proceeding, you can say * Main Menu * at any time. And if you have a question about anything I ask you, you can say * Question * at any time. <2 sec pause> OK, let's get started. First I have to ask a few questions to see whether you can use this automated service.
CallThree0030	Are you currently receiving Social Security disability, retirement, or survivor benefits? Yes or no.
CallThree0040	Yes.
CallThree0050	OK. And are you ALSO receiving S S I or supplemental security insurance payments?
CallThree0060	No.
CallThree0070	Alright. Are you currently residing in a state or territory of the United States? Yes or no.
CallThree0080	Yes.
CallThree0090	OK. Is the change you're calling about for your OWN benefit or payment?
CallThree0100	Yes.
CallThree0110	Good. Do you have a password that was issued to you by the Social Security Administration? Yes or No.
CallThree0120	Yes.
CallThree0130	Great, that'll make this much quicker.
CallThree0140	Before I can make any changes, I'll need to ask you a couple of questions to verify who you are. You'll need to know your social security number * your password * your bank account number * and the routing number for YOUR bank account, which you can get from one of your checks, or from your financial institution. Do you have all of those numbers handy?
CallThree0150	Yes.
CallThree0160	OK, here's the first question.. What's your social security number?
CallThree0170	One two three, four five, four three two one.

CallThree0180	So that's * one * two * three *** four * five *** four * three * two * one. Is that correct?
CallThree0190	Yes.
CallThree0200	What's your seven-digit password?
CallThree0210	Seven nine two oh oh six one.
CallThree0220	That's * seven nine two * zero zero * six one. Did I get it right?
CallThree0230	Yes.
CallThree0240	Got it. Hold on while I check our database. It may take a few seconds. <4 sec pause> OK, everything checks out.
CallThree0250	Now let's move on to your direct deposit information.
CallThree0260	For the account you want to use, are you the owner of the account?
CallThree0270	Yes.
CallThree0280	Good. Now tell me the type of account this is. Your choices are * Checking * Savings * Investment * or * Other.
CallThree0290	Checking.
CallThree0300	OK. I need to know the effective month for this change. Because of the lead time in processing checks, your choices are * January * February * or * March.
CallThree0310	February.
CallThree0320	Sure * February * is fine.
CallThree0330	Now, you'll need to know two numbers that you can find on the bottom of a check, or you can get them from your financial institution. The first is a nine-digit bank routing number. <1 sec pause> The second is your personal account number. <1 sec pause> If you have these numbers, say I Have The Numbers. Otherwise say More Information.
CallThree0340	More information.
CallThree0350	Sure, here's a bit more information about those numbers. The bank routing number is exactly nine digits and is printed on the bottom of each check in between two marks that look like a vertical bar followed by a colon.
CallThree0360	Your account number is some number of digits ending with a symbol that looks like two vertical bars followed by a square dot. Don't confuse your ACCOUNT number with your CHECK number that is both at the bottom and at the top right of your check.
CallThree0370	If you don't have these numbers, you'll need to get them from your financial institution before we can set up or change direct deposit. If you DO have the numbers now, say I Have The Numbers.

CallThree0380	If you need to speak with an agent, say Agent. If you'd like to do something else, say Main Menu. If you want to call again later, say Goodbye or just hang up. To hear this information again, say More Information.
CallThree0390	<i>I have the numbers.</i>
CallThree0400	Great. What's the nine-digit bank routing number?
CallThree0410	<i>One two four seven zero two six four four.</i>
CallThree0420	That's * one two four * seven zero * two six * four four. Is that correct?
CallThree0430	<i>Yes.</i>
CallThree0440	Got it. And what's your account number?
CallThree0450	<i>Seven six five four three two.</i>
CallThree0460	That's * seven * six * five *** four * three * two. Is that correct?
CallThree0470	<i>Yes.</i>
CallThree0480	Alright. Hold on while I send your information. This may take a few seconds. <4 sec pause> OK, the update was accepted. Your information change has been sent for processing which may take up to three business days, and you won't be able to make any other changes during that time. This change will be effective with your * February * benefit payment.
CallThree0490	If there's anything else we can do for you, I can either put you back at the main menu, or transfer you to an agent. If you're finished, you can just hang up. So, Main Menu, Agent, or Goodbye?
CallThree0500	<i>Goodbye.</i>
CallThree0510	Thank you. Goodbye.

Chapter 8: Global Behavior

8.1 Time-outs and Retries

While the retry prompts are specified in the DialogModule tables, they are to be preceded by the appropriate apology prefix as outlined below:

Retry 1 & 2	IF retry 1	Message Number 00110	upon rejection of speech	apology_re1	I'm sorry, I didn't understand you.
		Message Number 00111	upon rejection of speech		My mistake.
	IF retry 2	Message Number 00112	upon confirmation	apology_re2	I'm sorry, I still didn't understand you.
		Message Number 00113	upon rejection of speech	apology_re2_	My mistake again.
			upon confirmation	[...]	<retry prompt(s) specified in DialogModule table>

Note that Timeout prefixes for the *collection* phase (rejection of speech) are included as part of the Timeout prompts in each DM, whereas Timeout prefixes for the *confirmation* phase are usually not specified in the DM tables.

Timeout 1		apology_to1	I'm sorry, I didn't hear anything.
Timeout 2		apology_to2	I'm sorry, I still didn't hear anything.

Max. timeout is globally set to 2 – exceptions will be indicated in the tables.

Max. retry is globally set to 2 – exceptions will be indicated in the tables.

When either max timeouts or max retries is reached, transfer to the DM indicated for this purpose.

8.2 Privacy

No information collected in this application is considered sensitive.

8.3 System Timeout

In addition to the regular timeouts, there is also a global *System Timeout*, set to a specific number of minutes. If the duration of one call exceeds this System Timeout, the call-flow will be interrupted with the prompt below to inform the caller that the maximum amount of time for the call duration has been exceeded. After the playout of this prompt, the call will be terminated. (This also means that *barge-in* is OFF during the play-out of these prompts, since there is no recognition state following.)

System Timeout	Message Number	Time Limit	System Timeout message	
	00114	15 minutes	system_timeout_a	I'm sorry to interrupt, but it looks like you're having trouble since we've been on this call for more than ...
	[CPR]		<system-timeout in minutes> e.g. "...30..."	
00115	system_timeout_b		...minutes. I'll need to hang up now. You might want to call back and ask to speak with an agent. Good bye.	

8.4 Help prompts

Unless otherwise specified by the DialogModule table, the default behavior will always be to 're-enter' the DialogModule directly after the Help prompt has played, so the application will listen for the input again. It does this while resetting any timeout and retry counters, thus as if it were the initial try, but *without playing the initial prompt again*. This is because the prompt for the input will be contained *in the Help prompt itself*, perhaps with a slightly different verbiage.

In summary:

- 1) Play Help prompt(s) specified in the UI table
- 2) Unless otherwise specified in the table, re-enter the same state to listen for caller input
- 3) Do *not* play the initial prompt of this state after the Help prompt

Important note: caller can barge-in on the Help prompt (unless otherwise specified by the table) which will cause the Help prompt to immediately *stop* playing and the recognizer to parse the caller's input according to the vocabulary of the state following the Help prompt (this state typically is the same state). While the caller can start speaking before the end of the Help prompt, the *beginning_of_speech* timer will not start until the Help prompt has finished playing (which is the same behavior as with any other prompt played that callers can barge-in on).

Note well that *Help* is an historical term for assistance to callers. The word "help" is specifically *not* included in the grammars because as a single-syllable global command it causes too many recognition problems. Callers are advised that they can say "more information" and there are other synonyms listed in the global table. There is also evidence

from usability studies that callers are more likely to make use of a neutral term such as “more information” that does not make them feel inadequate by asking for help.

8.5 Global Commands and Global Prompts

Global Commands Vocabulary

Speech Input				
This table specifies the global commands that can be spoken from anywhere in the application. The application behavior upon these commands is always the same, unless the DialogModule specifically overrides the global behavior.				
Application	Commands	DTMF	Action (unless re-specified by the module)	Confirm.
All	Question [I] don't know [it] (but downweight this one in the grammar) More information NOTE: "Help" is NOT in this grammar, nor in any grammar for this application unless specifically noted for a single DM table.	*	First play the Help prompt as specified for the module, then wait for input again. (New prompt for input will be part of each Help message.)	Never
All	Agent (Refer to the N8NN UI spec for the grammar for agent synonyms.) Tuning 4 recommends "tightening" the agent grammar so that phrases without verbs are not included. A new Agent grammar will be supplied for use in both N8NN and COA-DD.	0	Go to: 2100-AfterHours-Check	Always
COA-DD Global	Main menu [please]	9	Go to: 2212-ThanksBeforeReturn-Msg	If necessary
Direct Deposit, Password Auth, Knowledge Based Auth, Change of Address	Main menu [please]	9	Go to: N8NN Main Menu module 1100-Main-DM	If necessary
Confirmation prompts				
Option	Name	Wording		
Operator	gl_conf_operator	[I think you said] you want to talk to an agent. [Is that correct?]		
Main menu	gl_conf_mainmenu	[I think you said] you want to return to the Main Menu. [Is that correct?]		
Developer Notes				
<p>NOTE ON GOODBYE: Recent wisdom among UI designers is that Goodbye is seldom used by callers and therefore only causes recognition problems. We have traditionally included Goodbye because some callers like the closure it seems to provide. However, the usability data we've accumulated suggests that it causes more problems than it solves. Therefore, we propose to remove Goodbye from this application, and simply offer callers the option of hanging up.</p>				

Table: Auxiliary Global Prompts

Generic Prompts	
Name	Wording
default_confirmation_initialprompt_part1	I think you said ...

default_confirmation_initialprompt_part2	Is that correct?
--	------------------

Table: Grammar Synonyms

In several places, synonyms are needed for common grammar items. This table lists the synonyms that should be defined.	
Basic grammar	Synonyms
yes	yeah, sure, correct, that's correct, yes ma'am, right, OK
no	nope, no that's not it, no that's not right, no ma'am, wrong

Note on Confirmation Grammars

The preceding requirement has been rescinded — tuning studies have shown that including “agent” synonyms in confirmation grammars catches too many utterances that are really statements of Yes or No. Also, including agent synonyms interferes with one-step correction where it is used. So agent synonyms should **not** be in confirmation grammars unless there is an explicit note otherwise.

8.6 DTMF Collection

8.6.1 Termination of digit strings using the pound sign

Any state prompting for input of which the DTMF equivalent is a digit string, such as the social security number, should accept the DTMF ‘pound’ sign as the immediate terminator of such a string. Naturally, this ‘pound’ sign should not be taken as part of the actual input or passed on as such to other parts of the application or any databases; it is merely an indicator that the digits before it form the complete numeric input.

Single-digit DTMF equivalents—such as ‘1’, ‘2’, ‘3’, etc. for menu options—do *not* allow a terminating character.

8.6.2 Invalid DTMF input should be rejected

Any input that does not match to a menu option or other command, or does not match to numeric input prompted for at that point, should be rejected by the application, and lead to the application entering a retry. For example, when a state has only four menu options with DTMF equivalents ‘1’ through ‘4’, we should enter a rejection if someone enters ‘5’ at that point. Another example would be a state asking for a sequence of digits: if someone provides DTMF input that contains an asterisk in the sequence, we should reject that input as well. (An alternative would be to go to *Help* in that situation, since ‘*’ is the DTMF equivalent for it, but it’s probably better to just reject digit-strings containing an ‘*’.) As outlined in the paragraph 8.6.1 “Termination of digit strings using the pound sign“ above, the DTMF ‘pound’ sign should be accepted as a valid terminator of digit strings.

Please note that DTMF equivalents of global commands should always be accepted, even if they are not explicitly offered by any of the prompts in a given state. Examples of these are the 'star' sign for *Help* and '0' for an *Associate*.

8.6.3 End-of-DTMF timeout

The application's response time to DTMF input should always be as short as possible, but will depend at any point on whether the DTMF input given so far in a particular state is either clearly *unfinished*, or is *ambiguous*.

An example of clearly unfinished DTMF input would be a caller having entered '1' in a state where digit strings of various lengths can be collected, with the shortest input being a single digit. In this situation we give the caller *n* seconds to enter the remainder of a possible multi-digit string, where *n* is specified by some *inter-digit timeout* parameter. After each non-final digit entered by the caller, a countdown will start with a duration indicated by this parameter. If the countdown runs out before the caller has entered the next necessary digit, the application will go into a rejection.

Once the caller has entered the number of digits required to make the input complete—which is 9 digits in the case of an SSN, or 10 digits in case of a US phone number including area code—the application could take that input immediately and parse it, without running the countdown again. However, because the caller may enter the '#' sign to terminate the string, we will look at two variables to determine whether or not we indeed terminate the digit string based upon satisfaction of the number of digits alone:

- 1) *Fixed-length versus not-fixed-length digit strings*. If the expected digit-string is of a fixed length, then we can terminate the string as soon as we have reached the correct number of digits. If its length varies, then we cannot, unless we have reached the maximum allowable length.
- 2) *Next state being a collection state or not*. If the next state in the application is another collection state, and we are *not* using an *inter-digit timeout* after the last digit in a fixed-length or maximum-length string, then we run the risk that any '#' terminator entered by the caller will *not* get detected until the application has moved on to that next collection state. We do not have this risk if the next state is *not listening for input*, for example a database hit, or a play-message with *barge-in* turned off. Only where necessary, we eliminate this risk by using the *inter-digit timeout* even after the last digit of fixed-length or maximum-length string.

In short: we will terminate finished fixed-length and maximum length digit-strings *immediately* when the next state is *not listening for input*, and when the next state is a *collection state*, then for the maximum duration of the *inter-digit timeout* we will wait for a possible '#' terminator. When a '#' terminator is detected, we also *immediately* terminate the string.

Unfinished DTMF input can be ambiguous. This is the case when the digit(s) entered so far can be interpreted as *complete input* for other options or other numeric input. While the input could be considered complete under one interpretation it is *incomplete* under another interpretation, e.g. someone entered a '0' as the first digit of their Social Security Number, but '0' is also used to request an Associate. In this situation too, we use the *inter-digit timeout* to wait for possible further input, unless we have reached the maximum length.

8.6.4 Key-ahead

In any case, when we know that DTMF input is complete for a given context, the application should respond immediately and not run a end-of-DTMF-input countdown. If we were to introduce such a delay after each complete DTMF input, then we would seriously hinder the ability of power-users to comfortably 'key-ahead' through menus.

The so-called 'key-ahead' feature automatically works because of the zero-length timeout upon unambiguous DTMF input. As soon as the caller hits one of the numbers on the keypad to choose a menu option, the application takes that digit and moves to the next state accordingly. If that response to the DTMF input takes a fraction of a second and the next state is a collection state again, then this next state will automatically take the next digit if it is a voice menu, or the next sequence of digits if it is expecting a digit string. If the next state was a database hit instead, for example, then no input will be accepted during the database hit (because the app is not listening for anything), and once the application returns to a collection state, further input is listened for from then on. This means that if that database hit happened to have sub-zero response time, the user could have run right over it using 'key-ahead' and never noticed anything. No key-ahead is possible over database hits that need more time, or over play-states that have barge-in turned off. Naturally, over states expecting variable-length digit-string input, 'key-ahead' can only be achieved by using the '#' terminator.

8.7 Digit-String Playback

Variable digit-strings to be presented to the caller will be passed through a global routine that builds prompt lists to fluently play back any kind of digit string: phone numbers, SSNs, credit card numbers, etc. Valid input to this function is a string of digits, where a hyphens and spaces can be used to indicate grouping. Examples of valid input are: "123456", "1-617-428-4444", "017-85-3229", "4356 8900 0220 0392". For each hyphen or space, the routine will insert a pause. The prompt set to be used for this consists of the following 1,231 prompts:

- 1,000 prompts: "...0 0 0, ..." through "...9 9 9, ..." (Non-final intonation)
- 100 prompts: "...0 0, ..." through "...9 9, ..." (Non-final intonation)
- 100 prompts: "...0 0." through "...9 9." (Final intonation)
- 10 prompts: "0..." through "9..." (Rising intonation)
- 10 prompts: "...0, ..." through "...9, ..." (Non-final intonation)
- 10 prompts: "...0." through "...9." (Final intonation)
- 1 prompt: 1/4 second silence.

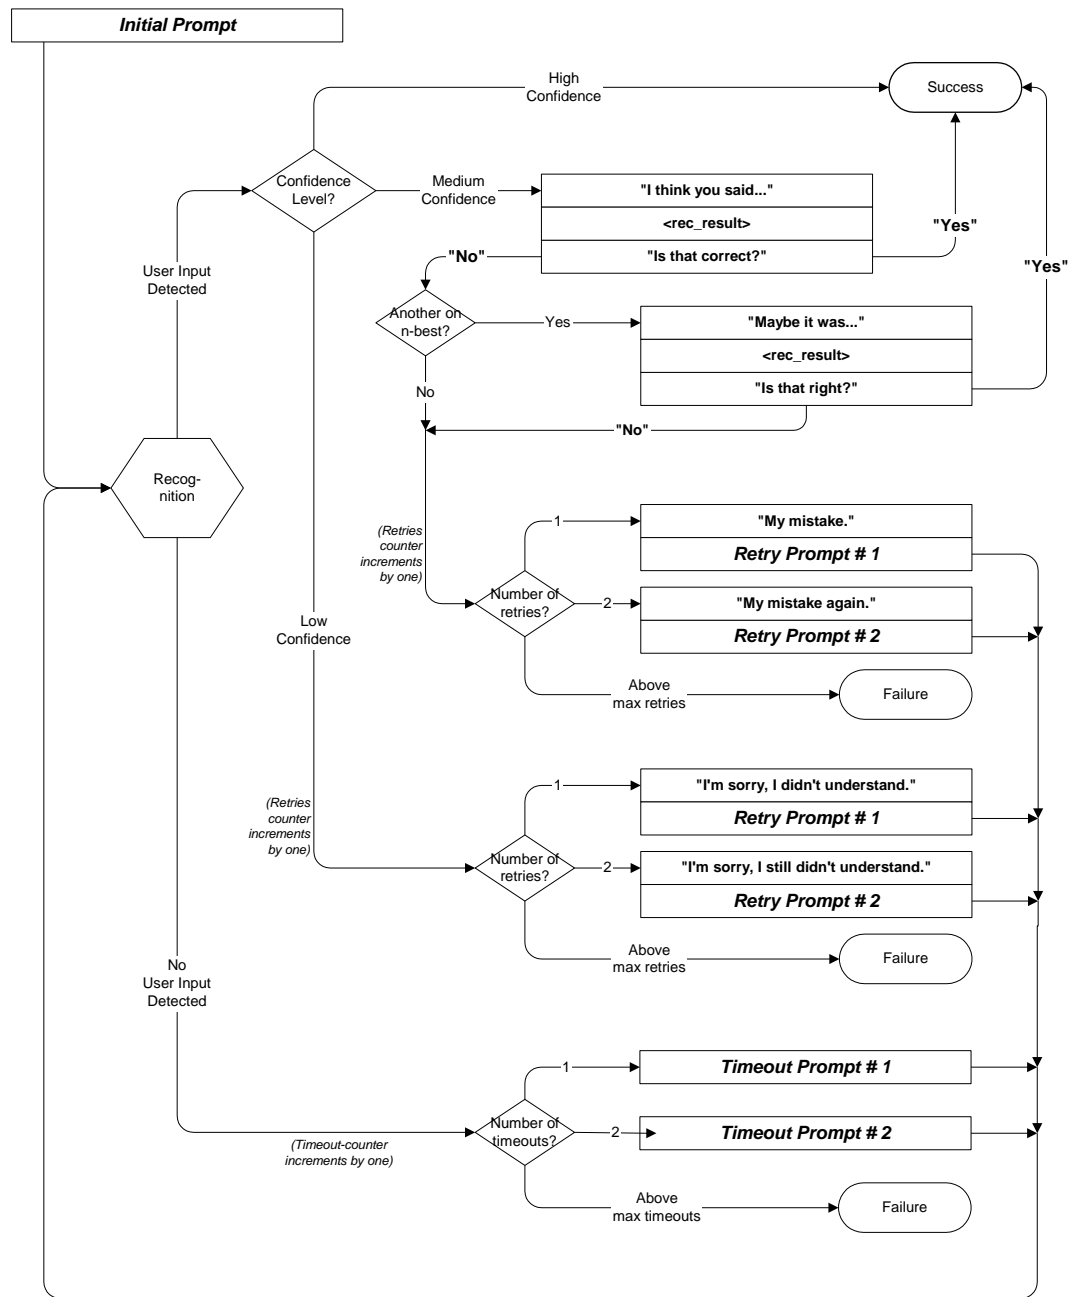

See <http://looknohands.com/digit-string-cpr/> for a demonstration of how the playout of various different kinds of strings is constructed using prompts from the sets listed above.

8.8 Event Logging

Throughout all the User Interface Specifications, each state calls out the event logging that is unique to that state. For an overview of all of Event Logging, including global behavior for events such as what to do if an info token is not available, see the Event Logging section in the Functional Requirements Specification document.

8.9 Internal DialogModule Functionality

This diagram shows the typical flow within a Dialog Module, including retry and timeout cases.

Chapter 9: Detailed Dialog Specification

9.1 How to Read the Call-Flow Tables

2100_Finance_Forex_Menu

Previous step of the dialog

Initial prompt: first prompt played when entering the module.

Item List

Dialog-Module type

Timeout 1 prompt: played when no response to initial.

Timeout 2 prompt: played when no response to first timeout.

Touch-tone equivalents for user input

Retry 1 prompt: played when no recognition result from first input.

Retry 2 prompt: played when no recognition result from input after first retry.

Help prompt: typically played when caller asks for help or instructions.

Touch-tone equivalents for global commands

System actions following on global commands

System actions following on user input

9.2 Call-Flow Tables

General note on prompt specification: Where there are two or more Initial prompts, all are played in sequence on entry to the DM. Likewise with multiple Help prompts – all are played in sequence when the caller says Question or presses star. In contrast, Retry1 and Retry2 are played individually on the first or second retry respectively, and similarly for Timeout1 and Timeout2. The Initial and Help prompts are broken into pieces to reduce problems with recording long prompts accurately, and also to avoid the voice talent gasping for breath. Note that if a caller says Question (or any synonym) repeatedly in the same DM, they hear the same sequence of help prompts each time. There is presently no upper limit on how many times a caller can say Question in a DM. There is, however, a limit on the total length of the call, as specified in section 8.2 above.

Prompts			
Message Number	Type	Name	Wording
11402	Initial	1140-GLB-HelpForCantDoThat-Prompt-Initial1	I'll try to explain it more. The function you requested, either change of address or setup of direct deposit, can be performed only by people who are currently receiving Social Security retirement, disability, or survivor benefit payments. If you don't meet this requirement, our agents can't help you with these functions either, because Social Security doesn't maintain address information for you in our files. If you've APPLIED to receive benefits and need to change your address, say Agent now and the agent will refer you to the office that has your pending claim. If you are neither receiving benefits nor have applied for benefits, but still need to change the address to which we send Social Security statements, you'll have to do that through the Internal Revenue Service. The easiest way to do that is just enter your new address on your tax return, but if you need to do it sooner, you can use IRS form 8-8-2-2, which you can get by calling 1-800-829-3676. [2 sec pause] If there's something else you need to do with Social Security, you can say Main Menu. If you're done, just hang up. To hear this message again, say More Information.
11403	Retry 1	1130-GLB-CantDoThat-Prompt-Retry1	[Global Default] Please say Main Menu, or just hang up.

Document History

<i>Date</i>	<i>Spec</i>	<i>App</i>	<i>Summary of Changes</i>	<i>Revised by</i>
01/10/05	1.0	1.0	Initial version.	Paul Sawyer
01/18/05	1.1	1.0	<p>Changes based on review and submitted comments:</p> <p>Advise callers up front about the types of accounts that are acceptable (6000 and 6010) and get them to confirm that they have such an account.</p> <p>Remove the "second chance" for account ownership (6020) since the new wording in 6000 and 6010 is more explicit.</p> <p>Remove "other" as an option for account type.</p> <p>Add keypad hints in more places. The general rule is to offer keypad hints in retry 2 and timeout 1 and 2.</p> <p>Add "as soon as possible" as an option for effective month, with a keypad alternative of 1.</p> <p>Remind callers that the bank routing number is usually the left-most number at the bottom of a check.</p> <p>Change final wording for both success (6210) and failure (6220). This wording may change — SSA is pondering it.</p>	Paul Sawyer
03/01/05	1.2	1.0	<p>Change 6130 to a Custom Context DM and use a list of valid routing numbers for the grammar. Delete 6140 and 6150 which are now obsolete.</p> <p>Revise prompt text that was changed during recording.</p>	Paul Sawyer
03/04/05	1.3	1.0	Revised Requirement IDs in 6000, 6030, 6110, 6170, 6200, 6210, 6220, 6300	Steven Ligi
03/11/05	2.0	1.0	<ol style="list-style-type: none"> 1. Inserted missing word "be" in 6000 prompt1. 2. Add spacer silence prompts to 6100, 6160. 	Paul Sawyer
04/11/05	2.1	1.0	<p>Changes following usability testing.</p> <ol style="list-style-type: none"> 1. Change prompts in 6130 to encourage callers to speak quickly. Also lengthen timeout values. 2. Remove the questions about whether caller has bank numbers, since we do it in Global. 6100, 6110, 6120. 3. Combine 6010 and 6040, ask only one question. 4. Change 6050 calculation of possible effective months, and warn about the ambiguity of ASAP. 	Paul Sawyer
04/22/05	2.2	1.0	<p>Changes following review.</p> <ol style="list-style-type: none"> 1. Mark 6100 as obsolete. (See item 2 in previous changes.) 2. Change text of 6210 Prompt1 to say it may not happen before next payment. 	Paul Sawyer

04/25/05	2.3	1.0	"Administrative" fixes to bugs found by Q/A.	Paul Sawyer
06/03/05	2.4	1.0	1. Clarify wording of confirmation prompt in 6160. Spec change only – no code change required. 2. Change 6130 (collection of bank routing number) to ALWAYS confirm, at request of SSA. This IS a code change.	Paul Sawyer
08/15/2005	2.5	1.0	In 6040, remove condition on playing success prompts, so that success prompts are always played. Code was already implemented this way. (Paul Sawyer) Change following tuning report recommendations (Nadine Ozkan): <ul style="list-style-type: none"> - Prompt changes are in red (style : Table: RevisedRecordings) - Other changes (grammar or confirmation play-back) are highlighted in yellow. 	Paul Sawyer & Nadine Ozkan
10/20/2005	2.6	1.0	Changes following second tuning, and other changes requested by SSA. (All previous revision marking and highlighting removed.) 1. Reword 6210-DD-Success-Prompt1 to discourage callers from calling back or calling a field office to verify that the change happened. 2. In 6050, specify that recognition grammar should include the current month and treat it the same as "as soon as possible".	Paul Sawyer
10/25/05	2.7	1.0	1. Change of policy from SSA: Change prompt 6210-DD-Success-Prompt1 to omit suggestion for following up by using Password Services. Just say it will "take about three business days." 2. Correct the explanation in 6050 regarding which month names are recognized and how they are mapped.	Paul Sawyer
2 Feb 06	2.8	1.0	Changes following Tuning 3: 1. Emphasize that double parsing should be avoided in 6040, 6160.	Paul Sawyer
21 Mar 06	2.9	1.0	Corrected wording of prompt 6050-DD-EffectiveMonth-Prompt-Help	Phil Profili
22 Aug 06	2.10	1.0	Changes resulting from Tuning 4. 1. 6040: Remove Agent from global grammar for this DM. Tweak prompt accordingly. 2. 6050: Remove Agent from global grammar for this DM. Tweak prompt accordingly. 3. 6130: Tweak prompts to clarify we need info for the NEW bank. Remove Agent synonyms from global grammar for this DM. Change confirmation to "if necessary". Tweak speech parameters. 4. 6160: Note concern that max speech duration may not be what is shown in this spec.	Paul Sawyer
29 Jan 07	2.11	1.0	Added message numbers to all prompts	Sean Stallings VZB
01 May 07	2.12	1.0	Updated 6210 per Nuances direction	Sean Stallings VZB
21 May 07	2.13	1.0	6050 updated, corrected minor typographical errors.	Sean Stallings VZB
22 Aug 07	2.14	1.0	Updated title and header	Sean Stallings VZB
06 Sep 07	2.15	1.0	Corrected number for message number 60536	Sean Stallings

			Removed default globals from retry 1 and retry 2 prompts	VZB
24 Oct 07	2.16	1.0	Added Global Behavior chapter. This was done to clarify the purpose of DM 6300-DDDMfailure-Msg	Sean Stallings VZB
29 Feb 08	2.17	1.0	Added privacy statement to Global Behavior chapter. Updated DM 6160, added note telling developer to set privacy flag to true.	Sean Stallings VZB
17 Apr 08	2.18	1.0	Updated Module 6160, reduced silence from 1 second to 2. Updated Module 6210, reduced silence from 1 second to 2.	Sean Stallings VZB
01 May 08	2.19	1.0	Added reporting strings to dialogue modules 6040, 6050, 6130, 6160.	Sean Stallings VZB
02 May 08	2.20	1.0	Corrected reporting strings in all dialogue modules, replaced KBPW with COAD. Updated module 6130; added confidentiality note to module notes.	Sean Stallings VZB
21 August 08	2.21	1.0	Highlighted Barge-in changes in pink	Sean Stallings VZB
16 September 08	2.22	1.0	Added Verizon proprietary statement to title page and all page headers.	Sean Stallings VZB
02 February 09	2.23	1.0	Updated Header	Sean Stallings VZB
21 May, 09	2.24	1.0	Updated Chapter 1: Introduction, reference to Global changed to COA-DD Global UI. Updated Chapter 2: Global Behavior, reference to Global changed to COA-DD Global UI. Updated modules 6000, 6030, 6210, 6220, 6300, references to Global changed to COA-DD Global UI. Added Chapter 3: Global Commands and Global Prompts, detailing global command exceptions for this application.	Sean Stallings VZB
25 Jun 09	2.24.1	1.0	Cover page update.	Kim Rothlis VzB

Chapter 10: Introduction

This document is one part of a set of documents that describe the user interface for the Social Security Administration (SSA) Change of Address (COA) and Direct Deposit (DD) application. This document describes only the interaction for **Direct Deposit (DD)**. The call flow has passed through initial introduction, caller qualification, and authentication (password or knowledge-based) before getting to this section.

Note that this entire section is jumped into from the global part of the application and returns to it. The only entry point to this section is the beginning DM, 6000. Exit from this section is by RETURN to COA-DD Global UI.

Chapter 11: Global Behavior

11.1 Privacy

Bank Account Number is considered confidential. The confidential flag should be set to true for all dialog modules collecting this information from the caller.

11.2 Time-outs and Retries

If callers reach maximum timeouts or retries they will be sent to [6300-DDDMfailure-Msg](#) and then routed back to COA-DD Global UI. For all other global behavior see chapter 4 in the Change of Address/Direct Deposit Global user interface document.

Chapter 12: Global Commands and Global Prompts

12.1 Global Commands

As per 4.5 Global Commands and Global Prompts section in COA-DD Global, 'Main Menu' global command will transfer to N8NN Main Menu module 1100-Main-DM.

Chapter 13: Detailed Dialog Specification

13.1 Call-Flow Tables

6000-IntroDD-Msg

Play Prompt			
Introduce caller on entry to the DD service.

6040-WhatType-VM

VoiceMenu DialogModule™ 				
Caller has a personally-owned bank account. Ask 'em what type it is.				
Entering from				
6000-IntroDD-Msg				
Prompts				
Message Numbers	Type / Name	Wording		
60401	6040-DD-WhatType-Prompt-Initial	So, tell me the type of account: Checking, Savings, or Investment. Or say Question, or I Don't Have One.		
60402	6040-DD-WhatType-Prompt-Retry1	Please say Checking, Savings, or Investment.		
60403	6040-DD-WhatType-Prompt-Retry2	Please say Checking or press one, Savings or press two, or Investment or press three. You can also say Question or press the star key.		
60404	6040-DD-WhatType-Prompt-Timeout1	I'm sorry, I didn't hear anything. Please say Checking or press one, Savings or press two, Investment or press three, or Question or press star.		
60405	6040-DD-WhatType-Prompt-Timeout2	I'm sorry, I still didn't hear anything. You can say Question or press star if you need more information.		
60407	6040-DD-WhatType-Prompt-Help	Here are a few details that may help. In order to set up direct deposit of your benefits to a bank or investment account, you must have a checking, savings, or investment account that you own. We can't deposit into other types of accounts, nor can we deposit into an account owned by someone else. I need to know the TYPE of account it is so that we and the bank are sure that we use the correct account. So please say Checking, or Savings, or Investment, or I Don't Have One.		
50394	6040-DD-WhatType-Prompt-Success	Got it.		
Option	Vocabulary	DTMF	Action	Confirm.
6040-DD-WhatType-Option-checking	[it's a] checking [account]	1	remember the value play Success prompt Go to: 6050-EffectiveMonth-VM	<i>If necessary</i>
6040-DD-WhatType-Option-savings	[it's a] savings [account]	2	remember the value play Success prompt Go to: 6050-EffectiveMonth-VM	<i>If necessary</i>
6040-DD-WhatType-Option-investment	[it's an] investment [account]	3	remember the value play Success prompt Go to: 6050-EffectiveMonth-VM	<i>If necessary</i>
6040-DD-WhatType-Option-DontHave	I don't have one	4	Go to: 6030-CantHelp-Msg	<i>if necessary</i>
	remove Agent synonyms from global grammar for this DM.			
Confirmation prompts				
Message Numbers	Option / Name	Wording		
60408	6040-DD-WhatType-ConfPrompt-checking	[I think you said] checking. [Is that correct?]		

60409	6040-DD-WhatType-ConfPrompt-savings	[I think you said] savings. [Is that correct?]
60410	6040-DD-WhatType-ConfPrompt-investment	[I think you said] investment. [Is that correct?]
60411	6040-DD-WhatType-ConfPrompt-DontHave	[I think you said] you don't have such an account. [Is that correct?]

DialogModule parameters	
Parameter	Value
6040-DD-WhatType-Parameter	
after_end_of_speech_timeout	1,000 ms
before_begin_of_speech_timeout	7,000 ms
allowing_barge_in	True

Event logging		
Record = U-COAD-DM_6040-(Call Duration at start),T-COAD-	0000 = Success	-Call duration at process end
	0001 = Error	
	0002 = Max No Input	
	0003 = Max No Match	
	0200 = Caller Hang Up	
	0303 = Max No Confirm	
	0304 = Max Help	
	0310 = Caller Requested Main Menu	
	0311 = Caller Requested Agent	

Developer notes

Bias the grammar toward "checking". Set the confidence threshold a little higher so we don't get false acceptances.

"One Step Correction" strategy should be available to the Caller (e.g., "No, checking") – This means both the collection grammar and the confirmation grammar are active during the confirmation phase. (This can be done as a parallel grammar.)

Set SWI_scoreDelta to +200 to increase bias towards utterance, -200 to decrease (downweight) bias towards utterance in grammar e.g. <item><tag>AGENT='agent'; SWI_scoreDelta=-200</tag>agent</item>

Avoid double parsing – remove duplicate grammars or duplicate vocabulary

6050-EffectiveMonth-VM

VoiceMenu DialogModule™		
Ask caller for effective month. Give them a choice of three specific months based on the current date. 		
Entering from		
6040-WhatType-VM		
Prompts		
	Type / Name	Wording
60501	6050-DD-EffectiveMonth-Prompt-Initial	I need to know when this direct deposit change should be effective. You can say As Soon As Possible, or you can say ...
	6050-DD-EffectiveMonth-Prompt-MonthChoices	<month 1 medial> <month 2 final>

60502	6050-DD-EffectiveMonth-Prompt-Retry1	Please say "As Soon As Possible", or say *** just a month ***, among the following ...
	6050-DD-EffectiveMonth-Prompt-MonthChoices	as above
60503	6050-DD-EffectiveMonth-Prompt-Retry2	The effective month for your direct deposit change must be one of these choices. Please say "As Soon As Possible" or press one, or say *** just a month ***, among these: ...

Developer notes
Code must calculate the two specific months based on current date and SSA business practices.
The prompt MonthChoices is then the concatenation of the first month in medial inflection, and the second month in final inflection.
If caller picks a valid month <i>without</i> confirmation, play the success 1 and 2 sequence at the end. Always play the Success 3 prompt if caller says ASAP.
“One Step Correction” strategy should be available to the Caller (e.g., “No, February”) – This means both the collection grammar and the confirmation grammar are active during the confirmation phase. (This can be done as a parallel grammar.)
The grammar that should be accepted includes "as soon as possible" (ASAP) and its synonyms, the two specific months calculated above, the current month, and any additional months between the current month and the first of the calculated months. For example, if a call is received toward the end of September, the valid months are November and December, but the grammar should include September, October, November, December, and the ASAP synonyms, and September and October should be mapped the same as ASAP. The current month is not prompted, but it should be recognized and handled the same as ASAP.
Also, if possible, add to the above grammar optional prefixes: "it should be effective in" and "ahh".

6130-GetRouting-VM

Custom Context DialogModule™ 				
Ask the caller for the bank routing number.				
Entering from				
6050-EffectiveMonth-VM				
Prompts				
Message Number	Type / Name	Wording		
61301	6130-DD-GetRouting-Prompt-Initial	Please say the nine digit routing number for your NEW bank quickly like this: 1 2 3 – 4 5 6 – 7 8 9. Go ahead.		
61302	6130-DD-GetRouting-Prompt-Retry1	... or the number you gave me isn't a valid routing number. Please be sure you're giving me the ROUTING number for your NEW bank and not your ACCOUNT number. Please say the routing number quickly.		
61303	6130-DD-GetRouting-Prompt-Retry2	... or that's still not a valid routing number. If you aren't sure, say Question and I'll help you out. Otherwise, please say the nine-digit routing number or enter it on your keypad.		
61304	6130-DD-GetRouting-Prompt-Timeout1	I'm sorry, I didn't hear anything. Please say the nine-digit bank routing number or enter it on your keypad.		
61305	6130-DD-GetRouting-Prompt-Timeout2	I'm sorry, I still didn't hear anything. Please say the nine-digit bank routing number or enter it on your keypad.		
61306	6130-DD-GetRouting-Prompt-Help	OK, here's a detail that may help. The bank routing number is exactly nine digits and is printed on the bottom of each check in between two marks that look like a vertical bar followed by a colon. It's usually the left-most number at the bottom of the check. So ... what's your bank routing number?		
Option	Vocabulary	DTMF	Action	Confirm.

Confirmation prompts					
Message Number	Option / Name	Wording			
	6160-DD-GetAccount-ConfPrompt-Digits	Default confirmation, as handled by DialogModule™, using CPR for the digit string. The result is "I think you said N N ... N. Is that correct?" Note: Add 100 ms silence between each digits file (i.e. single, pair and triplets) – This value may need to be revised at the next tuning phase.			
DialogModule parameters					
Parameter	Value				
6160-DD-GetAccount-Parameter					
termchar	#				
entry_list	<<not used>>				
minimum_length	1				
maximum_length	17				
restrict_to_entries	FALSE				
before_begin_of_speech_timeout	7,000 ms				

allowing_barge_in	True
incompletetimeout	3000 ms ← Note increased incompletetimeout.
Swirec_max_speech_duration	45000ms (default is 40000ms) CHECK THIS!

Event logging

Record = U-COAD-DM_6160-(Call Duration at start),T-COAD-	0000 = Success	-Call duration at process end
	0001 = Error	
	0002 = Max No Input	
	0003 = Max No Match	
	0200 = Caller Hang Up	
	0303 = Max No Confirm	
	0304 = Max Help	
	0310 = Caller Requested Main Menu	
	0311 = Caller Requested Agent	

Developer notes

Set Confidential Flag to TRUE

Note that confirmation is ALWAYS.

Avoid double parsing – remove duplicate grammars or duplicate vocabulary.

6170-SendingNow-Msg

Play Prompt		
Tell caller to hold on while we send the numbers to the database.		
Entering from
