

pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit comments or requests for extensions by the due dates, and follow all instructions for submitting comments and requests for extensions, specified in the DATES and ADDRESSES sections of this notice. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if the request is not adequately justified.

OSHA staff will review all timely-submitted comments to the docket and, after addressing the issues raised by timely-submitted comments, will recommend to the Assistant Secretary for Occupational Safety and Health whether to adopt the proposed NRTL Program fee schedule and new streamlined procedures for accepting and reviewing applications. The Agency will publish a final fee schedule in the **Federal Register**, as provided under 29 CFR 1910.7, as well as a final decision on whether to adopt the new streamlined procedures for accepting and reviewing applications. The final fee schedule would become effective 30 days after the date of publication of the schedule in the **Federal Register**, and the final streamlined procedures for accepting and reviewing applications would become effective on the date of publication of the procedures in the **Federal Register**.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing collection of information requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The purpose of the Lead in Construction Standard and its collection of information (paperwork) requirements is to reduce occupational lead exposure in the construction industry. Lead exposure can result in both acute and chronic effects and can be fatal in severe cases of lead toxicity. Some of the health effects associated with lead exposure include brain

disorders which can lead to seizures, coma, and death; anemia; neurological problems; high blood pressure; kidney problems; reproductive problems; and decreased red blood cell production. The major collection of information requirements of the Standard are: conducting worker exposure assessments; notifying workers of their lead exposures; establishing, implementing and reviewing a written compliance program annually; labeling containers of contaminated protective clothing and equipment; providing medical surveillance to workers; providing examining physicians with specific information; ensuring that workers receive a copy of their medical surveillance results; posting warning signs; establishing and maintaining exposure monitoring, medical surveillance, medical removal and objective data records; and providing workers with access to these records. The records are used by employees, physicians, employers and OSHA to determine the effectiveness of the employer's compliance efforts.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed collection of information requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the collection of information requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting an adjustment decrease of 216,744 burden hours (from 1,460,430 to 1,243,686 burden hours). The decrease in burden hours is due to an estimated overall decrease in the number of covered establishments, based on updated data and estimates. There is also an estimated increase in operation and maintenance costs of \$6,849,923, from \$60,093,015 to \$66,942,938. The increase in operation and maintenance costs is mainly due to the increased cost of lab analysis of samples and the increase in cost of the monitoring equipment.

Type of Review: Extension of a currently approved collection.

Title: Lead in Construction Standard (29 CFR 1926.62).

OMB Control Number: 1218-0189.

Affected Public: Businesses or other for-profits.

Number of Respondents: 119,853.

Frequency of Response: On occasion; Quarterly; Bi-monthly; Semi-annually; Annually.

Total Responses: 8,284,730.

Average Time per Response: Varies from 1 minute (.02 hour) for a clerical employee to notify employees of their right to seek a second medical opinion to 8 hours to develop a compliance plan.

Estimated Total Burden Hours: 1,243,686.

Estimated Cost (Operation and Maintenance): \$66,942,938.

IV. Public Participation—Submission of Comments on this Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

- (1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile; or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for this ICR (Docket No. OSHA-2012-0014). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350, (TTY) (877) 889-5627). Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as their social security number and date of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site. All submissions, including copyrighted material, are available for inspection

and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available from the Web site, and for assistance in using the Internet to locate docket submissions.
