

SUPPORTING STATEMENT  
for the  
FOREIGN MARKET DEVELOPMENT COOPERATOR PROGRAM  
and  
MARKET ACCESS PROGRAM  
(0551-0026)

**1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.**

The basic authority for the Foreign Market Development Cooperator (Cooperator) Program is contained in Title VII of the Agricultural Trade Act of 1978, 7 U.S.C. 5721, et seq.. Program regulations appear at 7 CFR part 1484. Title VII directs the Secretary of Agriculture to “establish and, in cooperation with eligible trade organizations, carry out a foreign market development cooperator program to maintain and develop foreign markets for United States agricultural commodities and products.”

The Market Access Program (MAP) is authorized by section 203 of the Agricultural Trade Act of 1978, as amended. Program regulations appear at 7 CFR part 1485. The primary objective of the Market Access Program is to encourage the development, maintenance, and expansion of commercial export markets for U.S. agricultural products through cost-share assistance to eligible trade organizations that implement a foreign market development program. Financial assistance for both programs is made available on a competitive basis. The programs are administered by personnel of the Foreign Agricultural Service (FAS).

The information collected will be used primarily by FAS to manage, plan, evaluate, and account for government resources. Specifically, data is used to assess the extent to which: applicant organizations represent U.S. commodity interests; benefits derived from market development efforts will translate back to the broadest possible range of beneficiaries; the market development efforts will lead to increases in consumption and imports of U.S. agricultural commodities; the applicant is able and willing to commit personnel and financial resources to assure adequate development, supervision, and execution of project activities; and private organizations are able and willing to support the promotional program with aggressive marketing of the commodity in question.

The integrity of both programs hinges on information received from or maintained by the industry. Information collected provides evidence that taxpayer funds are being disbursed in accordance with authorizing legislation, ethical standards, and standard Government rules and regulations.

**2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.**

All data collected is used by FAS marketing specialists and program managers for the allocation of funds, program management, planning, and evaluation. The data collection has, in almost every case, been mandated by either a GAO or OIG report to eliminate perceived deficiencies in program management and to establish additional program controls.

Allocation Criteria: The criteria for the allocation of funds are enumerated in the program regulations as well as the annual announcements of the Cooperator Program and the Market Access Program, which is published in the Federal Register. FAS considers a number of factors when reviewing proposed projects. These factors include the ability of the organization to provide an experienced U.S.-based staff with technical and international trade expertise to ensure adequate development, supervision, and execution of the proposed project; the applicant's willingness to contribute resources, including cash and goods and services of the U.S. industry and foreign third parties; the conditions or constraints affecting the level of U.S. exports and market share for the agricultural commodities and products to be promoted; the degree to which the proposed project is likely to contribute to the creation, expansion, or maintenance of foreign markets; the degree to which the strategic plan is coordinated with other private or U.S. government-funded market development projects; the applicant's past export and demand expansion performance; and the accuracy of the applicant's past export projections.

Applications: Through the application, prospective Cooperators or Participants submit data about their organizations so that FAS can apply the allocation criteria discussed above. The application is also the primary strategic planning document. The application assesses market potential, outlines Cooperator or Participant strategy and goals, explains and justifies individual activities, provides estimated budgets, and includes benchmarks and goals for evaluating performance. Prior years' applications also dictate current application content because many activities continue or follow-up on previous activities. The scope and content of each application depends largely on the applicant's organizational style, marketing approach, and method of operation.

Project Agreements: The project agreement is a binding instrument and creates a legal obligation on the part of CCC to make appropriated funds available to the Cooperator or Participant. The agreement creates a cooperative relationship between CCC and the Cooperator or Participant outlining the basic responsibilities of each party and the contributed resources to support achievement of mutual goals.

Evaluation: FAS requires applicants to submit evaluation plans and performance measures in order to (1) monitor performance of market development activities and programs, (2) evaluate the benefits and effects of these activities, and (3) document the experience gained from these activities for use in the design and implementation of future market

development programs. Based on this information, FAS program managers are also better able to determine what changes are needed to improve program performance and designing future programs.

Contribution Reports: FAS requires Cooperators and Participants to provide part of the resources needed to conduct promotion programs. Experience has shown that as the Cooperators or Participant increase their financial commitment, the organization enhances program management and supervision. Cooperators and Participants commit to a contribution level in their applications. This is one criteria that is used in the allocation of program resources. The Cooperators and Participants are, therefore, held to the contribution levels they specify in their applications. Contribution reports are required to ensure program participants have met their financial and in-kind obligations.

Reimbursement Claims: The annual application, approved by FAS, and corresponding amendments provide the authorities and limitations for Cooperators and Participants to make expenditures under project agreements. The Cooperator or Participant is responsible for instituting a financial management and accounting system that ensures accurate, current, and complete disclosure of all financial transactions for each approved activity. All expenditures incurred must be proper, reasonable, and in accordance with CCC regulations. The Cooperator or Participant is responsible for submitting claims to FAS requesting reimbursement for incurred costs as outlined in the application. Reimbursement claims are generally submitted on a monthly basis.

Office Management Records: Other reporting and recordkeeping requirements, i.e., travel reports, office management records, salaries, etc., are required as a means of ensuring that U.S. Government resources are disbursed as judiciously as possible. FAS requires the same control of Cooperator or Participant spending of taxpayer funds as the U.S. Government requires of its own employees. For example, FAS asks Cooperators and Participants traveling on U.S. Government funds to follow provisions of the Federal Travel Regulations; the purchase of office equipment follows General Services purchasing practices; and salaries and allowances paid from U.S. Government funds, in most cases, follow GS salary levels or Embassy Foreign National salary scales. Again, all of these requirements are placed on Cooperators and Participants in order to maximize return on investment and preserve program accountability.

Brand Program Operational Procedures. MAP Participants with branded programs (branded programs are not available in the Cooperator program) are required to establish brand program operational procedures, and they are submitted on an annual basis to CCC for approval. Procedures must, at a minimum, include a brand program application, application procedures, application review criteria, brand participant eligibility requirements, a participation agreement, reimbursement requirements, compliance requirements, reporting and recordkeeping requirements, employment practices, financial management requirements, contracting procedures, and evaluation requirements. Participants will receive written official notification of whether or not the procedures are

approved. Until written approval is received, Participants cannot enter into participation agreements with branded participants and may not implement any brand programs. These procedures are to be reviewed annually by the Participant.

Written Contracting Guidelines. Participants and cooperators are required to submit to CCC, for CCC approval, written contracting guidelines for contracts that are funded, in whole or in part, with MAP funds. These contracting guidelines govern all of a Participant's MAP-funded contracting involving contracts with an annual value of \$35,000 or more. The guidelines indicate the method for evaluating proposals received for all contract competitions, the method for monitoring and evaluating performance under contracts, and the method for initiating corrective action for unsatisfactory performance under contracts. Participants will receive written official notification of whether or not the guidelines are approved, at which point guidelines remain in place until approval is retracted or new guidelines are approved that supersede them. Guidelines may be modified or resubmitted at any time.

Anti-fraud Prevention Program. All MAP Participants must annually submit to CCC for approval a detailed fraud prevention program. The fraud prevention program includes, at a minimum, an annual review of physical controls and weaknesses, a standard process for investigating and remediation of suspected fraud cases, and training in risk management and fraud detection for all current and future employees. Until the Participant has received written approval of their program from CCC, Participants cannot conduct any MAP activities or permit any MAP activities to occur. If the Participant receives an allegation of or information leading to a suspicion of misrepresentation or fraud, they must report it to a specified USDA contact and cooperate fully in and comply with any directives resulting from a USDA investigation.

Other Reports and Record Keeping Requirements: Other reports and records are required to ensure the proper and judicious use of Government resources. Each Cooperator and Participant must certify that any Federal funds received supplement, but do not supplant, private or third party funds or other contributions to program activities. Cooperators and Participants must submit reports of findings whenever CCC resources are used for travel or research purposes. Auditable supporting documentation is required for all expenses reimbursed with CCC resources or claimed as a contribution. These include, but are not limited to: canceled checks, invoices, samples of produced materials, etc. Personnel records, including sick and annual leave, are required to document compliance with prescribed personnel policies. As a rule, such requirements conform to generally accepted Government standards.

**3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and**

**the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.**

Over the last 3 years, FAS has continued its efforts in making the information submission process electronic and identical for the FMD and MAP. Applications to both the Cooperator Program and MAP can be made in a single application. Reimbursement for activities under the Cooperator Program and MAP is also made through the same interface.

FAS is working closely with our Unified Export Strategy (UES) IT team to implement in 2017 the ability for Participants to submit their brand promotional procedures, contracting guidelines, and anti-fraud prevention plans via the UES with the ability to copy existing plans or change them, if needed, which saves significant time.

**4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.**

FAS administers various agricultural export assistance programs, including the Cooperator Program, the Market Access Program, the Emerging Markets Program, the Quality Samples Program, and the Technical Assistance for Specialty Crops Program. In an effort to facilitate the strategic planning process of applicant organizations, as well as that of the Federal government, FAS unified and simplified the application process for its agricultural export assistance programs. FAS recognized that a group interested in applying for more than one of these programs may have to submit some information multiple times. The on-line, unified application process removes duplicative information and allows Cooperators and Participants to submit a single document when applying for the five FAS market development programs.

The data required of Cooperators and Participants cannot be obtained from any other source other than the organization itself. Cooperators or Participants are commodity organizations or agricultural cooperatives (i.e., U.S. Wheat Associates, American Soybean Association, etc.) who develop marketing programs specifically for their commodities or products. Most of the data developed and presented to FAS is developed in-house by marketing and commodity analysts on their staffs. Some of the data, such as consumer or market surveys, are acquired via independent third parties for evaluation purposes.

**5. If the collection of information impacts small businesses or other small entities (Item 5 of OMB Form 83-1), describe any methods used to minimize burden.**

Since all current program Cooperators or Participants are non-profit organizations or agricultural cooperatives that generally represent growers, producers, and/or exporters of specific commodities, the information collection requirements imposed by these programs do not require any significant actions on the part of small businesses. However, the agency continues to review and revise its administration of the programs to better ensure accountability of program funds and program efficiencies.

Of the 64 respondents, none are small businesses.

**6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.**

The data collection requirements outlined above, except for periodic billings to FAS and travel reports, have been reduced to only one submission per year. The program could not be implemented without the submission of the information outlined above.

**7. Explain any special circumstances that would cause an information collection to be conducted in a manner:**

**\* requiring respondents to report information to the agency more often than quarterly;**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

**\* requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

**\* requiring respondents to submit more than an original and two copies of any document;**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

**\* requiring respondents to retain records, other than health, medical or government contract, grant-in-aid, or tax records for more than three years;**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

**\* in connection with a survey that is not designed to produce valid and reliable results that can be generalized to the universe of the study;**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

- \* **requiring the use of a statistical data classification that has not been reviewed and approved by OMB;**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

- \* **that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

- \* **requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.**

This information collection is conducted in a manner that is consistent with 5 CFR 1320, Section 5.

**8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.**

**Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.**

**Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every 3 years -- even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.**

Notice of this information collection was published in the Federal Register on September 25, 2015 (80 FR 57783). A copy of the notice is attached.

FAS has received comments from the following three (3) Participants:

- 1) Kent Swisher  
Vice President, International Programs  
National Renderers Association  
Phone number: (703) 683-3561  
Email: Kswisher@nationalrenderers.com
  
- 2) Lynsey Kennedy  
International Marketing Manager  
Pear Bureau Northwest  
4382 SE International Way, Suite A  
Milwaukie, OR 097222  
Phone Number: (503) 652-9720  
Email: lkennedy@usapears.com
  
- 3) Michelle Paul  
Deputy Senior Manager, Marketing Accounts  
Bryant Christie Inc. (on behalf of the California Table Grape Commission)  
2005 I Street, Suite 200  
Sacramento, CA 95811  
Phone number: (916) 492-7062  
Email: michelle.paul@byrantchristie.com

The Participants comments are as follows:

Comment: Participants indicated that they utilize more burden hours to apply to the Cooperator program and MAP, and comply with all program requirements than what FAS estimated.

Response: Under the Paperwork Reduction Act, FAS has put in place processes to reduce burden and continues to explore options to further minimize this hardship to Participants.

Comment: Decrease the burden hours to Participants by making the UES system more user-friendly and functional, allowing Participants to readily upload marketing plans, make adjustments, file claims, and submit reports.

Response: FAS continues to work with the UES IT team to make refinements in the UES system to make it easier for Participants to comply with program requirements.

Comment: In addition to the UES online submission, Participants lamented that they are still required to submit to FAS hard copies of their marketing plan. They are also concerned that more information is now being included in the UES system which increases administrative burden for their staff.

Response: FAS highly recommends applying via the web-based UES system as this format eliminates paperwork and allows FAS to easily process and review Participants' marketing plans, and promptly make funding decisions and respond to questions or concerns. However, applicants also have the option of submitting an electronic version (hard copy) of their application to FAS.

The Cooperator Program and the MAP program is a cooperative venture between the industry and the U.S. government to promote and develop overseas markets for U.S. agricultural products. In working together towards this goal, FAS maintains an open, continuous consultation with the Cooperators or Participants to discuss program activities, evaluations, management and other operational issues to ensure program success. In addition, FAS leadership meets with Cooperator or Participants executives at least on a weekly basis to resolve issues, and discuss program direction and policy while FAS administrative personnel are in regular contact with their industry counterparts on a daily basis to help with procedural and accounting issues. FAS holds an annual meeting with the industry to talk about program administration and implementation.

**9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.**

The agency does not provide any payment or gift to respondents, other than remuneration of contractors or grantees.

**10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.**

Cooperators and Participants are aware that information collected relating to this program is generally open for public inspection, but the agency may withhold information which could cause substantial competitive harm to the submitter under exemption 4 of the Freedom of Information Act (FOIA), 5 U.S.C. 552(b)(4). It is also the agency's policy, prior to responding to a FOIA request, to obtain and consider the views of the submitter of the information if the information submitted is not readily identifiable as privileged or business confidential. If the agency disagrees with the views presented by the submitter, it will give the submitter sufficient time, prior to release of the information, to pursue legal action to prevent the release.

**11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.**

There are no sensitive questions involved in this information collection.

**12. Provide estimates of the hour burden of the collection of information. The statement should:**

- \* Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.**
- \* If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens in Item 13 of OMB Form 83-1.**
- \* Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contraction out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in Item 14.**

The current annual burden estimate of 85,304 hours is based on separate estimates of 10 distinct areas of data collection: applications, project agreements with FAS, evaluations of marketing activities and programs, travel reports, contribution reports, administrative functions, office management records, brand program operational procedures, written contracting guidelines, and an anti-fraud prevention program. The estimates used to determine the burden on the public are explained as follows:

- a) Applications. Applications include many separate estimates, projections, goals, etc., all of which make up a comprehensive application. The current estimate for one Cooperator or Participant to complete an application is approximately 320 hours. As explained earlier in this document, less information is requested from Cooperators and Participants than in the past, and multiple programs are applied for with a single application.
- b) Program agreements. This includes preparing new or amending already active program agreements. Participating organizations take approximately 2 hours to review the project agreement (contract), clear them with legal counsel (if necessary), sign them, and return them to FAS. On average, 256 program agreements are signed each year.

- c) Evaluations. Cooperators and Participants are required, under the MAP and FMD regulations, to evaluate the effectiveness of their programs. FAS encourages Cooperators and Participants to use the GPRA as a guideline for their evaluations. Applications include evaluation plans and performance measures in order to (1) monitor performance of market development activities and programs, (2) evaluate the benefits and effects of these activities, and (3) document the experience gained from these activities for use in the design and implementation of future market development programs. Establishing good performance measures enables Cooperators and Participants to perform meaningful evaluations. Based on these evaluations, Cooperators, Participants, and FAS program managers are better able to determine what changes are needed to improve program performance and designing future programs. It is estimated that it will take approximately 80 hours to complete annual evaluations, analyze its results, and develop a written report which summarizes the evaluation process and findings.
- d) Travel Reports. Since travel is a very important part of overseas market development, the number of trips involving both 1) the United States and 2) foreign countries amounts to about 2,560 trips per year. As the U.S. Government requires trip reports from government employees, FAS also finds this type of information extremely useful as a management tool. Cooperator and Participant trip reports provide valuable insight to market situations and program issues. The average time required to prepare travel reports is 2 hours per Cooperator or Participant.
- e) Contribution reports. Each Cooperator and Participant prepares a summary contribution report each year via a web-based interface. Depending on the size and scope of the program, smaller Cooperators or Participants may need only several hours to prepare the report, whereas larger Cooperators or Participants may need several weeks. The average time required to prepare the contribution report is 8 hours per Cooperator or Participant.
- f) Administrative Procedures. Cooperators and Participants are responsible for submitting reimbursement claims to FAS requesting reimbursement for program expenditures. Cooperators and Participants bill FAS whenever they feel their costs are of sufficient size to justify a claim for reimbursement. Cooperators and Participants are required to maintain receipts for all program related expenditures in excess of \$25.00. The estimate of 40 hours per claim includes all incidental office costs and procedures necessary to prepare and support each claim.
- g) Office Management. Cooperators and Participants are required to keep good office records available for audit. These records include such things as salary computations, receipts for all disbursements, time and attendance records, etc. Only 11 Cooperators have foreign offices supported by Cooperator project funds. In addition, FAS requirements apply only to Cooperator overseas offices and only if a portion of the cost is paid with project funds or counted as a contribution. The

average time required to prepare and maintain office records is 800 hours per Participant.

- h) Brand Program Operational Procedures. Under the new MAP regulation effective as of the 2013 program year, Participants with branded programs are required to establish brand program operational procedures that must be submitted on an annual basis to CCC for approval (not all Participants have branded programs; branded programs are not available in the Cooperator program). Procedures must, at a minimum, include a brand program application, application procedures, application review criteria, brand participant eligibility requirements, a participation agreement, reimbursement requirements, compliance requirements, reporting and recordkeeping requirements, employment practices, financial management requirements, contracting procedures, and evaluation requirements. The average time required to prepare the brand program operational procedures is 8 hours per Participant.
- i) Written Contracting Guidelines. Under the new MAP regulation effective as of the 2013 program year, Participants are required to submit to CCC, for CCC approval, written contracting guidelines for contracts that are completely or partially funded with MAP funds. These contracting guidelines govern all of a Participant's MAP-funded contracting involving contracts with an annual value of \$35,000 or more. The guidelines indicate the method for evaluating proposals received for all contract competitions, the method for monitoring and evaluating performance under contracts, and the method for initiating corrective action for unsatisfactory performance under contracts. The average time required to prepare the contracting guidelines is 10 hours per Participant.
- j) Anti-fraud Prevention Program. Under the new MAP regulation effective as of the 2013 program year, MAP Participants must annually submit to CCC for approval a detailed fraud prevention program. At a minimum, the program must include an annual review of physical controls and weaknesses, a standard process for investigating and remediation of suspected fraud cases, and training in risk management and fraud detection for all current and future employees. The average time required to prepare the fraud prevention program is 20 hours per cooperator.

The estimated total cost to respondents for reporting and recordkeeping is \$4,610,000 based on the following:

<u>DESCRIPTION</u>	<u>NUMBER OF RESPONDENTS</u>	<u>FREQ</u>	<u>TOTAL RESPONSE</u>	<u>AV HOURS PER RESP</u>	<u>TOTAL HOURS</u>	<u>COST PER HOUR</u>	<u>COST TO PUBLIC</u>
A) <u>Applications</u>	64	1	64	320	20,480	\$70	\$1,433,600
B) <u>Project Agreements</u>	64	4	256	2	512	\$80	\$40,960
C) <u>Evaluation</u> of marketing activities and programs	64	1	64	80	5,120	\$70	\$358,400
D) <u>Travel Reports</u>	64	40	2,560	2	5,120	\$65	\$332,800
E) <u>Contribution Reports</u>	64	1	64	8	512	\$45	\$23,040
F) <u>Administrative Procedures</u>	64	17	1,088	40	43,520	\$45	\$1,958,400
G) <u>Office Management Records</u>	10	1	10	800	8,000	\$40	\$320,000
H) <u>Brand Program Operational Procedures</u>	15	1	15	8	120	\$70	\$8,400
I) <u>Written Contracting Guidelines</u>	64	1	64	10	640	\$70	\$44,800
J) <u>Anti-fraud Prevention Program</u>	64	1	64	20	1,280	\$70	\$89,600
<b>TOTAL</b>		68	4,249	20	85,304		\$4,610,000

**13. Provide an estimate of the total annual cost burden to respondents or record keepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).**

- \* The cost estimate should be split into two components: (a) a capital and start-up cost component (annualized over its expected useful life); and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of the methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include among other items, preparations for collection information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.**
- \* If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.**
- \* Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.**

(a) There is no cost burden to respondents associated with capital or start-up costs.

(b) There is no cost burden to respondents associated with operating or maintaining systems or purchasing systems.

**14. Provide estimates of annualized cost to the Federal Government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 in a single table.**

The estimated annual costs to the Federal Government for all submissions found in the regulations are as follows:

ITEM	ORG	GRADE	RATE	HOURS	COST
A) Applications	POD	13	\$45.54	90	\$4,099
		COPD	13	\$45.54	22,520
\$1,025,561					
B) Agreements	POD	11	\$31.95	140	\$4,473
C) Evaluations	POD	13	\$45.54	270	\$12,296
		COPD	13	\$45.54	1,350
E) Contributions	POD	11	\$31.95	810	\$25,880
		COPD	12	\$38.30	80
F) Administrative Procedures	POD	11	\$31.95	4,510	\$144,095
TOTAL					\$1,280,947

Note: POD refers to the Program Operations Division of FAS. This office is responsible for administrative operation of the MAP and Cooperator program. COPD refers to the Cooperator Programs Division of FAS which is responsible for review of application and evaluation content and day to day contact with program participants.

**15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-I.**

**Program Change**

The decrease in the burden hours reflects the decrease in the number of respondents from 71 to 64. The number of respondents decreased because some Participants left the program due to underperformance.

**16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.**

FAS has no plans to tabulate or publish the information FAS collects.

**17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.**

There are no forms associated with this information collection.

**18. Explain each exception to the certification statement identified in Item 19, "Certification for Paperwork Reduction Act Submissions", of OMB Form 83-1.**

There are no exceptions.
