Now that we've looked at your fish, could I ask you just a few more questions? Answers to these questions will help us to better un- derstand how important recreational, personal use fishing is to fishers and their households on St. Croix. Information collected with these questions will only be reported for the whole fishing community. In other words, at the end of the study, the information will be grouped together for everyone that we survey. We will not share a person's individual responses with anyone.
