

Hayden, Arizona Smelter Exposure Investigation Questionnaire

Introduction - Hello my name is {SAY NAME}. We are doing an Exposure Investigation for the Agency for Toxic Substances and Disease Registry, or ATSDR. ATSDR is a sister agency to the Centers for Disease Control and Prevention. As part of the investigation, we will be asking you some common questions like your name and address. We will also ask questions on your contact with chemicals. We are asking these questions to better understand all the data we collect.

The questions should take about 25 minutes. After that, we will be offering free urine testing for participants in this exposure investigation. Once we are done with this investigation, you will be given a copy and details of your and your's children (if you have them) test results. Generally, we are able to get results to you within 12 weeks.

3. Participant last name

4. Participants first name

5. Middle initial

6. Laboratory ID

ATSDR estimates the average public reporting burden for this collection of information as 25 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0923-0048).

Now I want to ask you questions about how can I contact you. I will also be asking how long you have lived at or visited certain places. This is needed to find out how long you may have had contact with chemicals and how long it may have lasted. We will also ask your age, race, weight and height and about your jobs. This is useful to put your test results side by side with others like you to see what is typical.
