## SUPPLEMENTARY INFORMATION:

### Public Participation and Request for Comments

This Notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection. The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of

the Collection on respondents, including the use of automated collection techniques or other forms of information technology. These comments will help OIRA determine whether to approve the ICR referred to in this Notice.

We encourage you to respond to this request by submitting comments and related materials. Comments to Coast Guard or OIRA must contain the OMB Control Number of the ICR. They must also contain the docket number of this request, [USCG-2015-0629], and must be received by January 27, 2016.

Previous Request for Comments

This request provides a 30-day comment period required by OIRA. The Coast Guard has published the 60-day notice (80 FR 45670, July 31, 2015) required by 44 U.S.C. 3506(c)(2). That Notice elicited five comments.

Comment #1: Mark Brown: Mr. Brown is the Boating Law Administrator in Oklahoma. He suggests that before the Boating Accident Report (BAR) is updated, items incorporated in the proposed rulemaking on Accident Reporting be included. The BAR form is approved by OMB on a triennial basis, and that approval expires soon. We are seeking to renew the approval of the BAR form based on the current accident reporting requirements. The proposed rulemaking to which the commenter refers will likely change the requirements for accident reporting if it is adopted. However, since the proposed rulemaking on Accident Reporting is still being developed and no final resolution has been determined, we cannot use any potential changes that the accident reporting rulemaking may propose. Therefore the BAR will remain as is. If the accident reporting rulemaking proposes changes to accident reporting requirements that will necessitate changes to the BAR form, those changes will be incorporated in the rulemaking and will be submitted to OMB for its approval.

Comment #2: Clifford Inn: Mr. Inn represents a State and enters data into the Boating Accident Report Database (BARD). He's suggesting adding an additional field under the existing ACCIDENT DETAILS to allow a field for the registration number of another vessel (the 2nd in an accident involving two vessels). Although, a good suggestion, it is our feeling that the BAR need not be changed at this time as there are other means when inserting into BARD to do what Mr. Inn suggests.

Comments #3: National Association of State Boating Law Administrators (NASBLA): NASBLA represents the recreational boating law officials in the 50 states and six territories. They claim that at this time, two factors limit their ability to respond to this Notice in a more comprehensive and meaningful way. Firstly, they claim that terminology may change depending on the results of a notice of proposed rulemaking on Accident Reporting. However, until the notice of proposed rulemaking is published and finalized, no changes will be made to the BAR as explained under COMMENT #1. The next iteration of the BAR may need changes if the rulemaking, when finalized, makes it appropriate. Secondly, they refer to another Federal Register notice (docket number USCG-2015-0753) dealing with the updating of the Boating Accident Manual (COMDTINST M16782.1). However, this ICR must go on, in spite of any problems the COMDTINST may encounter. They further state that commenting on this particular docket would not be particularly useful and might even be rendered obsolete by the time the Federal Register Notice regarding BAR form changes is issued. As such, no changes will be made to the BAR ICR as a result of these comments.

Comment #4. Connecticut Department of Energy & Environmental Protection: Connecticut supports an extension of the currently approved collection: 1625-0003, Boating Accident Report. However, they also feel the forms may need to be updated to ensure conformity with terminology and other changes to the casualty report content authorized in the final rule and consistent with COMDINST M16782.1. However, as stated in the response to NASBLA, the BAR will not be changed at this time.

Comment #5. Ohio Department of Natural Resources: Ohio's comments are consistent with those of the National Association of State Boating Law Administrators (ID: USCG-2015-0629-0004) and as such the comments above relative to NASBLA's submission apply to Ohio.

After considering all the above comments, no changes have been made to the collection for the reasons explained in the responses to the comments.
