Washington, D.C. 20460

**ENERGY STAR Uninterruptible Power Supply Partner  
Unit Shipment Data for Calendar Year 2015  
Office of Atmospheric Programs**

**PARTNER NAME** (Per your Partnership Agreement): \_\_\_\_\_

**DATE OF SUBMISSION:** \_\_\_\_\_

**SUBMITTED BY** (Your name): \_\_\_\_\_

**IMPORTANT: Please read these instructions carefully before completing this form.**

- Report shipments to or within the U.S. of all models certified under your ENERGY STAR partnership.
- To ensure no double counting occurs, do not report shipments of products certified under another company's partnership, even if you are the Original Equipment Manufacturer of those products. As a reminder, any product sold under a brand name your company owns or licenses must be certified under your ENERGY STAR partnership.
- If you shipped zero ENERGY STAR certified models to or within the U.S. in 2015, please check here and leave the table below blank.

This form is programmed to calculate your total shipments. Therefore, EPA strongly encourages you to fill it out using Microsoft Excel, instead of filling out a printed copy. Estimates of shipments are not accepted. Product Type definitions are available in the Program Requirements at [www.energystar.gov/specifications](http://www.energystar.gov/specifications).

**Reporting Period: CALENDAR YEAR 2015 (JAN. TO DEC.)**

Uninterruptible Power Supply Product Type*	ENERGY STAR® U.S. Unit Shipments	Total U.S. Unit Shipments (ENERGY STAR + Non-ENERGY STAR)*
Ac-output, P < 1000 VA	-	-
Voltage and Frequency Dependent (VFD)		
Voltage Independent (VI)		
Voltage and Frequency Independent (VFI)		
Ac-output, 1000 VA ≤ P ≤ 10,000 VA	-	-
Voltage and Frequency Dependent (VFD)		
Voltage Independent (VI)		
Voltage and Frequency Independent (VFI)		
Ac-output, P > 10,000 VA	-	-
Voltage and Frequency Dependent (VFD)		
Voltage Independent (VI)		
Voltage and Frequency Independent (VFI)		
Dc-output, P < 1000 W		
Dc-output, 1000 W ≤ P ≤ 10,000 W		
Dc-output, P > 10,000 W		
<b>Total</b>	-	-

\*  $P$  is the rated output power in volt-amperes (VA) for ac-output and watts (W) for dc-output UPSs; modular UPSs shall be classified according to the output power of the modules installed as shipped, rather than the minimum or maximum power capacity of the frame. Multiple-normal-mode UPS shall be classified according to the lowest voltage and frequency dependence mode, even if a higher voltage and frequency dependence mode (i.e., VI or VFD) is enabled as shipped.

**Submission Deadline: March 1, 2016**

**To ICF International:**

Ranette Chrea

ICF International

1725 Eye Street, NW

Suite 1000

Washington, DC 20006

\*To ensure EPA's market penetration calculations are accurate, EPA requests that you provide your total U.S. shipments (ENERGY STAR plus non-ENERGY STAR products) for Calendar Year 2015.

EPA plans to use the data only for program evaluations. EPA will release this information only as aggregated data and only to the extent required by law.

**EPA Form No. 5900-47**

**OMB Control No. 2060-0528**

The public reporting and recordkeeping burden for this collection of information is estimated to average 17 hours per response. Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the Director, Collection Strategies Division, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Ave., NW, Washington, D.C. 20460. Include the OMB control number in any correspondence. Do not send the completed form to this address.
