The Scenarios Variables Schedule should be reported through the Reporting Central application.

FDIC DFAST 10-50 - Scenario Variables Schedules: Cover Sheet

To conduct the stress test required, a Covered Institution may choose to project additional economic and financial variables beyond the mandatory supervisory scenarios provided to estimate losses or revenues for some or all of its portfolios. The FDIC expects a Covered Institution to ensure that the paths of any additional variables (including their timing) are consistent with the general economic environment assumed in the supervisory scenarios. If additional variables are used, the Covered Institution must complete the following information for each scenario where the institution chose to use additional variables. The following instructions provide guidance for institutions that choose to use additional variables and scenarios to report.

If additional scenario variables are used, institutions are expected to complete the following tabs in this workbook and submit: Scenario Variables Cover Sheet, Scenario Variables - Baseline Scenario, Variables - Adverse Scenario, and Variables - Severely Adverse Scenario.

Please see the FDIC DFAST 10-50 Reporting Form Instructions for additional guidance on completing these worksheets.

Institution Name:		
RSSD ID:		
CERT:		
Planning Horizon Year 1:	2016	(Enter appropriate year)
Planning Horizon Year 2:	2017	(Enter appropriate year)
Submission Date (MM/DD/YYYY):		(Enter date)
The Scenarios Variables Schedule should be	reported through the Reporting Centr	al application.
