Plan Overview Merit Review Process Evaluation of Multis & Joint Activities Stakeholder Input Planned Programs

Welcome Donald Snyder.

I. Plan Overview

State: Utah
 State Abbreviation: UT
 Institution Name: Utah State University

1. Enter a brief summary about your Plan of Work for fiscal year 2013-2017. Click "Save" to save changes.

2012 Plan of Work
 This plan of work encompasses five major program areas consistent with the NIFA-stated goals: (1) Global Food Security and Hunger, (2) Climate Change and Natural Resource Use, (3) Sustainable Energy, (4) Food Safety, and (5) Obesity, Nutrition and Community.

Global Food Security and Hunger
 The objective of this goal is to enhance global food security through productive and sustainable agricultural systems. This is not meant as an abandonment of past agricultural practices or agricultural systems. It requires an expanded view of agriculture, not an abandonment of agriculture. We can make real progress in improving the standard of living, not only in the U.S., but throughout the world. In order to feed growing populations, we must develop stress-resistant crops and ensure the overall productivity of livestock. Scientific discoveries that result in heat, drought, and saline-resistant plants will allow farmers to remain competitive in world markets, while contributing to farm production throughout the world. Future investigations will range from traditional crop and livestock breeding, but will also include newly mastered genomics. Crops will be produced which rely less on man-made inputs like fertilizer and fuels, and more on gene manipulation. It requires more than laboratory work as these improved plants must be field-tested, both at home and abroad. More focus will need to be given to the "science" of agriculture. Animals must be made more efficient in the use of forage resources.

Climate Change and Natural Resource Use
 Agriculture is climate dependent. Consequently, any changes in the environment such as climate change will require that plants and animals adapt to a different climate change. Agriculture can be the

Plan Overview Merit Review Process Evaluation of Multis & Joint Activities Stakeholder Input Planned Programs

II. Merit Review Process

1. Select the Merit Review Process that will be employed during the 5-Year Plan of Work cycle. (Check all that apply.)

- Internal University Panel
- External University Panel
- External Non-University Panel
- Combined Internal and External University Panel
- Combined Internal and External University and External Non-University Panel
- Expert Peer Review
- Other

2. Write your brief explanation here.

Merit Review Process - Extension Plan: The cooperative extension service merit review process will involve a review by the University of Wyoming, University of Arizona, and the University of New Mexico extension services. These institutions will review the program components suggested in each program area utilizing extension faculty qualified as specialists with significant program experience in the area being reviewed. In turn, Utah State University Cooperative Extension Service will review the work from these three institutions.

Scientific Peer Review Process - Agricultural Experiment Station: The scientific peer-review process within the agricultural experiment station involves two steps. The first step includes a review by two scientists requested by the principal investigator (PI). These two scientists provide written comments regarding the proposal which are then returned to the PI for evaluation and response. Prior to submission to the experiment station, the PI's department head also reviews and signs off on the proposal. Once the proposal reaches the station, two additional scientific peer reviews are obtained from subject matter experts, either from other on-campus faculty (if the expertise exists) or off-campus faculty (if on-campus expertise does not

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder Input - Actions to Seek

1. Actions taken to seek stakeholder input that encourages their participation. (Check all that apply.)

- Use of media to announce public meetings and listening sessions
- Targeted invitation to traditional stakeholder groups
- Targeted invitation to non-traditional stakeholder groups
- Targeted invitation to traditional stakeholder individuals
- Targeted invitation to non-traditional stakeholder individuals
- Targeted invitation to selected individuals from general public
- Survey of traditional stakeholder groups
- Survey of traditional stakeholder individuals
- Survey of the general public
- Survey specifically with non-traditional groups
- Survey specifically with non-traditional individuals
- Survey of selected individuals from the general public
- Other

Write your brief explanation here.

Input from stakeholders will continue to be sought by each county who will hold sessions with stakeholders through the year to obtain input into the plan and propose revisions. In addition, stakeholder groups will be utilized to provide further clarification to the new plan and its five major goal areas.

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder Input - Methods to Identify

2(A). A brief statement of the process that will be used by the recipient institution to identify individuals and groups who are stakeholders and to collect input from them. (Part - 1)

1. Method to identify individuals and groups. (Check all that apply.)

- Use Advisory Committees
- Use Internal Focus Groups
- Use External Focus Groups
- Open Listening Sessions
- Needs Assessments
- Use Surveys
- Other

Write your brief explanation here.

Extension county offices and the Agriculture Experiment Station will share with advisory committees through open meetings, focus groups and surveys the current plan of work to ascertain its relevance to these stakeholder groups. Modifications to the plan that are suggested by these groups from the methodologies indicated will then be considered in subsequent plan revisions. Still, this will be done within the five program areas as suggested by NIFA, USDA.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Actions to Seek Methods to Identify Methods to Collect How Considered

IV. Stakeholder Input - Methods to Collect

2(B). A brief statement of the process that will be used by the recipient institution to identify individuals and groups who are stakeholders and to collect input from them. (Part - 2)

1. Methods for collecting Stakeholder Input. (Check all that apply.)

- Meeting with traditional Stakeholder groups
- Survey of traditional Stakeholder groups
- Meeting with traditional Stakeholder individuals
- Survey of traditional Stakeholder individuals
- Meeting with the general public (open meeting advertised to all)
- Survey of the general public
- Meeting specifically with non-traditional groups
- Survey specifically with non-traditional groups
- Meeting specifically with non-traditional individuals
- Survey specifically with non-traditional individuals
- Meeting with invited selected individuals from the general public
- Survey of selected individuals from the general public
- Other

Write your brief explanation here.

A variety of methods will be used to collect stakeholder input as noted above, though not all would necessarily be used in the same year. A survey will be developed and administered to Extension county offices to determine the use and frequency of these methodologies for collecting stakeholder input. Specific meetings will be held with appropriate stakeholder groups to solicit their input.

Stakeholder Input – How Considered Page:

The screenshot shows a Windows Internet Explorer browser window displaying the NIFA Plan of Work website. The address bar shows the URL: <http://training-pow.nifa.usda.gov/stakeholder.htm?page=four>. The browser's Favorites bar includes links to NIFA Reporting Portal, Training Portal, Test Portal, NIMSS, Your Lyris ListManager Home, NIFA Intranet, NIFA Plan of Work, NIFA Plan of Work TEST, AREERA Website, and Team Track.

The website header features the USDA logo and the text "United States Department of Agriculture National Institute of Food and Agriculture". A navigation menu includes "Home", "About POW", "Contact Us", "REEIS", "Log Out", and "Back to Portal". Below this, a secondary menu lists "Plan Overview", "Merit Review Process", "Evaluation of Multis & Joint Activities", "Stakeholder Input", and "Planned Programs".

The main content area is titled "IV. Stakeholder Input - How Considered" and includes a sub-section "3. A statement of how the input will be considered. (Check all that apply.)". The following options are checked:

- In the Budget Process
- To Identify Emerging Issues
- Redirect Extension Programs
- Redirect Research Programs
- In the Staff Hiring Process
- In the Action Plans
- To Set Priorities

The "Other" option is unchecked and has an empty text input field next to it.

Below the checkboxes, there is a text area with the prompt "Write your brief explanation here." and a rich text editor toolbar. The text entered in the box reads:

Input from the various stakeholders will be used in helping set research and extension agendas within the five NIFA, USDA, goal areas. Stakeholders have included research scientists, community leaders, community citizens, politicians, underserved, and extension faculty and staff. Therefore, the areas targeted in this plan of work will reflect the views of a broad set of stakeholders, including the federal government, and will provide a valuable guide to the programs selected for emphasis.

A red warning message at the bottom of the text area states: "Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost." The page number "12" is visible in the bottom right corner. At the bottom of the page, there are "Save" and "Cancel" buttons.

V.(C) Planned Program (Situation and Scope)

1. Situation and priorities. ?

Livestock and livestock products comprise over 70% of the agricultural cash receipts in Utah. While the main focus of this planned program is animal nutrition and animal management systems, other, often diverse, knowledge areas are also associated with this planned program area. With such a large proportion of agricultural receipts coming from livestock, it is imperative that research and educational efforts be directed toward solving some of the major problems associated with livestock: reproduction rates, rates of gain, health, and environmental concerns.

In the Intermountain West and Utah, plant production primarily serves the livestock industry, though plant production is becoming a more critical part of the urban scene as well, i.e., horticulture and landscaping. Whether for eventual use as a livestock feed or for landscaping, plant production comprises a significant portion of the state's and region's agricultural complex. Priorities include (a) continuing development of new grain, grass, and alfalfa varieties to help the livestock sector to remain economically viable and to do so in an environmentally friendly manner and (b) expansion of "native" landscapes in urban settings. The overall goal of this research is to develop plant materials that are ideally suited to the

V.(D) Planned Program (Assumption and Goals)

1. List the assumptions made for the Program. ?

1. Animal production is an important industry for Utah's economy and for aesthetic values.
2. The large amount of public lands in the West will slowly be reduced as competing users take advantage of these lands.
3. Other means of feeding large quantities of livestock (principally cattle) will have to be developed as public lands become less available.
4. Alternative feeding and management strategies exist or can be developed capable of assisting in maintenance of profitability for all sizes of livestock operations.
5. Plant production in Utah will continue to remain very important with respect to economics, space, and aesthetics.
6. There is a need for greater efficiency in plant and animal production.
7. Forage (including grasses, and alfalfa) and grain crops will continue to be processed and consumed locally, as well as exported to surrounding states.
8. Plant and animal diseases and pests are major detriments of profitability and can be prevented.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

2. Write the ultimate goal(s) of this Program here. ?

1. Enhance animal and plant genetic resources.
2. Improve the reproductive performance of animals.
3. Enhance nutrient utilization in animals.
4. Strengthen animal and plant management systems.
5. Reduce effects of animal and plant insects, diseases and toxins.
6. Enrich bio-energy development from animals.
7. Educate existing and potential animal producers so they can be competitive and remain on the farms and ranches in Utah when so desired.
8. Improve plant biological efficiency and ability to deal with abiotic stresses.
9. Protect crops and plants from weeds and other pests without causing other damage.
10. Augment existing IPM systems.
11. Utilize genomics to enhance animal and plant efficiencies and production.
12. Improve marketing and distribution practices for agricultural producers.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

Name of the Planned Program.
Global Food Security and Hunger

V.(F) Planned Program (Activity)

1. Activity (What will be done?)

1. Conduct research experiments with livestock and plants and plant material.
2. Publish studies and make presentations related to plant propagation and livestock reproduction and actual plant and livestock production.
3. Conduct workshops and meetings to educate local, state, and regional stakeholders concerning progress in producing livestock and plants that are economically viable and environmentally friendly.
4. Provide new methods of livestock pest control and disease prevention.
5. Release new plant varieties relative to this program area under plant variety protection (PVP) status.
6. Expand use of Integrated Pest Management (IPM).
7. Provide pest diagnostic assistance and management information to county agents, state and federal partners, commercial agriculture and horticulture producers, and the general public through the Utah Plant Pest Diagnostic Laboratory.
8. Coordinate efforts with other states and the Western Region Pest Management Center (WRPMC).
9. Enhance the USU Master and 4-H Junior Master Gardener Programs.

Entering or copying text into this text box of more than 3200 will be truncated to fit and the excess will be lost.

2. Choose the type(s) of methods used in your program.

Extension

V.(G) Planned Program (Standard output measures)

NIFA no longer requires you to report target numbers for standard output measures in the Plan of Work. However, all institutions will report actual numbers for standard output measures in the Annual Report of Accomplishments and Results. The standard outputs for which you must continue to collect data are:

- Number of contacts
 - Direct Adult Contacts
 - Indirect Adult Contacts
 - Direct Youth Contacts
 - Indirect Youth Contacts
- Number of patents submitted
- Number of peer reviewed publications

An asterisk (*) indicates a required field.

* Clicking this box affirms you will continue to collect data on these items and report the data in the Annual Report of Accomplishments and Results.

Summary KAs Situation Assumptions Inputs Activity Outputs State Defined Outputs State Defined Outcome Ext. Factors Evaluation

View programs Add new program

Name of the Planned Program.
Global Food Security and Hunger

V.(J) Planned Program (External Factors)

1. External factors which may affect outcomes. (Check all that apply.) ?

- Natural Disasters (drought, weather extremes, etc.)
- Economy
- Appropriations changes
- Public Policy changes
- Government Regulations
- Competing Public priorities
- Competing Programmatic Challenges
- Populations changes (immigration, new cultural groupings, etc.)
- Other

Brief explanation of external factors which may affect the outcomes.

There will be many factors influencing our ability to follow through on the goals that are set herein. We expect economic conditions to remain subdued at best over the near term. We expect further downward adjustments in our budget will have to be made as the state's economy continues to adapt to new world economic realities. We expect county-level budgets to remain the same over the short term, or even decline. Economic conditions remain quite weak and a rapid recovery is not expected. Furthermore, when changes do come, it will likely impact new portions of the economy rather than the more traditional sectors such as extractive industries. Competing public priorities (primarily social programs, public health, and prisons) will continue to have an impact on budgets to CES and UAES. The composition of the state's population continues to change, with a higher immigration and in-migration of individuals outside traditional groups. No doubt, this will bring about evolving goals and program areas. Higher education is expected to change in ways that were previously thought not possible, with much more being done online in interactive settings. Government regulations and public policy changes will also continue and that will determine to a significant extent how many of our stated goals can be achieved. In short, external factors

V.(K) Planned Program (Evaluation Studies)

Brief description of planned evaluation studies. ?

Numerous methods of evaluation will be used as noted above. In addition to the overall "before-after" evaluation, the program will be evaluated as we work through the program. Time series studies are particularly helpful when evaluating changes under this planned program and time series data will be collected to verify how effective this planned program is. Case studies will be utilized where appropriate (particularly with innovators), and comparisons will be made between the participants and those not participating where appropriate. There are some obvious limitations to this approach given that most of what we observe is not within a controlled environment, but is the result of some people adopting practices while others may not. The bench sciences are able to conduct studies with and without treatments, whereas the social sciences must look at adoptors versus nonadopters in a different light (self-selecting bias).

- Number of Graduate Students/Post Docs Trained: [Link to Edit]

Below the list is a link to 'Add Unintended or Previously Unknown Output Measure' and a 'Done' button. At the bottom, there are links for 'About POW', 'Privacy Policy', 'Paperwork Reduction Act', 'REEIS', and 'Contact Us', along with a note: '*Requires Internet Explorer 6.0 or higher, Firefox 3.0.5 or higher.'

This screenshot shows the 'Edit Report Output Measure' page in the NIFA Plan of Work system. The browser window title is 'NIFA Plan of Work - Windows Internet Explorer' and the address bar shows 'http://training-pow.nifa.usda.gov/EditReportOutputMeasure.htm?ID=20319'. The page layout is similar to the previous screenshot, but the main content area is a form for editing the output measure. The form is titled 'IV (E): State Defined Output Measure' and contains the following fields:

- Name of the Planned Program: Global Food Security and Hunger
- Output Measures: Contract/Grant Funds Generated
- Not Reporting on this Output Measure
- Year: 2011
- Actual: 0

At the bottom of the form are 'Save' and 'Cancel' buttons. The footer includes the same navigation links and browser requirements note as the previous screenshot.

Planned Program – State Defined Outcomes Page:

This screenshot shows the 'Report Outcome Measures' page in the NIFA Plan of Work system. The browser window is titled 'NIFA Plan of Work - Windows Internet Explorer' and the URL is 'http://training-pow.nifa.usda.gov/ReportOutcomeMeasures.htm'. The page header includes the USDA logo and navigation links such as 'Home', 'About POW', 'Contact Us', 'REEIS', 'Log Out', and 'Back to Portal'. The main content area is titled 'IV (F): State Defined Outcome Measures' and contains the following information:

- Name of the Planned Program:** Global Food Security and Hunger
- Number of clientele who gain knowledge about improved human, plant, and animal management systems.** (with an 'Edit' link)
- Number of clientele who implement improved human, plant, and animal management systems.** (with an 'Edit' link)
- Add Cross-cutting Outcome/Impact Statement or Unintended or Previously Unknown Outcome Measure** (with a help icon)

A 'Done' button is located at the bottom of the form area. The footer contains links for 'About POW', 'Privacy Policy', 'Paperwork Reduction Act', 'REEIS', and 'Contact Us', along with a note: '*Requires Internet Explorer 6.0 or higher, Firefox 3.0.5 or higher.'

This screenshot shows the 'Edit Report Outcome Measure' page in the NIFA Plan of Work system. The browser window is titled 'NIFA Plan of Work - Windows Internet Explorer' and the URL is 'http://training-pow.nifa.usda.gov/EditReportOutcomeMeasure.htm?ID=30394'. The page header is identical to the previous screenshot. The main content area is titled 'IV (F): State Defined Outcome Measure' and contains the following information:

- Name of the Planned Program:** Global Food Security and Hunger
- 1. Outcome Target**
 - Outcome Measures:** Number of clientele who gain knowledge about improved human, plant, and animal management systems.
 - Not Reporting on this Outcome Measure
- 2. Outcome Type**
 - Change in Knowledge Outcome Measure
 - Change in Action Outcome Measure
 - Change in Condition Outcome Measure
- Enter by Quantitative and/or Qualitative Method Below as appropriate**
 - Quantitative Outcome**

Year	Actual
2011	0
 - Qualitative Outcome or Impact Statement**

Issue (Who cares and Why): (6 to 8 Lines Max)

What has been done: (6 to 8 Lines Max)

Results: (10 To 12 Lines Max)

3. Associate KAs from the Planned Program. (Check all that apply)

KA Code	Knowledge Area
<input checked="" type="checkbox"/>	123 Management and Sustainability of Forest Resources

III) Survey of Review Results

Survey of Review Results

2013-2017 Plan of Work Update

2011 Annual Report of Accomplishments & Results

Name of Institution(s):

- 1.
- 2.
- 3.

Please answer the following questions as they relate to the review you received of your 2013-2017 Plan of Work.

1. Check the box for the extent to which you agree with the following statements:

	<i>Strongly Agree</i>	<i>Agree</i>	<i>Neutral</i>	<i>Disagree</i>	<i>Strongly Disagree</i>
<i>Our reviewer pointed out areas for improvement in our POW.</i>					
<i>Our reviewer made helpful remarks in one or more of the "comments" sections of the review.</i>					
<i>Our reviewer acknowledged sections of our POW that were particularly strong (well thought-out, organized, written, etc.).</i>					
<i>It is clear to us that our reviewer put an appropriate amount of time and effort into the review.</i>					
<i>Overall, we are pleased with the review we received.</i>					

2. Is there additional feedback you would have liked to receive from the reviewer? ___Yes ___No. If yes, please describe and identify which section or Planned Program in your POW to which it relates.

3. What, if anything, did your reviewer write in your review that you found particularly helpful and that will help your institution strengthen its Plan of Work in future years?

4. Is there is a particular section or Planned Program in your POW to which you would like your reviewer to pay special attention and make comments on next year (in FY13 on the 2014-2018 POW Update? ___Yes ___No. If yes, please describe.

5. Please use this space to share any additional comments you have regarding the POW Review you received.

Please answer the following questions as they relate to the review you received of your 2011 Annual Report of Accomplishments and Results:

1. Check the box for the extent to which you agree with the following statements:

	<i>Strongly Agree</i>	<i>Agree</i>	<i>Neutral</i>	<i>Disagree</i>	<i>Strongly Disagree</i>
<i>Our reviewer pointed out areas for improvement in our Annual Report.</i>					
<i>Our reviewer made helpful remarks in one or more of the "comments" sections of the review.</i>					
<i>Our reviewer acknowledged sections of our Annual Report that were particularly strong (well thought-out, organized, written, etc.).</i>					
<i>It is clear to us that our reviewer put an appropriate amount of time and effort into the review.</i>					
<i>Overall, we are pleased with the review we received.</i>					

2. Is there additional feedback you would have liked to receive from the reviewer? ___Yes ___No. If yes, please describe and identify which section or Planned Program in your Annual Report to which it relates.

3. What, if anything, did your reviewer write in your review that you found particularly helpful and that will help your institution strengthen its Plan of Work in future years?

4. Is there is a particular section or Planned Program in your Annual Report to which you would like your reviewer to pay special attention and make comments on next year (in FY13 on the 2012 Annual Report)? ___Yes ___No. If yes, please describe.

5. Please use this space to share any additional comments you have regarding the Annual Report Review you received.
