Instructions For  
**REGISTERED CRAB RECEIVER (RCR) FEE SUBMISSION FORM**

**1How are fees calculated?**

By statute, fees must be split between the harvesting and processing sectors. NMFS will compute the annual fee percentage that will apply for each crab fishing year. For non-catcher/processor Registered Crab Receivers (RCRs), fee liability will be calculated by multiplying the applicable fee percentage by the ex-vessel value of the Crab Rationalization (CR) Program crab received by the RCR at the time of receipt.

For instance, suppose an RCR received 1 pound of crab from a harvester and the ex-vessel value of that crab was \$1 per pound. Using the maximum allowable fee percentage of 3%, each sector would owe half the fee percentage, which is 1.5% or, in this case \$0.015. Therefore, the RCR would pay the harvester \$0.985 for that pound of crab and would self-collect an additional \$0.015 per pound. The total fee payment made to NMFS for that pound of crab by the RCR would be 3% or \$0.03. Because catcher/processors must also be RCRs and participate in both the harvesting and processing sectors, they are responsible for paying the full fee percentage for that same crab, which would be 3% or \$0.03 per pound. The fee liability percentage applies to all value paid/received for CR crab, whether in cash, goods, or services.

**How are Catcher/Processor standard prices assessed?**

NMFS developed an ex-vessel value methodology that calculates, as closely as possible by month and port or port-group, the variations in the actual ex-vessel values of CR crab landings based on information provided by shoreside buyers which includes:

- (1) landed pounds by CR crab species, port-group, and month;
- (2) total ex-vessel value by CR crab species, port-group, and month; and
- (3) price adjustments, including any retro-payments.

NMFS cannot implement standard price calculations more often than annually due to confidentiality issues and administrative constraints. Therefore, catcher/processors are responsible for calculating their fee liability at the end of a crab fishing year based on the current year's catcher/processor standard prices as provided to them by RAM. Each catcher/processor is responsible for retaining its own estimated fees up to 3 percent of its estimated ex-vessel value until the end of the crab fishing year. Catcher/processor standard prices are based on the current year's shoreside ex-vessel value, thereby minimizing any disparity between the fee liability paid by shoreside processors and catcher/processors.

**When are my fees due?**

RCRs will deduct harvester fees at the time of receipt and payment for CR crab. Therefore, harvester's fees will be due each time they deliver crab to an RCR. The RCR will collect, document, and submit fees for all CR crab received from harvesters as well as submit their portion of fees for all CR crab received from harvesters. All RCRs, including catcher/processors, are responsible for submitting the cost recovery payment for all CR crab received during a crab fishing year by July 31st of the following crab fishing year.

**What happens if I don't pay my fees?**

If an RCR owes fees and fails to submit full payment for the previous crab fishing year by July 31, the Regional Administrator may disapprove any transfer of individual fishing quota (IFQ), individual processor quota (IPQ), quota share (QS), or initial processor quota share (PQS) to or from the RCR and may withhold issuance of any new CR crab permits, including IFQ, IPQ, federal crab fishing vessel, or RCR permits for the subsequent crab fishing year. If payment is not received by the 30th day after final agency action, the matter will be referred to the appropriate authorities for collection.
