## EVALUATION OF THE GRADUATE NURSE EDUCATION DEMONSTRATION PROGRAM

## QUANTITATIVE DATA COLLECTION PROTOCOL

(Contract No. CMMI-393-2012-0117)

February 25, 2013

Data Element Name	Definition and/or Instruction	Answer Value	Frequency of Collection	Response
Instructions	(1) This template should be completed for each academic period (e.g., quarter, semester) beginning		1	
	with Fall 2007.			
	(2) This template should be completed by those preceptors who train APRN students.			
	Preceptor Characteristics (from each clinical site and hospital, if appropriate)			
Hospital or Clinical Site Name:	1.'1.'(C.4.'.C(''1.1.1'TD1(1			
Year and Academic Period of	de-identify the information provided, please assign ID numbers to all preceptors)			
Reference				
Year and academic period of	Refers to the academic year and the semester/quarter for which the preceptor is responding to this survey	Year and quarter (fall,	Once each semester or quarter,	
reference		winter, spring) or year and	depending on the program's	
		semester (fall or spring)	structure	
Precepting Site				
Type of site and name of site where		Type (hospital or Clinical	Once each semester or quarter,	
preceptor trains students		site) and Name of the site	depending on the program's	
Profession		Choose One	structure	
Physician (MD or DO)	A physician is a professional who practices medicine, which is concerned with promoting, maintaining, or	Yes/No		
i hysician (MD of DO)	restoring human health through the study, diagnosis, and treatment of disease, injury, and other physical and	1 03/110		
	mental impairments. Physicians may focus their practice on certain disease categories, types of patients, or			
	methods of treatment (known as specialist medical practitioners) or assume responsibility for the provision		Once each semester or quarter,	
	of continuing and comprehensive medical care to individuals, families, and communities (known as general		depending on the program's	
	practitioners). Medical practice properly requires a detailed knowledge of the academic disciplines (such as		structure	
	anatomy and physiology), underlying diseases, and their treatment—the science of medicine—and a decent			
	competence in its applied practice, the art or craft of medicine.			
Dhysician's Assistant (DA)	Physician's assistants (PAs) are health care professionals licensed to practice medicine with physician	Yes/No		
Physician's Assistant (PA)	supervision. PAs employed by the federal government are credentialed to practice. As part of their	i es/No		
	comprehensive responsibilities, PAs conduct physical exams, diagnose and treat illnesses, order and		Once each semester or quarter,	
	interpret tests, counsel on preventive health care, assist in surgery, and (in virtually all states) write		depending on the program's	
	prescriptions. Within the physician-PA relationship, PAs exercise autonomy in medical decisionmaking and		structure	
	provide a broad range of diagnostic and therapeutic services. A PA's practice may also include education,			
	research, and administrative services.			
	From the "Consensus Model": "An APRN is a registered nurse who has completed a graduate degree or	Yes/No		
(APRN)	postgraduate program that has prepared him/her to practice in one of the four advanced practice roles (i.e.,			
	CRNA, CNM, CNS, or CNP). This includes the advanced knowledge and skills to provide direct patient		Once each competer or quester	
	care in the health promotion and maintenance of individuals." "APRN education must be formal education		Once each semester or quarter, depending on the program's	
	with a graduate degree or post-graduate certificate (either post-master's or post-doctoral) that is awarded by an academic institution and accredited by a nursing or nursing-related accrediting organization recognized		structure	
	by the U.S. Department of Education (USDE) and/or the Council for Higher Education Accreditation		Structure	
	(CHEA)" (pg 10). (www.aacn.nche.edu/education-resources/LACE_FAQ_8_11.pdf)			
Registered Nurse (RN)	A registered nurse is a graduate of an approved education program leading to a diploma, an associate	Yes/No	Once each semester or quarter	
	degree, or a bachelor's degree and also has met the requirements of experience and exam passage to be		depending on program	
0.1 1 '6	licensed in a given state.	TCHYZ H	structure

Location of First Employment After Graduation From APRN Program				
Rural or urban	The Census Bureau identifies two types of urban areas: Urbanized Areas (UAs) of 50,000 or more people; and Urban Clusters (UCs) of at least 2,500 and fewer than 50,000 people. The term "rural" encompasses all populations, housing, and territories not included within an urban area.	Number of graduating APRNs who, at graduation, had secured employment in locations: - Urban - Rural	Once each semester or quarter, depending on the program's structure	
Medically underserved area	From the Health Resources and Services Administration: "Medically Underserved Areas/Populations are areas or populations designated by HRSA as having: too few primary care providers, high infant mortality, high poverty and/or high elderly population. Health Professional Shortage Areas (HPSAs) are designated by HRSA as having shortages of primary medical care, dental or mental health providers and may be geographic (a county or service area), demographic (low income population), or institutional (comprehensive health center, federally qualified health center or other public facility)." (http://muafind.hrsa.gov/)	Number of graduating APRNs who, at graduation, had secured employment in medically underserved locations	Once each semester or quarter, depending on the program's structure

Location	The location information will be collected only once.			
City	,	Insert name of city	One time	
County		Insert name of county	One time	
State		Insert state two-letter abbreviation	One time	
Rural or urban	The Census Bureau identifies two types of urban areas: Urbanized Areas (UAs) of 50,000 or more people; and Urban Clusters (UCs) of at least 2,500 and fewer than 50,000 people. The term "rural" encompasses all population, housing, and territory not included within an urban area.	Urban/Rural	One time	
Inpatient Days by Type of Payer	"An inpatient is a person who has been admitted to a hospital for bed occupancy for purposes of receiving inpatient hospital services. Generally, a patient is considered an inpatient if formally admitted as inpatient with the expectation that he or she will remain at least overnight and occupy a bed even though it later develops that the patient can be discharged or transferred to another hospital and not actually use a hospital bed overnight." —CMS, IOMs, Publication 100-02, Chapter 1, Section 10			
Private	Percentage of total inpatient days paid for by private payers by semester. Measured in percentage of the total number of inpatient days for each semester, rounded to two decimal places.	XX.xx%	Every 6 months	
Medicare	Percentage of total inpatient days paid for by Medicare by semester. Measured in percentage of the total number of inpatient days for each semester, rounded to two decimal places.	XX.xx%	Every 6 months	
Medicaid	Percentage of total inpatient days paid for by Medicaid by semester. Measured in percentage of the total number of inpatient days for each semester, rounded to two decimal places.	XX.xx%	Every 6 months	
Other	Percentage of total inpatient days paid for by other sources (that are not private, Medicare, or Medicaid) by semester. Measured in percentage of the total number of inpatient days for each semester, rounded to two decimal places.	XX.xx%	Every 6 months	
Outpatient Visits by Type of Payer	There are two types of outpatient care:  1. An outpatient (or out-patient) is a patient who is not hospitalized for 24 hours or more but visits a hospital, clinic, or associated facility for diagnosis or treatment. Treatment provided in this fashion is called ambulatory care. Sometimes surgery is performed without the need for a formal hospital admission or an overnight stay. This is called outpatient surgery.  2. "The use of a bed for physician periodic monitoring and active monitoring by the hospital's nursing or other ancillary staff, for the patient care which are reasonable and necessary to evaluate an outpatient's condition or determine the need for an inpatient admission." —Novitas, Local Coverage Determination			
	(LCD) L27548			
Private	Percentage of total outpatient visits paid for by private payers by semester. Measured in percentage of the total number of outpatient visits for each semester, rounded to two decimal places.	XX.xx%	Every 6 months

	For profit: A business or other organization whose primary goal is making money (a profit), as opposed to a nonprofit organization that focuses on a goal, such as helping the community, and is concerned with making only as much money as necessary to keep the organization operating. Most companies considered to be businesses are for-profit organizations; this includes anything from retail stores to restaurants to insurance companies to real-estate companies.  Nonprofit private: Nonprofit health care organizations are primarily responsible and accountable to the communities and populations they serve. They are legally and ethically bound to "do good" for the	- For profit - Nonprofit private - Nonprofit public	One time	
For profit, nonprofit private, nonprofit public	benefit of their communities. Their governing bodies comprise leaders from the communities they serve. Rather than inuring to the benefit of private owners, the earnings and reserves of nonprofit health care organizations are reinvested to benefit the community. A portion of those investments is made to improve quality, service, and efficiency, usually in highly competitive environments. The remaining investments are made in a variety of community programs, services, or products that do not cover their costs to improve the health status of vulnerable populations and the broader community. A private nonprofit organization receives most of its funds from private sources.  Nonprofit public: A public nonprofit health care organization is a nonprofit health care organization that is funded wholly or in part by public sources, such as a city, county, tax district, or state.			
Did you lose accreditation in the last 10 years?	Did the hospital lose accreditation provided by The Joint Commission (TJC), formerly the Joint Commission on Accreditation of Healthcare Organizations (JCAHO), in the last 10 years?  Hospital accreditation: A self-assessment and external peer-assessment process used by health care organizations to accurately assess their level of performance in relation to established standards and to implement ways to continuously improve. Instructions	This template should be completed for each academic period						
	(e.g., quarter, semester) beginning with Fall 2007.						
	Characteristics of Partner Community-Based C	are Settings (CCSs)					
CCS Name:							
	Full-time employment is employment in which a person works a						
	minimum number of hours defined as such by his or her employer.						
	Full-time employment often comes with benefits that are not						
	typically offered to part-time, temporary, or flexible workers, such						
	as annual paid time off, sick leave, and health insurance. Full-time						
	jobs are often considered careers. They generally pay more than						
	part-time jobs and usually require more hours per week.						
Total Number of Preceptors							
•	The Fair Labor Standards Act (FLSA) does not define full-time						
	employment or part-time employment. This is a matter generally to						
	be determined by the employer (U.S. Department of Labor). The						
	definition by employer can vary and is generally published in a						
	company's employee handbook. Companies commonly require at						
	least 30-35 hours per week to be defined as a full-time employee						
	and therefore eligible for benefits.						
Number of full-time employees	Total number of full-time employees who are preceptors to APRN	7777 C 11 .	Once each semester or quarter,
