

Community policing is a philosophy that promotes organizational strategies, which support the systematic use of partnerships and problem-solving techniques, to proactively address the immediate conditions that give rise to public safety issues such as crime, social disorder, and fear of crime.

The Community Policing Self-Assessment Tool (CP-SAT) is designed to assess three key areas in community policing: community partnerships, problem solving, and organizational transformation. The three key areas of community policing included in this tool are described below.

- **COMMUNITY PARTNERSHIPS**
Collaborative partnerships between the law enforcement agency and the individuals and organizations they serve to develop solutions to problems and increase trust in police.
- **PROBLEM SOLVING**
The process of engaging in the proactive and systematic examination of identified problems to develop effective responses.
- **ORGANIZATIONAL TRANSFORMATION**
The alignment of organizational management, structure, personnel, and information systems to support community partnerships and proactive problem solving.

The majority of questions follow the same format. Please indicate your response by selecting the appropriate answer. You may skip any survey items you do not feel comfortable answering, but we encourage you to respond to as many items as possible.

Your responses to this survey will be kept confidential to the extent provided by law. There are no individual identifiers in the data that the agency will receive, and the agency will not be able to link an individual's data to their email address. This is not a test and there are no right or wrong answers. Please answer each question honestly.

1. Please choose the response that best indicates your level or relationship with the agency:

- Line officer
- First-line supervisor/Middle management
- Command staff
- Civilian staff
- Community partner

*If you do not work for the police agency, please select “**Community partner.**” A community partner is an individual who has, or works for an organization that has, formally agreed to work in a partnership with a law enforcement agency in the pursuit of common goals. Community partnerships involve a two-way relationship that involves collaboration, shared power, and shared decision-making with the law enforcement agency (e.g., media, business owner, city employee in Public Works department).*

*If you are a volunteer for the police agency who provides support services to the agency without monetary benefit, please select “**Civilian staff.**” Services a volunteer performs typically include community outreach, telephone work, research, and other administrative tasks.*

*If you are a detective or a member of a special operations unit (e.g., gang unit, SWAT, school resource officer), please select the level of sworn staff that best fits with your level in the agency. For example, please select “**First-line supervisor/Middle management**” if you are a supervisor, but select “**Line officer**” if you have a non-supervisory position in your unit.*
