

Appendix J Cooling Matching WK

Cooling Source and Equipment Matching

Instructions: Circle energy sources and equipment used. Draw a line between each source and the equipment that uses it. More than one source can be used for each equipment, and one source can be used for multiple equipment types.

Cooling Energy Source

Electricity

Natural gas

Fuel oil/Diesel/Kerosene

Bottled gas

District steam piped in from a separate building or utility

District chilled water piped in from a separate building or utility

Some other energy source:

Cooling Equipment Type

Residential type central air conditioner

Packaged air conditioning unit

Central chiller

Heat pumps for cooling

Individual room air conditioners (other than heat pumps)

"Swamp" coolers or evaporative coolers

Fan coil units

Central air handlers

Chilled beam

Other cooling equipment:
