## **Cognitive Research for Proposed Modifications to Form EIA-64A**

### **PURPOSE:**

The U.S. Energy Information Administration (EIA) is considering changes to Form EIA-64A and requests approval to conduct research on the ability of EIA survey respondents to report information on NGL production and electricity usage at natural gas processing activities. Form EIA-64A, “Annual Report of the Origin of Natural Gas Liquids Production” collects information on the annual volumes of natural gas received, and natural gas liquids extracted at gas processing plants by source gas fields, i.e., areas of origin. It also includes the total gas shrinkage resulting from the natural gas liquids extracted and the annual volume of natural gas utilized as fuel at the gas processing plants. The changes that EIA seeks to propose are designed to simplify the reporting of information on the natural gas liquids extracted from the wet gas by the source wells (area of origin). This research will collect information on whether these changes reduce reporting burden

EIA will also collect information from the interviews to assess the current reporting burden on Form EIA-63A respondents and any modifications to the burden per response estimate based on a re-design of the survey from.

### **DESCRIPTION OF RESPONDENTS:**

4. It uses plain, coherent, and unambiguous language that is understandable to respondents.
5. Its implementation will be consistent and compatible with current reporting and recordkeeping practices.
6. It indicates the retention periods for recordkeeping requirements.
7. It informs respondents of the information called for under 5 CFR 1320.8 (b)(3) about:
  - i. Why the information is being collected;
  - ii. Use of information;
  - iii. Burden estimate;

- v. Nature and extent of confidentiality; and
  - vi. Need to display currently valid OMB control number
8. It was developed by an office that has planned and allocated resources for the efficient and effective management and use of the information to be collected.
  9. It uses effective and efficient statistical survey methodology (if applicable).
  10. It makes appropriate use of information technology.

To assist review, please provide answers to the following questions:

**Personally Identifiable Information:**

1. Is personally identifiable information (PII) collected?  Yes  No
2. If Yes, will any information that is collected be included in records that are subject to the Privacy Act of 1974?  Yes  No
3. If Yes, has an up-to-date System of Records Notice (SORN) been published?  Yes  No

**Gifts or Payments:**

Is an incentive (e.g., money or reimbursement of expenses, token of appreciation) provided to participants?  Y  No

**BURDEN HOURS**

Category of Respondent	No. of Respondents	Participation Time (hours)	Burden Hours
EIA-64A Respondents	15	1	15
<b>Totals</b>	<b>15</b>	<b>1</b>	<b>15</b>

**ESTIMATE OF RESPONDENT BURDEN HOURS AND COST:** The burden to respondents is 15 hours and the cost to the respondents is estimated to be (\$75.69\*15) = \$1,135.35

**FEDERAL COST:** The estimated annual cost to the Federal government is: \$7,500. Two field trips involving 3 staff total transportation and housing costs estimated at \$3,750 per trip. Each trip based on 5 day travel period.

**If you are conducting a focus group, survey, or plan to employ statistical methods, please provide answers to the following questions:**

**The selection of your targeted respondents**

1. Do you have a customer list or something similar that defines the universe of potential respondents and do you have a sampling plan for selecting from this universe?  
 Yes  No

If the answer is yes, please provide a description of both below (or attach the sampling plan)? If the answer is no, please provide a description of how you plan to identify your potential group of respondents and how you will select them?

EIA will recruit respondents to participate in cognitive research by contacting active companies listed in the current frame file for Forms EIA-64A (~514 respondents).

Respondents will be selected from different geographic regions and sizes of their production capacities to ensure adequate market coverage across large and small sized facilities. The selection of respondents will also be stratified based on the number of source fields that supply a single gas plant. Respondents with more than 2 source fields supplying their plant will be targeted since they potentially may have more complicated reporting requirements. EIA plans to conduct cognitive interviews, both telephone and onsite visits, with respondents to these surveys. The onsite cognitive interviews will be the primary research tool. EIA will solicit interviews with gas plants along the East Coast, Gulf Coast, Midwest, Rocky Mountain States, and along the West Coast. Depending on the responses to the requests for in person interviews across the three regions, EIA will supplement the research with telephone cognitive interviews, to provide EIA with adequate assessment of the capabilities of survey respondents.
