

# **ENERGY STAR® Application for Certification**

100

ENERGY STAR ® Score<sup>1</sup>

#### **TEST**

Registry Name: TEST Primary Function: Office Gross Floor Area (ft²): 20,000

**Built: 197** 

For Year Ending: 08/31/2015<sup>2</sup>

**Date Application Becomes Ineligible: 12/29/2015** 

- 1. The ENERGY STAR Score is based on total source energy. A score of 75 is the minimum to be eligible for the ENERGY STAR.
- 2. Applications must be submitted to EPA within 120 days of the Year Ending Date. The award is not final until approval is received from EPA.

Please use the <u>Licensed Professional's Guide to the ENERGY STAR ® for Commercial Buildings</u> for reference in completing this checklist (http://www.energystar.gov/lpguide).

### 1. Review of Whole Property Characteristics

Basic Property Information		
Property Name for Registry: TEST  Is this the official name to be displayed in the Registry of ENERGY STAR Certified Buildings and Plants?	☐ Yes	□ No
If "No", please specify:  2) Primary Function: Office  Is this an accurate description of the primary use of this property?	☐ Yes	□No

OMB No. 2060-0347

3) Location:	☐Yes	□No
53 Perimeter Street East	□	
TEST CITY, Georgia 30346		
Is this correct and complete?		
4) Gross Floor Area: 20,000 ft <sup>2</sup>	□ Vaa	□No
Does this represent the entire property? (i.e., no part of the building/property was excluded/subtracted from the total) If "no" please specify what space has been excluded.	☐ Yes	□No
5) Average Occupancy: 70		
Is this occupancy accurate for the entire 12 month period being assessed?	Yes Yes	∐ No
6) Number of Buildings: 1	Yes	□No
Does this number accurately represent all structures?	_	<u> </u>
Indoor Environmental Standards		
Indoor Environmental Standards  1) Ventilation for Acceptable Indoor Air Quality	□Vec	
	☐Yes	□No
Ventilation for Acceptable Indoor Air Quality  Does this property meet the ASHRAE Standard 62 for ventilation for acceptable indoor		
Ventilation for Acceptable Indoor Air Quality  Does this property meet the ASHRAE Standard 62 for ventilation for acceptable indoor air quality?	☐ Yes	No
<ol> <li>Ventilation for Acceptable Indoor Air Quality         Does this property meet the ASHRAE Standard 62 for ventilation for acceptable indoor air quality?     </li> <li>Acceptable Thermal Environmental Conditions</li> </ol>	Yes	No
<ol> <li>Ventilation for Acceptable Indoor Air Quality         Does this property meet the ASHRAE Standard 62 for ventilation for acceptable indoor air quality?     </li> <li>Acceptable Thermal Environmental Conditions         Does this property meet the ASHRAE Standard 55 for thermal comfort?     </li> </ol>		
<ol> <li>Ventilation for Acceptable Indoor Air Quality         Does this property meet the ASHRAE Standard 62 for ventilation for acceptable indoor air quality?     </li> <li>Acceptable Thermal Environmental Conditions         Does this property meet the ASHRAE Standard 55 for thermal comfort?     </li> <li>Adequate Illumination</li> </ol>	Yes	No

## 2. Review of Property Use Details

Office: Building Use		
This Use Detail is used to calculate the 1-100 ENERGY STAR Score.		
★1) Gross Floor Area: 20,000 ft²		
Is this the total size, as measured between the principal exterior surfaces of the enclosing fixed walls of the building(s)? This includes all areas inside the building(s) such as: occupied tenant areas, common areas, meeting areas, break rooms, restrooms, elevator shafts, mechanical equipment areas, and storage rooms. Gross Floor Area should not include interstitial plenum space between floors, which may house pipes and ventilation. Gross Floor Area is not the same as rentable, but rather includes all area inside the building(s). Leasable space would be a sub-set of Gross Floor Area. In the case where there is an atrium, you should count the Gross Floor Area at the base level only. Do not increase the size to accommodate open atrium space at higher levels. The Gross Floor Area should not include any exterior spaces such as balconies or exterior loading docks and driveways.	Yes	□No
2) Weekly Operating Hours: 66		
Is this the total number of hours per week that the property is occupied by the majority of the employees? It does not include hours when the property is occupied only by maintenance, security, or other support personnel. The Weekly Operating Hours is not the same as the hours during which the HVAC equipment is run, but rather should be based on the hours during which your property is actually occupied by the majority of the tenants. It is possible that these hours may correspond to hours specified within a lease, during which the owner is required to provide the leasee with conditioned space. However, this number should never include additional HVAC startup or shutdown time. For properties with a schedule that varies during the year, Weekly Operating Hours refers to the schedule most often followed.	Yes	□No
<b>☆ 3) Number of Workers on Main Shift:</b> 301		
Is this the total number of workers present during the primary shift? This is not a total count of workers, but rather a count of workers who are present at the same time. For example, if there are two daily eight hour shifts of 100 workers each, the Number of Workers on Main Shift value is 100. Number of Workers on Main Shift may include employees of the property, sub-contractors who are onsite regularly, and volunteers who perform regular onsite tasks. Number of Workers should not include visitors to the buildings such as clients, customers, or patients.	Yes	□No
<b>★ 4) Number of Computers:</b> 333		
Is this the total number of computers, laptops, and data servers at the property? This number should not include tablet computers, such as iPads, or any other types of office equipment.	☐ Yes	□No
<b>★ 5)</b> Percent That Can Be Heated: 100		
Is this the total percentage of the property that can be heated by mechanical equipment?	Yes	☐ No
<b>★ 6) Percent That Can Be Cooled:</b> 100		
Is this the total percentage of the property that can be cooled by mechanical equipment? This includes all types of cooling from central air to individual window units.	☐ Yes	□No

OMB No. 2060-0347

Notes:		
Parking: Parking Use		
This Use Detail is used to calculate the 1-100 ENERGY STAR Score.		
<b>↑ 1) Open Parking Lot Size:</b> 144,840 ft²		
Is this the total area that is lit and used for parking vehicles? Open Parking Lot Size refers specifically to open area, which may include small shading covers but does not include any full structures with roofs. Parking lot size may include the area of parking spots, lanes, and driveways.	Yes	□No
2) Partially Enclosed Parking Garage Size: 0 ft <sup>2</sup>		
Is this the total area of parking structures that are partially enclosed? This includes parking garages where each level is covered at the top, but the walls are partially or fully open.	☐ Yes	□No
<b>☆ 3) Completely Enclosed Parking Garage Size</b> : 0 ft²		
Is this the total area of parking structures that are completely enclosed on all four sides and have a roof? This includes underground parking or fully enclosed parking on the first few stories of a building.	☐ Yes	□No
<b>★ 4) Supplemental Heating:</b> No		
Does the parking garage have a heating system to pre-heat ventilation air and/or maintain a minimum temperature during winter months?	Yes	□No
Notes:		

## 3. Review of Energy Consumption

Data Overview				
Site Energy Use Summary		National Median Comparison		
Electric - Grid (kBtu)	4,094.4 (100%)	National Median Site EUI (kBtu/ft²)	130.3	
Total Energy (kBtu)	4,094.4	National Median Source EUI (kBtu/ft²)	409.3	

OMB No. 2060-0347

Energy Intensity
