We would also like the CATI program to include a variable indicating when a pop-up help option is used.

All items with an asterisk “\*” are new. Any statements in brackets “[...]” are only read aloud if necessary. Any items in angled brackets “<...>” should not be read aloud if respondent says “Yes” before examples are provided; if respondent responds “No” before examples are provided, read examples. For the pilot, time to complete will be recorded for each Core and Module, as well as time to complete a select portion of individual questions. Questions that will be individually timed are marked with a plus sign “+”. Additional help language will be developed/refined from the 2012 SPPA interviewer manual and additional cognitive testing.

---

<sup>1</sup> Because the pilot study will be an independent study, additional demographic questions will need to be asked **prior to entering** into the SPPA. These questions will be taken directly from the Census Bureau’s Current Population Survey (CPS). We will include items for age, gender, race, ethnicity, education, number of children in the home, and ages of children in the home.
