**Instructions for the
Capital Assessments and Stress Testing information collection
(Reporting Form FR Y-14M)**

This Report is required by law: section 165 of the Dodd-Frank Act (12 U.S.C. § 5365) and section 5 of the Bank Holding Company Act (12 U.S.C. § 1844). Public reporting burden for this information collection is estimated to be approximately 515 hours per response, including time to gather and maintain data in the required form and to review instructions and complete the information collection. Comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing the burden, may be sent to Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW, Washington, DC 20551, and to the Office of Management and Budget, Paperwork Reduction Project (7100-0341), Washington, DC 20503.

INSTRUCTIONS FOR PREPARATION OF **Capital Assessments and Stress Testing Report** **FR Y-14M**

General Instructions

The Capital Assessments and Stress Testing Report (FR Y-14M report) collects detailed data on bank holding companies' (BHCs) loan portfolios, which will be used to support supervisory stress testing models and for continuous monitoring efforts. The FR Y-14M report is comprised of three loan- and portfolio-level collections, and one detailed address matching collection. These consist of Domestic First Lien Closed-end 1-4 Family Residential Loan, Domestic Home Equity, Address Matching, and Domestic Credit Card data collections. The number of schedules a BHC must complete is subject to materiality thresholds and certain other criteria.

The FRY-14M report instructions are in data dictionary format. The individual report instructions contain specifications of line item names and formats, item descriptions, and indicate whether items are mandatory or optional. For information regarding technical specifications please see "How to Prepare the Reports" below, as well as the general instructions for individual collections.

Who Must Report

A. Reporting Criteria

Bank holding companies (BHCs) with total consolidated assets of \$50 billion or more, as defined by the capital plan rule (12 CFR 225.8), are required to submit the Capital Assessment and Stress Testing report (FR Y-14A/Q/M) to the Federal Reserve. The capital plan rule defines total consolidated assets as the average of the company's total consolidated assets over the course of the previous four calendar quarters, as reflected on the BHC's Consolidated Financial Statement for Bank Holding Companies (FR Y-9C). Total assets shall be calculated based on the due date of the bank holding company's most recent FR Y-9C. If the BHC has not filed an FR Y-9C for each of the four most recent quarters, the average of the BHC's total consolidated assets in the most recent consecutive quarters as reported quarterly on the BHC's FR Y-9C should be used in the calculation.

Certain data elements within the schedules are subject to materiality thresholds. The instructions to these data schedules provide details on how to determine whether a BHC must submit a specific data collection or data element. Material portfolios are defined as those with asset balances greater than five billion or asset balances greater than five percent of Tier 1 capital on average for the four quarters preceding the reporting quarter. For schedules that require the institutions to report information on serviced loans, the materiality threshold is based on the asset balances associated with the BHC's owned portfolio. All data used to determine materiality should be measured as of the close of business of the last calendar day of the quarter, and assets included in a given portfolio are defined in the instructions for each schedule. BHCs also have the option to complete the data schedules for immaterial portfolios.

B. Exemptions

BHCs that do not meet the reporting criteria listed above are exempt from reporting. The following institutions are also exempt:

- (1) BHCs, savings and loan holding companies (SLHCs) and state member banks (SMBs) with average total consolidated assets of greater than \$10 billion but less than \$50 billion subject to the final rule on annual company-run stress tests (12 CFR 252(h)) are not required to file this report. However, institutions meeting this threshold should review the reporting requirements and instructions for the Annual Company-Run Stress Test Projections (FR Y-16) on the Board's public website.
- (2) SLHCs are currently not required to comply with FR Y-14 reporting requirements. Further information regarding reporting for SLHCs will be provided in the future.¹

Where to Submit the Reports

All bank holding companies subject to these reporting requirements must submit their completed reports electronically. Bank holding companies will be provided information on how to transmit data directly to the Federal Reserve or to the Federal Reserve through data aggregators.

When to Submit the Reports

BHCs must file the FR Y-14M schedules monthly as-of the last business day of each calendar month. The reported data is to be submitted by the 30th calendar day after the last business day of the preceding calendar month. All submissions will be due on or before the end of the submission date (unless that day falls on a weekend (subject to timely filing provisions)).

If the submission date falls on a weekend or holiday, the data must be received on the first business day after the weekend or holiday. No other extensions of time for submitting reports will be granted. Early submission, including submission of schedules on a flow basis prior to the due date, aids the Federal Reserve in reviewing and processing data and is encouraged.

For new reporters of the FR Y-14M schedules, the initial deadline will be 90 days after the end of the reporting month, at which time data for all three intervening months would be due. For example, a new respondent for the September 30 reporting period will be expected to submit data corresponding to the September 30, October 31, and November 30 reporting periods by December 31.

How to Prepare the Reports:

A. Applicability of GAAP

BHCs are required to prepare and file the FR Y-14M schedules in accordance with generally accepted accounting principles (GAAP) and these instructions. The financial records of the BHCs should be maintained in such a manner and scope to ensure the FR Y-14M is prepared in accordance with these

¹ SLHCs would not be subject to Dodd-Frank annual company-run stress testing requirements until the next calendar year after the SLHCs become subject to regulatory capital requirements.

instructions and reflects a fair presentation of the BHCs' financial condition and assessment of performance under stressed scenarios.

B. Rules of Consolidation

Please reference the FR Y-9C General Instructions for a discussion regarding the rules of consolidation.

C. Technical Details

The following instructions apply generally to the FR Y-14M schedules, unless otherwise specified. Please refer to the general instructions for each data dictionary and data collection for further information on the technical specifications.

- Ensure that any internal consistency checks are complete prior to submission.
- Dates should be entered in an YYYYMMDD format (unless otherwise indicated).
- Report negative numbers with a minus sign (-).
- An amount, zero or null should be entered for all items, except in those cases where other options such as “not available” or “other” are specified. If information is not available or not applicable and no such options are offered, the line item should be left blank.
- In the case of the First Lien, Home Equity, and Address Matching Schedules, the BHCs should provide the data each month in a single pipe-delimited text file. Line items should be delimited with a vertical bar (|, ASCII decimal 124, ASCII hexadecimal 7C).

D. Other Instructional Guidance

BHCs should review the following published documents (in the order listed below) when determining the precise definition to be used in completing the schedules. Where applicable, references to the FR Y-9C have been provided in the instructions and templates noting associations between the reporting series.

- 1) The FR Y-14M instructions;
- 2) The FR Y-14Q/A instructions;
- 3) The latest available FR Y-9C instructions published on the Federal Reserve's public web site: <http://www.federalreserve.gov/reportforms>;

E. Confidentiality

As these data will be collected as part of the supervisory process, they are subject to confidential treatment under exemption 8 of the Freedom of Information Act. 5 U.S.C. 552(b)(8). In addition, commercial and financial information contained in these information collections may be exempt from disclosure under Exemption 4.5 U.S.C. 552(b)(4). Disclosure determinations would be made on a case-by-case basis.

F. Amended Reports

The Federal Reserve will require the filing of amended reports if previous submissions contain significant errors. In addition, a reporting institution must file an amended report when it or the Federal Reserve discovers significant errors or omissions subsequent to submission of a report. Failure to file amended reports on a timely basis may subject the institution to supervisory action.

If resubmissions are required, institutions should contact the appropriate Reserve Bank, as well as the FR Y-14 mailbox at info@ccar.frb.org, and resubmit data via the Intralinks website.

G. Legal Considerations for International Exposures

A BHC is not required to report a particular data item if a foreign law prohibits the BHC from providing the information to the Federal Reserve. However, the Federal Reserve is authorized by law to collect information from a BHC regarding its exposures, including foreign exposures.

A BHC must include with its data submission a legal analysis of the foreign law that prohibits reporting the data to the Federal Reserve. The legal analysis must include, but is not limited to: a detailed description and analysis of the law(s) prohibiting the reporting of the information to the Federal Reserve, a summary description of the exposures omitted, any other information the BHC deems relevant to justifying omission of the data from the report, and any additional information required by the Federal Reserve.

H. Questions and Requests for Interpretations

BHCs should submit any questions or requests for interpretations by e-mail to info@CCAR.frb.org.

Definition of Commercially Available Credit Bureau Score:

For the purposes of the FR Y-14M, a credit score is a numerical value or a categorization derived from a statistical tool or modeling system that characterizes the credit risk of a borrower used by a person who makes or arranges a loan to predict the likelihood of credit default. A credit bureau score is a credit score based solely on the borrower's credit history available through one of the three national credit reporting agencies (Equifax, Experian, and TransUnion).

A commercially available credit bureau score is a credit bureau score which is available to all commercial lenders. For example, FICO 08 and VantageScore 3.0 are commercially available credit scores, while internally developed credit scores and custom scores tailored to a lender's own portfolio and provided by third parties are not commercially available credit scores.

For a commercially available credit bureau score to qualify for submission in this schedule, the Federal Reserve must be able to obtain sufficient information from the credit score vendor to (a) determine whether the credit score is empirically derived and demonstrably sound (b) evaluate the performance of the credit score and (c) compare that performance to other commercially available credit bureau scores. The Federal Reserve reserves the right to determine whether a credit score qualifies as a commercially available credit bureau score for the purposes of this schedule.

Most Recent Capital Framework:

For all items and instructions related to regulatory capital, particularly where the "most recent capital framework" is referenced, respondents should refer to 12 CFR parts 208, 217, and 225.

Schedule A: Domestic First Lien Closed-end 1-4 Family Residential Loan Data Dictionary

Loan Population

- The relevant loan population includes all loans directly held on the BHC's portfolio and all loans serviced by the BHC in that period. Loans should be reported based on their classification on the FR Y-9C, Schedule HC-C (i.e. based on the loans security, counterparty, or purpose). Refer to the FR Y-9C instructions for Schedule HC-C for guidance on loan classification. Please note, lien status (first, junior, etc.) is considered an origination attribute. Below is a list of FR Y-9C items that are considered applicable loans for this schedule:
 - Portfolio loans are defined as all loans meeting the definition of FR Y-9C, Schedule HC-C, item 1.c.(2)(a) (first lien closed-end loans secured by 1-4 family residential real estate).
 - Serviced loans include those meeting the definition of first lien loans reported in FR Y-9C, Schedule HC-S, item 1 column A, Schedule HC-S item M.2.a, Schedule HC-S, item M.2.b, Schedule HC-S, item M.2.c, and Schedule HC-S, item M.2.d.
- In addition to loans that are currently active during the reporting period, the following loans should also be included:
 - All inventory that has been transferred to another servicer, but only if transferred during the reporting month.
 - All inventory that was liquidated, but only if liquidated during the reporting month. For purposes of this schedule, liquidated is defined as inventory that has been sold or has been otherwise disposed of.
- Starting with the March 2013 data submission, BHCs are required to continue reporting data on loans which become Real Estate Owned (REO). If a loan is submitted under the FR Y-14M First Lien data schedule through a certain period and becomes an REO, then this loan will be reported through the time the loan terminates as a REO sale or otherwise. BHCs are required to report all REO loans – either serviced by them or sub-serviced by other institutions on their behalf. However, REO balances should not be included in the Portfolio Level Table.
- Please note that BHCs will continue to report data on the loans which become REO loans using a consistent loan number throughout the history of the loan. Please ensure that the loan number, once assigned to a loan, is not changed as a result of sub servicing or any related aspects.
- For loans secured by multiple pieces of collateral, only report the loan as REO when all the collateral backing the loan has become REO and the loan has been terminated.
- For commercial real estate (CRE) or business purpose loans collateralized by multiple 1-4 family residential properties, place values to the best of your ability.
- If the loan is a commercial purpose loan then only report attributes that are unique to the facility as a whole.
- For loans serviced for others, report the full outstanding balance on the loan. Participated loans should be included in this schedule and institutions should report the total loan balance as bank owned.
- For all line items, institutions should enter an amount, enter zero, or leave blank except in those cases where other options such as “not available” or “other” are specified. If information is not available or not applicable and no such options are offered, the line item should be left blank.
- We require that a loan number uniquely identify a loan through its entire life. If a BHC is also submitting data to the OCC as part of the OCC Mortgage Metrics Data or OCC Home Equity Data, it is

required that the BHC use the same loan number for the FR Y-14M data schedules for all loans that are being reported for the first time in the current reporting period. In the case that a BHC has been submitting different loan numbers for the same loan in the FR Y-14M collection versus OCC data collection, the BHC should continue reporting using the same loan numbers as they have been submitting for the FR Y-14M submissions. There may be instances where the FR Y-14M data population includes additional loans which are not part of the OCC data sample, and for such loans a unique loan number should be reported. Overall, the data file sent by a BHC should have unique loan numbers across the entire submission.

Additional Formatting

- The collection includes both loan level and portfolio level variables.
- The institutions should provide the loan level data each month in a single text file. This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per active loan in the contributor’s inventory.
- Institutions should provide a separate text file for the portfolio level variables. This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per portfolio segment. Portfolio segments are defined as:
 1. **Serviced** – All serviced loans.
 2. **Portfolio HFI Purchased Impaired** – All portfolio loans/lines acquired with deteriorated credit quality and accounted for in accordance with ASC subtopic 310-30 (formerly AICPA statement of position 03-3), as defined in the FR Y-9C, Schedule HC-C, item M.5.
 3. **Portfolio HFI FVO / HFS** – All portfolio loans held for investment measured at fair value under a fair value option or held for sale.
 4. **Other Portfolio** – All portfolio loans that are not measured at fair value, not purchase impaired, and not serviced.
- Options for all line items are comprehensive in identifying a valid value for all loans regardless of status. If a mandatory line item is unknown or unavailable and the line item definition does not indicate ‘Unknown’ as a valid line item option, the line item should be left blank and it will be treated as missing data. Also, if a line item does not apply to the loan, the line item should be left blank.
- For loan level variables representing monetary value please use the U.S. Dollar (\$) as the reporting monetary unit.
- For portfolio level variables representing monetary value please use millions of dollars (\$ Millions) as the reporting monetary unit.
- Optional and best efforts line items are noted in the instructions in the table below.
- No quotation marks should be used as text identifiers.
- Please do not provide a header row.
- For any line item with a format of ‘character’, please provide the code values as listed in the data dictionary. Do not add a leading or trailing zero or any other character to the data unless specified. It is required that the data formats and code values as listed in this document be strictly followed.
 - Example: For a data item defined as Character (2), if the respondent is to report the value ‘1’, then the respondent should submit only the character ‘1.’ The respondent should not submit ‘01’, ‘<space>1’, ‘1<space>’, or any other combination that includes a second character.

- Inactive inventory that was paid off in one manner or another (servicing transfer, involuntary liquidation or paid-in-full by borrower) before the beginning of the reporting month should not be included. REO loans as described above will now be included in the data. This holds even if the REO loans were transferred to another servicer.
- The tables on the following pages give more information regarding the line items that should be contained in each of the files.

File Naming Convention:

BHCs must use the following naming convention when submitting data files to the data aggregator.

FRY14_FIRSTLIEN_LOANLEVEL_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

FRY14_FIRSTLIEN_PORTFOLIOLEVEL_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

SUBMISSION_NUMBER will be used to track revisions and resubmissions of this schedule. It must be populated as a two-digit number. For example, the first submission for a given period would have a submission number of '01.' If the BHC has to resubmit the same file, then use '02' for the next submission, and so on.

In the case of the First Lien Schedule, BHCs should provide the data each month in a single pipe-delimited text file. Line items should be delimited with a vertical bar ('|', ASCII decimal 124, ASCII hexadecimal 7C).

Example:

Institution A has ID_RSSD equal to 999999. For the First Lien Loan level data file submitted for period 201206, the file would be named as FRY14_FIRSTLIEN_LOANLEVEL_999999_201206_01.TXT. Any subsequent revised First Lien Loan level file submitted by the institution for the same period will be named as FRY14_FIRSTLIEN_LOANLEVEL_999999_201206_02.TXT, and so on

Schedule B: Domestic Home Equity Loan and Home Equity Line Data Dictionary

Loan Population

- The relevant loan population includes all loans directly held on the BHC's portfolio and all loans serviced by the BHC in that period. Loans should be reported based on their classification on the FR Y-9C, Schedule HC-C (i.e. based on the loans security, counterparty, or purpose). Refer to the FR Y-9C instructions for Schedule HC-C for guidance on loan classification. Please note, lien status (first, junior, etc.) is considered an origination attribute. Below is a list of FR Y-9C items that are considered applicable loans for this schedule:
 - Portfolio loans/lines are defined as all loans meeting the definition of FR Y-9C, Schedule HC-C, items 1.c.(1) (revolving, open-end loan secured by 1-4 family residential properties and extended lines of credit) and 1.c.(2)(b) (junior lien closed-end loans secured by 1-4 family residential real estate) shall be reported.
 - Serviced loans/lines include those meeting the definition of home equity loans/lines reported in FR Y-9C, Schedule HC-S, item 1.(columns A and B), Schedule HC-S item M.2.a, Schedule HC-S, item M.2.b, HC-S, item M.2.c, and Schedule HC-S, item M.2.d.
- Continue reporting the HELOCs in the Y-14M Home Equity schedule even after they have entered into a pay down status and are no longer revolving credits. The line type at origination determines where the exposure should be reported.
- If a second lien closed-end mortgage becomes a first lien during the life of the loan, continue to report the loan under the FR Y-14M Home Equity schedule. Lien position at origination should be used to decide which schedule to use in closed-end loan reporting.
- In addition to loans that are currently active during the reporting period, the following loans should also be included:
 - All inventory that has been transferred to another servicer, but only if transferred during the reporting month.
 - All inventory that was liquidated, but only if liquidated during the reporting month. For purposes of this schedule, liquidated is defined as inventory that has been sold or has been otherwise disposed of.
- Starting with the March 2013 data submission, BHCs are required to continue reporting data on loans which become Real Estate Owned (REO). If a loan is submitted under the FR Y-14M Home Equity data schedule through a certain period and becomes an REO, then this loan will be reported through the time the loan terminates as a REO sale or otherwise. BHCs are required to report all REO loans – either serviced by them or sub-serviced by other institutions on their behalf. However, REO balances should not be included in the Portfolio Level Table.
- Please note that BHCs will continue to report data on the loans which become REO loans using the same consistent loan number throughout the history of the loan. Please ensure that the loan numbers once assigned to a loan is not changed as a result of sub servicing or any related aspects.
- For loans secured by multiple pieces of collateral, only report the loan as REO when all the collateral backing the loan has become REO and the loan has been terminated.
- For commercial real estate (CRE) or business purpose loans collateralized by properties, place values to the best of your ability.
- If the loan is a commercial purpose loan then only report attributes that are unique to the facility as a whole.
- For loans serviced for others, report the full outstanding balance on the loan. Participated loans should be included in this schedule and institutions should report the total loan balance as bank owned.

- An amount, zero or null (be left blank) should be entered for all items, except in those cases where other options such as “not available” or “other” are specified. If information is not available or not applicable and no such options are offered, the line item should be left blank.
- We require that a loan number uniquely identify a loan through its entire life. If a BHC is also submitting data to the OCC as part of the OCC Mortgage Metrics Data or OCC Home Equity Data, it is required that the BHC use the same loan number for the FR Y-14M data schedules for all loans that are being reported for the first time in the current reporting period. In the case that a BHC has been submitting different loan numbers for the same loan in the FR Y-14M collection versus OCC data collection, the BHC should continue reporting using the same loan numbers as they have been submitting for the FR Y-14M submissions. There may be instances where the FR Y-14M data population includes additional loans which are not part of the OCC data sample, and for such loans a unique loan number should be reported. Overall, the data file sent by a BHC should have unique loan numbers across the entire submission.

Additional Formatting

- The collection includes both loan/line level and portfolio level variables.
- The institutions should provide the loan/line level data each month in a single text file. This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per active loan/line in the contributor’s inventory.
- Institutions should provide a separate text file for the portfolio level variables. This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per portfolio segment. Portfolio segments are defined as:
 1. **Serviced** – All serviced loans/lines.
 2. **Portfolio HFI Purchased Impaired** – All portfolio loans/lines acquired with deteriorated credit quality and accounted for in accordance with ASC subtopic 310-30 (formerly AICPA statement of position 03-3), as defined in the FR Y-9C, Schedule HC-C, item M.5.
 3. **Portfolio HFI FVO / HFS** – All portfolio loans/lines held for investment measured at fair value under a fair value option or held for sale.
 4. **Other Portfolio** – All portfolio loans/lines that are not measured at fair value, not purchase impaired, and not serviced.
- Options for all line items are comprehensive in identifying a valid value for all loans regardless of status. If a mandatory line item is unknown or unavailable and the line item definition does not indicate ‘Unknown’ as a valid line item option, the line item should be left blank and it will be treated as missing data. Also, if a line item does not apply to the loan, the line item should be left blank.
- For loan/line level variables representing monetary value please use the U.S. Dollar (\$) as the reporting monetary unit.
- For portfolio level variables representing monetary value please use millions of dollars (\$ Millions) as the reporting monetary unit. For any line item with a format of ‘character’, please provide the code values as listed in the data dictionary. Do not add a leading or trailing zero or any other character to the data unless specified. It is required that the data formats and code values as listed in this document be strictly followed.
 - Example: A variable listed as Character(2) with a data value of 1 will be made available with a value of 1. It will not be coded as 01 or <space1> or <1space> or any other combination.
 Optional and best efforts line items are noted in the instructions in the table below.
- No quotation marks should be used as text identifiers.
- Please do not provide a header row.

- Inactive inventory that was paid off in one manner or another (servicing transfer, involuntary liquidation or paid-in-full by borrower) before the beginning of the reporting month should not be included. REO loans as described above will now be included in the data. This holds even if the REO loans were transferred to another servicer.
- The tables on the following pages give more information the line items that should be contained in each of the files.

File Naming Convention:

BHCs must use the following naming convention when submitting data files to the data aggregator.

FRY14_HOMEEQUITY_LOANLEVEL_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

FRY14_HOMEEQUITY_PORTFOLIOLEVEL_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

SUBMISSION_NUMBER will be used to track revisions and resubmissions of this schedule. It must be populated as a two-digit number. For example, the first submission for a given period would have a submission number of '01.' If the BHC has to resubmit the same file, then use '02' for the next submission, and so on.

In the case of the Home Equity Schedule, BHCs should provide the data each month in a single pipe-delimited text file. Line items should be delimited with a vertical bar (|, ASCII decimal 124, ASCII hexadecimal 7C).

Example:

Institution A has ID_RSSD equal to 999999. For the Home Equity Loan level data file submitted for period 201206, the file would be named as FRY14_HOMEEQUITY_LOANLEVEL_999999_201206_01.TXT. Any subsequent revised Home Equity Loan level file submitted by the institution for the same period will be named as FRY14_HOMEEQUITY_LOANLEVEL_999999_201206_02.TXT, and so on.

B.1 Loan/Line Level Table

Line Item No.	Line Item Name	MDRM (CCHE)	Detailed Description	Allowed Values	Format, Line Item Length
1	Loan Number	M142	<p>Loan Number – Report an identifier for a loan that will be the same from month to month. Reference numbers may be used in lieu of actual loan numbers as long as it meets these criteria.</p> <p>An identifier for this loan that will be the same from month to month. It must identify the loan for its entire life and must be unique (piggy-backs should be separated).</p> <p>If the BHC is already submitting data to the OCC as part of the OCC Mortgage Metrics Data or OCC Home Equity Data, it is required that the BHC use the same loan number for the FR Y-14M data schedules. However, if a BHC has already been submitting different loan numbers for the same loan for the FR Y-14M and the OCC collections, the BHC should continue submitting the same loan number it has been using for the FR Y-14M.</p> <p>Please note that the FR Y-14M data population may include additional loans, which may not be part of the OCC data sample, and for such loans the general requirements listed in the schedule instructions will be applicable. 4	Property State	9200	Property State – Report the state in which the property is located. If a loan is secured by two properties in different states and is flagged as a commercial loan in the Commercial Loan Flag field, then leave the Property State field blank.	Two-letter postal codes for the state	Character(2)
5	Property ZIP Code	9220	Property Zip Code – Report the five-digit ZIP code.	Five-digit number. Include leading zeroes, e.g.: 00901, 10101	Character(5)
6	Original Loan Amount Disbursed	M147	Original Loan Amount Disbursed- Report the dollar amount of the funds disbursed to the borrower at the time of loan closing. Amount of loan rounded to the nearest whole dollar. This data should be available either in BHCs' loan origination systems or loan servicing systems, and must be populated.	e.g. 125000 for \$125,000.00	Whole Number
7	Original Loan / Line Commitment	M242	Original Loan / Line Commitment- Report the total credit line available at origination (i.e., the total commitment), not the actual amount drawn (amount drawn is reported in Line Item 6). For lines with a zero balance and no draws, report '0' for this item. Note: For HELOANSs, Line items 6 and 7 will be the same value.	e.g. 125000 for \$125,000.00 Use banker's rounding.	Whole Number
8	Original Property Value	M148	Original Property Value – Report the property value in dollars at the time the loan was originated, defined as the lesser of selling price or the appraised value of the property securing the loan at origination.	e.g. 125000 for \$125,000.00	Whole Number
9	Original Combined LTV	M150	Original Combined LTV – Report the original combined loan-to-value (LTV) ratio which is the original amount of the home equity loan (or credit line) taken from Line Item 7 (Original Loan/Line Commitment), in addition to any senior or other junior liens, divided by the property value at the time of loan	Provide as a decimal. e.g.: 0.8 for 80% 1.05 for 105% Please populate	Numeric, to 2 decimals. 			The Loss/Write-down Amount is intended to parallel the amount and timing of loss recognized under regulatory accounting rules prior to, upon and following foreclosure of the property securing the loan. As a general rule, the amount of recognized loss is the difference between the <u>recorded amount of the loan</u> and the fair market value of the asset (less cost to sell). The Loss/Write-down Amounts recognized in subsequent months after foreclosure are the adjustments, if any, to the on-balance sheet value of the foreclosed asset. Include in the Loss/Write-down Amount items charged directly to the Allowance for Loan and Lease Losses as well as items charged to unearned interest, any valuation allowance established against the asset and accounts related to item 5.j on Schedule HI – “Net gains (losses) on sales of other real estate owned”.		
94	Loss/Write down Date	M947	Report the date on which the loss or write-down was incurred. If multiple write-downs occurred in a given month, report the date of most recent write-down for that month. Specific dates should be reported. However, if the BHC can only identify the month, then the ‘DD’ portion should be reported as ‘01’ (e.g., 20120301 for March of 2012).	YYYYMMDD	YYYYMMDD
95	Unpaid Principal Balance (Net)	M960	Report the current net unpaid balance at end of the reporting month rounded to the nearest dollar. Net Unpaid Principal Balance for a Home Equity loan is the Gross Unpaid Principal Balance minus any charge-offs taken against the loan loss reserve (ALLL) for that same loan. The charge-off amount for Net Unpaid Balance is the cumulative lifetime loss for the loan and not the partial charge-off amount for the given reporting month. The net amount does not include SOP-03-03 purchase accounting marks. The Net UPB value from the accounting system may include other adjustments like late fees, annual HELOC fees, deferred costs due to broker commissions and origination costs that have been capitalized for the life of the loan, etc. BHCs should provide whatever net	e.g., 125000 for \$125,000.00 Use banker’s rounding. Schedule C: Address Matching Loan Level Data Collection

Data Format

This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per active loan in the contributor’s inventory.

For every loan reported on the FR Y-14M First Lien Closed-end 1-4 Family Loan or Home Equity Loan and Home Equity Line of Credit Schedules, the BHCs shall provide the information set forth in this schedule. Starting with the March 2013 data submission, these schedules have been expanded to include REO loans, and such loans will also be included in the Address Matching data collection.

Additional Formatting:

- Options for all line items are comprehensive identifying a valid value for all loans regardless of status. If a value is Unknown or Unavailable, the line item should be left blank - populated with a sequence of two vertical bars (|, ASCII decimal 124, ASCII hexadecimal 7C) with no intervening spaces or explicit N/A coding.
- No quotation marks should be used as text identifiers.
- Please do not provide a header row.

Inactive inventory that was paid off in one manner or another (servicing transfer, involuntary liquidation or paid-in-full by borrower) before the beginning of the reporting month should not be included.

File Naming Convention

The standard data files which the Federal Reserve will receive from the data aggregator will follow the following file naming conventions. BHCs will use this naming convention to send the data files to the data aggregator.

FRY14_ADDRESSMATCH_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

SUBMISSION_NUMBER will be used to track revisions and resubmissions of this schedule. It must be populated as a two-digit number. For example, the first submission for a given period would have a submission number of ‘01.’ If the BHC has to resubmit the same file, then use ‘02’ for the next submission, and so on.

In the case of the Address Matching Schedule, BHCs should provide the data each month in a single bar-delimited text file. This is also referred to as a pipe-delimited text file. Line items should be delimited with a vertical bar (|, ASCII decimal 124, ASCII hexadecimal 7C).

Example:

Institution A has ID_RSSD equal to 999999. For the Address Match data file submitted for period 201206, the file would be named as FRY14_ADDRESSMATCH_999999_201206_01.TXT. Any subsequent revised

Address Match data file submitted by the institution for the same period will be named as FRY14_ADDRESSMATCH_999999_201206_02.TXT, and so on.

Schedule D: Domestic Credit Card Data Collection Data Dictionary

Loan Population

- Loans should be reported based on their classification on the FR Y-9C, Schedule HC-C (i.e. based on the loans security, counterparty, or purpose). Refer to the FR Y-9C instructions for Schedule HC-C for guidance on loan classification. Below is a list of FR Y-9C items that are considered applicable loans for this schedule:
 - a. General Purpose Credit Cards: These are credit cards that can be used at a wide variety of merchants, including any who accept MasterCard, Visa, American Express or Discover credit cards. Include affinity, co-brand cards in this category, and student cards if applicable. This includes loans reported on the FR Y-9C, Schedule HC-C, item 6.a, and domestic general purpose cards reported in other FR Y-9C lines.
 - b. Private Label Credit Cards: These credit cards, also known as Proprietary Credit Cards, are tied to the retailer issuing the card and can only be used in that retailer's stores. Include oil & gas cards in this loan type, and student cards if applicable. This includes loans reported on the FR Y-9C, Schedule HC-C, item 6.a, and domestic private label cards reported in other FR Y-9C lines.
 - c. Business Card: Include small business credit card accounts where the loan is underwritten with the sole proprietor or primary business owner as applicant. Report at the control account level or the individual pay level (not at the sub-account level). This includes SME credit card loans that are those reported on the FR Y-9C, Schedule HC-C, item 4.a, and domestic business cards reported in other FR Y-9C lines.
 - d. Corporate Credit Cards: Employer-sponsored credit cards for use by a company's employees. This includes US corporate credit card loans that are those reported on the FR Y-9C, Schedule HC-C, item 4.a, and domestic corporate cards reported in other FR Y-9C lines.
 - e. Other: Other cards accounts to consumers, small business, or corporations reported in the FR Y-9C in line items not represented above. Please do not include home equity lines of credit or other revolving consumer loans other than credit cards.
- Do not report data from international cards but include domestic cards, as defined by the FR Y-9C glossary entry for "domestic offices".
- For all variables reported please report as blank if information is missing or unknown. Also, if a line item does not apply to the loan, the line item should be left blank.
- Account and loan-level files should sum up to the portfolio level. An amount, zero or null (be left blank) should be entered for all items, except in those cases where other options such as "not available" or "other" are specified. If information is not available or not applicable and no such options are offered, the line item should be left blank. If the totals from the loan level are not equal to the totals from the portfolio level, BHCs should provide explanations.
- Avoid account duplications.
- For account level variables representing monetary value please use the U.S. Dollar (\$) as the reporting monetary unit.
- For portfolio level variables representing monetary value please use millions of dollars (\$ Millions) as the reporting monetary unit.
- In the case of closed or charged-off accounts, account information should be reported up to twelve months after the account's closure or charge off. Closed accounts with balances that need to be repaid should continue to be reported beyond twelve months until full repayment or fully charged off. There is a separate flag for charge-off that can be used to identify such accounts.
- All accounts managed (including accounts tagged as securitized) should be reported as managed accounts. All accounts owned but not tagged as securitized should be reported as booked accounts.

- Cards should be included regardless of delinquency status.
- For portfolio level variables, the list of summary variables is to be reported for each portfolio segment. The variables 'Credit Card Type' and 'Lending Type' should be used to define the portfolio segment in a reporting month. For example, General Purpose Bank Cards would constitute the first segment for a bank in a reporting month, say January 2011. There are four Credit Card Type segments and four Lending type segments. Hence, in this example, the dataset would have 16 rows of data per reporting month. The remaining portfolio level variables are the requested summary variables.
- No quotation marks should be used as text identifiers.
- Mandatory variables should be provided in all cases. Optional variables should be provided when available, or when not directly available they should be provided on a best effort basis. All mandatory variables must be completed for each reported credit. Variables designated "optional" must be reported if the reporter uses the requested information in the course of the reporter's risk management practices or otherwise generates or stores the requested information. If the reporter does not use or generate the information requested in the variable, the reporter is not required to generate the information for this schedule, in which case the variable should be reported as blank.
- Items related to the most recent capital framework are mandatory for firms subject to the advanced approaches rule, optional for all others.
- Inclusion of corporate and business card loans:
 - o Loans for which a commercially-graded corporation is ultimately responsible for repayment of credit losses incurred should be reported in the FR Y-14Q Corporate Loan schedule.
 - o If there is any individual liability associated with the sub-lines such that individual borrower characteristics are taken into account during the underwriting decision, and/or performance on the credit is reported to the credit bureaus, the loan should be reported in the FR Y-14M Credit Card schedule.
