This assessment is being conducted at the request of the U.S. Congress and will update a similar BIS survey and assessment conducted for Congress in 2003. The primary goal of the study is to assist the Congress in understanding the health and competitiveness of organizations manufacturing textiles, apparel and footwear for commercial and U.S. Government applications at facilities located in the United States. The OTE survey is designed to provide detailed information on the following topics including: employment, production, competitors and customers, supply chain, financial information, research and development, effectiveness of the Berry Amendment, cyber incidents and future industrial challenges. The resulting aggregated database will allow OTE to benchmark industry performance and trends, identify key sole source dependencies and interdependencies within the supply chain network, as well as raise awareness of diminishing domestic manufacturing and technological capabilities. 11.
