

Justification for No Material or Non-Substantive Change Request

0704-0552 - Fast Track Generic ICR

The purpose of this request for a “No material or Nonsubstantive Change to a Currently Approved Collection” is to release the burden hours and to make them available for upcoming individual ICs. At the time this original generic ICR was created, an IC was also mistakenly created that inadvertently encumbered all the requested responses (10,000) and all the requested burden hours (1,667). The result of that error was to make it impossible to submit any generic ICs because ROCIS is assuming that all the burden hours that make up the 3-year cap have been used.

After consulting with the ROCIS developer, a way forward is to submit a No material or Nonsubstantive Change request to delete the IC in order to correct that error. Once the change request has been approved and the burden hours are released, the individual ICs for this fast track generic can be submitted.
