

Managing type 2 diabetes

(routine maintenance of a well-controlled condition)

Instructions to Plans and Issuers:

*Do not modify this tab. The numbers shown here roll up from the **Scenario** tab.*

Sample care costs:

Prescriptions	\$2,900
Medical Equipment and Supplies	\$1,300
Office Visits and Procedures	\$700
Education	\$300
Laboratory tests	\$100
Vaccines, other preventive	\$100
Total	\$5,400

Assumptions

The following are assumptions that all group health plans and health insurance issuers must use for this scenario.

Standard Assumptions

These assumptions are standard across all scenarios.

Costs do not include premiums.

Condition was not excluded as a pre-existing condition.

There are no other medical expenses for any member covered under the plan or policy.

All care is in-network and considered first tier (or the tier associated with the lowest level of cost sharing), for those products that incorporate tiered provider networks.. No out-of-network charges or any other variation in Sample Care Costs.

All services occur in same policy period.

All prior authorizations were obtained.

All services were deemed medically necessary.

All costs (allowed amount, sample care costs, member costs) greater than \$100 are rounded to the nearest hundredth.

All costs (allowed amount, sample care costs, member costs) less than \$100 are rounded to the nearest tenth.

All medications are covered as generic equivalents if available.

If the plan has a wellness program that varies the deductibles, co-payments, co-insurance, or coverage for any of the services listed in a treatment scenario, the plan must complete the calculations for that treatment scenario assuming that the patient is participating in the wellness program. networks.

Note: Services on this tab are listed individually for classification and pricing purposes to facilitate the population of the “Sample care costs” section. HHS specifies the Category in order to roll up costs into that category in the "Sample care costs" section so that those costs are uniform across all group health plans and health insurance issuers. However, some plans or issuers may classify an item or service under another category. The plan or issuer should apply its cost sharing and benefit features for each plan or policy in order to complete the “You pay” section, but must leave as is the "Sample care costs" section. Examples of cost sharing and benefit features include, but are not limited to:

- Payment of services based on the location such as inpatient, outpatient, or office; and
- Payment of items as prescription drugs vs. medical equipment.

Explanation of Scenario:

Total – the sum of allowed amounts for the listed items and services, which is cross-referenced in the "Label and Assumptions" tab, where it is rounded.

Date of Service – includes the day and month of service so plans and issuers understand the order in which items or services are rendered.

ICD-9 Diagnosis Code – includes the ICD-9 code for each item or service.

ICD-10 Diagnosis Code – includes the ICD-10 code for each item or service.

CPT, HCPCS or Other Billing Code – includes medical codes for each item or service. Over-the-counter medications are listed as OTC.

Provider Type – includes one of the types listed on the "Provider Types" tab to classify each item or service by provider.

Category – includes one of the categories listed on the "Categories" tab to classify each item or service so it rolls up into the same category in the "Label and Assumptions" tab.

Description – includes the short form descriptor for a CPT code, or an appropriate descriptor for a non-CPT billing code.

Allowed Amount – includes an estimated national average allowed amount for each item or service, which plans or issuers must use to calculate cost sharing.

Notes – includes any special notes for an item or service.

The following are the provider types to use on the "Scenario" tab ~ "Provider Type" column to classify each service by provider type. This aids group health plans and health insurance issuers in applying benefits to each item and service.

Provider Type

What providers are covered under this Provider Type and other notes:

Diabetes Educator

Dietitian

Emergency Room

Ophthalmology

Pharmacy Retail

Podiatry

Primary

Primary Care Physician or non-Specialist

The following are the categories to use on the "Scenario" tab ~ "Category" column to classify each item and service so it rolls up to the same category in the Coverage Example label on the "Label and Assumptions" tab. This facilitates consistency between the "Scenario" tab and Coverage Example label.

Category	What services are covered under this Category and other notes:
Prescriptions	Includes all prescription drugs (generic, brand/preferred, non-preferred) which are not administered in a hospital, physician's office or other facility. Note, this category may also include over-the-counter drugs such as aspirin and other pharmacy items.
Medical Equipment and Supplies	Includes durable medical equipment, orthotics, prosthetics
Office Visits and Procedures	Includes services by physicians and other providers.
Education	
Laboratory tests	Includes blood work
Vaccines, other preventive
