No.	Collection Title	FY 2012 Estimated Annual Respondents	FY 2012 Estimated Annual Responses	FY 2012 Estimated Annual Burden Hours	FY 2015 Estimated Annual Respondents	FY 2015 Estimated Annual Responses	FY 2015 Estimated Annual Burden Hours	Changes in Estimated Annual Hours FY 2012-FY 2015 - Negative numbers in parenthesis)	Main Factors for Changes
1	Computerized Accident/Incident Reporting System	652	2,439	1,920	418	1,977	1,820	(100)	The decrease in burden hours is due primarily to a decrease in the number of respondents as a result of fewer injuries and illness occurring during this period.
2	Occurrence Reporting and Processing System	412	1,512	3,840	160	1,060	8,480	4640	The FY 2012 amount of time to complete a response was inaccurately reported.
3	Noncompliance Tracking System	495	251	960	40	210	960	0	No Change in annual burden hours but the number of respondents has decreased although the time it takes to complete these reports has taken longer. These changes are off-setting and results in no change to the total annual burden hours.
4	Radiation Exposure Monitoring System	101	95,000	37,000	116	76,000	29,589	(7411)	DOE's mission of environmental remediation activities have progressed and/or have been completed. Due to these changes, less individuals are monitored and reported.
5	Annual Fire Protection Summary Application	30	30	240	30	30	240	0	No changes
6	Safety Basis Information System	193	122	300	188	87	44	(256)	Based on enhancements to this system, the amount of time required for reporting was dramatically reduced.
7	Lessons Learned System	281	339	600	52	270	600	0	No Change in annual burden hours but annual responses and response times has changed slightly. These changes are off-setting and results in no change to the total annual burden hours.
