**CREST: Number of Respondents, Frequency of Response, and Annual Hour Burden**

The estimated average number of annual respondents is 37 (23 CREST center PIs/program coordinators and 14 HBCU-RISE award PIs/program coordinators), with an estimated annual response burden of 1,374 hours. The Web-based data collection is an annual activity of the CREST program. The respondents are either PIs or program coordinators. One PI or program coordinator per award completes the questionnaire. The estimated annual hour burden per respondent was determined using the burden information reported by respondents from the last three collection cycles.

The burden estimate is outlined below:

| <b>Respondent Type</b>                   | <b>Estimated Average Annual No. of Respondents</b> | <b>Estimated Average Annual Burden Hours Per Respondent</b> | <b>Estimated Annual Burden Hour Total</b> |
|--|--|---|---|
| CREST center PIs/program coordinators    | 23   | 50  | 1,150                                     |
| HBCU-RISE award PIs/program coordinators | 14   | 16  | 224                                       |
| <b>Total</b>                             | <b>37</b>  | <b>37.14</b>  | <b>1,374</b>                              |

### CREST: Hour Burden Estimates by Each Form and Aggregate Hour Burdens

There is only one form. This form accounts for the entire annual response burden of 1,374 hours. The annual burden by form was calculated as follows:

| <b>Form Type</b>           | <b>Respondent Type</b>   | <b>No. of Respondents</b> | <b>Burden Hours Per Respondent</b> | <b>Total Burden Hours</b> |
|----------------------------|--------------------------|---------------------------|------------------------------------|---------------------------|
| CREST data collection form | PIs/program coordinators | 37                        | 37.14                              | 1,374                     |
| <b>Total</b>               |                          | <b>37</b>                 |                                    | <b>1,374</b>              |

**CREST: Estimates of Annualized Cost to Respondents for the Hour Burdens**

The overall annualized cost to the respondents is estimated to be \$56,341. The following table shows the annualized estimate of cost to PI/program coordinator respondents, who are generally university professors. This estimated hourly rate is based on a report from the American Association of University Professors, “Annual Report on the Economic Status of the Profession, 2011-12,” *Academe*, March–April 2012, Survey Report Table 4. According to this [report](#), the average salary of an associate professor across all types of doctoral-granting institutions (public, private-independent, religiously affiliated) was \$86,319. When divided by the number of standard annual work hours (2,080), this calculates to approximately \$41 per hour.

| <b>Respondent Type</b>   | <b>No. of Respondents</b> | <b>Burden Hours Per Respondent</b> | <b>Average Hourly Rate</b> | <b>Estimated Annual Cost</b> |
|--------------------------|---------------------------|------------------------------------|----------------------------|------------------------------|
| PIs/program coordinators | 37                        | 37.14                              | \$41                       | \$56,341                     |
| <b>Total</b>             | <b>37</b>                 |                                    |                            | <b>\$56,341</b>              |

### CREST: Estimates of Costs to the Federal Government

Computing the annualized cost to NSF for the CREST data collection was done by taking the budgets for three years and calculating the costs for each of the following operational activities involved in producing, maintaining, and conducting the data collection:

| <b>Operational Activities</b>   | <b>Cost Over Three Years</b> |
|---|------------------------------|
| System Development (includes initial development of the database and Web-based application, and later changes requested by the program, e.g., increased reporting tools, additional validations)  | \$357,166                    |
| System Maintenance, Updates, and Technical Support (system requires updates each year before opening the collection; maintenance is required to keep the system current with technology, e.g., database servers, operating systems)                             | \$178,583                    |
| Data Collection Opening and Support (e.g., online and telephone support to respondents and contacting respondents to encourage completion of the questions), Reporting (as defined by HRD), and Followup Activities (e.g., providing data to other consultants) | \$134,157                    |
| <b>Three-Year Total for All Operational Activities</b>  | <b>\$669,906</b>             |

The annualized cost was computed as one-third of the total three-year costs; thus, the annualized cost to NSF for the CREST data collection is \$223,302.
