<sup>13</sup> The Noyce program requires that funding recipients complete 2 years of service as a mathematics or science teacher in a high-need school district for every year of funding received.

**For pre-2008 awards:** Scholarship recipients must complete this service within **6** years of graduation from the program for which the scholarship was awarded. Stipend recipients must complete this service within **6** years of graduation or completion of the program for which the stipend was awarded.

**For 2008 awards onward:** Scholarship recipients must complete this service within **8** years of graduation from the program for which the scholarship was awarded. Stipend recipients must complete this service within **4** years of graduation or completion of the program for which the stipend was awarded.

**Noyce: Number of Respondents, Frequency of Response, and Annual Hour Burden**

The estimated average number of annual respondents is 316, with an estimated average annual response burden of 4,108 hours. The Web-based collection is an annual activity of the Noyce program. Respondents are PIs; one PI per award completes the survey. The estimated average annual hour burden per respondent was determined using the burden information reported by respondents for the last three collection cycles.

The burden estimate is outlined below:

<b>Respondent Type</b>	<b>Estimated Average No. of Respondents</b>	<b>Estimated Average Annual Burden Hours Per Respondent</b>	<b>Estimated Annual Burden Hour Total</b>
PIs	316	13	4,108
<b>Total</b>	<b>316</b>		<b>4,108</b>

**Noyce: Hour Burden Estimates by Each Form and Aggregate Hour Burdens**

The Noyce system consists of one form for Track 1 awards and one form for Track 2 awards. The number of data elements for each is roughly equal and is expected to take the same amount of time to complete. Respondents are project PIs. The estimated total annual response burden is 4,108 hours. The annual burden by form was calculated as follows:

<b>Form Type</b>	<b>Respondent Type</b>	<b>No of Respondents</b>	<b>Burden Hours Per Respondent</b>	<b>Total Burden Hours</b>
Noyce data collection form	PIs	316	13	4,108
<b>Total</b>		<b>316</b>		<b>4,108</b>

**Noyce: Estimates of Annualized Cost to Respondents for the Hour Burdens**

The overall annualized cost to the respondents is estimated to be \$168,428. The following table shows the annualized estimates of costs to PI respondents, who are generally university professors. This estimated hourly rate is based on a report from the American Association of University Professors, “Annual Report on the Economic Status of the Profession, 2011-12,” *Academe*, March–April 2012, Survey Report Table 4. According to this [report](#), the average salary of an associate professor across all types of doctoral-granting institutions (public, private-independent, religiously affiliated) was \$86,319. When divided by the number of standard annual work hours (2,080), this calculates to approximately \$41 per hour.

<b>Respondent Type</b>	<b>No. of Respondents</b>	<b>Burden Hours Per Respondent</b>	<b>Average Hourly Rate</b>	<b>Estimated Annual Cost</b>
PIs	316	13	\$41	\$168,428
<b>Total</b>	<b>316</b>			<b>\$168,428</b>

### Noyce: Estimates for Costs to the Federal Government

Computing the annualized cost to NSF for the Noyce data collection was done by taking the budgets for three years and calculating the costs for each of the following operational activities involved in producing, maintaining, and conducting the Noyce data collection:

<b>Operational Activities</b>	<b>Cost Over Three Years</b>
System Development (includes initial development of the database and Web-based application, and later changes requested by the program, e.g., increased reporting tools, additional validations)	\$333,180
System Maintenance, Updates, and Technical Support (the system requires updates each year before opening the collection; maintenance is required to keep the system current with technology, e.g., database servers, operating systems)	\$209,573
Data Collection Opening and Support (e.g., online and telephone support to respondents and contacting respondents to encourage completion of the questions), Reporting (as defined by DUE), and Followup Activities (e.g., providing data to other consultants)	\$214,996
<b>Three-Year Total for All Operational Activities</b>	<b>\$757,749</b>

The annualized cost was computed as one-third of the total three-year costs; thus, the annualized cost to NSF for the Noyce data collection is \$252,583.
