

Catcher/processor Groundfish landing report in sealandings.
Fields that the vessel has to fill in are highlighted in yellow. Those that are not highlighted auto-fill based on the vessel operation that is established in the database. FCP is for floating catcher processor so if they are acting as a CV, they would modify this field and enter the appropriate port code.

Vessel/Location/Status Tab

The screenshot shows a software window titled "Landing Report 16810640". At the top, there are input fields for "Vessel: 73311" and "Date of Landing:". Below this is a tabbed interface with "Vessel/Location/Status" selected. The "Status" section includes fields for "Report Status: Not Submitted", "Transmit Status:", "Transmit Date:", "Receipt Date:", "Number of Messages: 0", "Number of Errors: 0", and "Number of Warnings: 0", along with a "View Messages" button. The "Vessel" section contains fields for "ADF&G#: 73311", "Gear: 47", "Pelagic/mid-water trawl", "Crew Size (Including Skipper): 15", "Observers Onboard: 1", "Date Fishing Began: 10/1/2015", "Date of Landing: 10/5/2015", "Days Fished: 4", and "ODDS Trip Number:". The "Processor" section includes dropdown menus for "Processor Code (Owner): 27876 F/V", "Processor Code (Custom Processor)", "Registered Buyer Number: 980003 IFQ TEST BUYER36", and "Federal Processor Number: 3242", along with a "Port of Landing: FCP" field. Yellow highlighting is used to indicate fields that require manual input.

Itemized catch entry dialog box

Stat area can be filled in here or in the stat area worksheet as displayed in the overall screenshot of the Permits & Pounds tab

Fish Ticket Number: Stat Area: Species: Condition:

Weight: Weight Modifier: Number:

Disposition:

Weight modifier is only for IFQ species

Number is for crab and PSC

The table below is for grading & pricing - CPs don't use it

Cond	Sold Condition	P/A	Size/Grade	Sold Weight	Price	Amount
