Please include activity successes for all activities and barriers to progress for activities “not started” or “redirected.”

Public reporting burden of this collection of information is estimated to average 22 hours for the initial population of the tool, and 11 hours for annual reporting for awardees funded for BASE component. The response includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

Focus Area SMART Objectives

Instructions:

Using the template provided below, please indicate the focus areas selected for the funding cycle and describe the SMART objectives and related program and policy strategies for each focus area. Please identify at least one proximal and one distal SMART objective for each focus area and complete the related fields for each SMART objective in the related “Distal SMART Objectives” and “Supporting Proximal SMART Objectives” tables. Please also indicate at least one program or policy strategy for each focus area in the “Strategies” table. **All text fields are limited to 500 characters.**

Focus Area Definitions:

- **Focus Area** = this list includes the 23 possible focus areas and “other.” Please select only one.
- **Other** = if other is selected, please specify the focus area category
- **Description** = brief description of the specific focus area addressed
- **New/Revised** = if this is a new or revised focus area (compared to Year 1), please check the box

SMART Objective Definitions:

- **SMART:** Focus area objectives should be **Specific, Measurable, Attainable, Reasonable, and Time-bound (SMART)** and reflect the desired outcome of the focus area strategies supported by the grantee. The suggested format for reporting focus area objectives and an explanation of each of the components are included below:
 - <Increase/Decrease> the <count/rate/percent> of <sub population> <measure> in <geographical region> from <baseline count/rate/percent> to <goal count/rate/ percent> by <year the end goal is achieved > .
- **Distal objective** = directly related to population morbidity, mortality, disparity, and cost
- **Supporting Proximal objective** = grounded in science and logically related to population morbidity, mortality, disparity, and cost. These objectives may include measures of knowledge, attitudes, and behaviors IF supporting evidence exists to indicate a logical relationship to the burden of violence and injury for the defined focus area.
- **New/Revised** = if this is a new or revised objective (compared to Year 1), please check the box
- **Increase or Decrease** = indicate whether or not the goal is to increase or decrease the baseline measurement

- **Count/crude rate/percent/cost** = the numeric value of the measure of the burden of violence and injury for the defined focus area. The value reported should be derived from the most current dataset the grantee has access to at the time of reporting. If reporting a rate, please report a crude rate so we can better identify the population impact across the program in the form of a count of actual injuries prevented/lives saved.
 - **Select one** = indicate if the numeric value is a count, rate, percent, cost, or TBD (“to be determined” by Year 2 reporting)
 - **Data Year** = indicate the year of data used OR the year range for trend data
 - **Baseline** = the value of the proximal or distal measure for the focus area SMART objectives available to the grantee at the time of annual reporting for Year 1. When deciding on a baseline measure, please consult the grantee’s epidemiologist to determine the most appropriate baseline measure for the data available. When deciding on baseline for focus area strategies that began prior to the current funding cycle, the use of trend data (e.g., rate of increase/decrease over a time period) is recommended over multiple year averages in most cases. Please consider the frequency of data availability during the project period when using trend data.
 - **Goal** = the anticipated value of the measure of the burden of violence and injury for the focus area available to the grantee at the “year the end goal is achieved”
- **Affected Population Count** = The count of the entire subpopulation within the geographic region that is being addressed. *Note: This field may not apply to your proximal objectives.*
- **Data source** = source of data for the measure indicated
- **Sub population** = the specific sub-population addressed by the focus area strategies (e.g., children, minorities, youth, older drivers, pedestrians)
- **Measure** = the measure the burden of violence and injury for the defined focus area
 - Distal:
 - Hospitalization data
 - Emergency department data
 - Vital statistics data
 - Proximal:
 - Knowledge Change : General Awareness
 - Attitude Change: Personal view, opinion, or feeling
 - Behavior Change: Manner of acting
- **Geographical Region** = the geographic area addressed by the focus area strategies (e.g. statewide, county, city, ZIP code)
- **Goal Year End** = the anticipated year the objective will be achieved

Strategy Definitions:

- **Strategy Description** = brief description of the related focus area program or policy strategy
- **New/Revised** = if this is a new or revised strategy (compared to Year 1), please check the box
- **Strategy Type**= indicate whether the related focus area strategy is focused on policy efforts, program interventions, or both
- **Reach** = indicate the level of impact anticipated for the strategy. The levels include: state, region/district, county/counties, city, ZIP code, organization.
 - **Specify** = indicate the specific geographic region for the strategy
- **Type of Support** = indicate how the grantee is supporting the strategy. Please select ALL that apply.
- **Progress Status** = not started, redirected, planning, ongoing/implementation, complete, n/a (see page 1 for a description of the categories)

- **Progress Description** = Brief description of the level of progress achieved for the strategy during the reporting period. Please include activity successes and barriers to progress for activities. Fields should reflect progress for all of Year 2. Do not leave blank and include sufficient information.
