Exp. Date xx/xx/20xx

**Rate Calculation and Submission Spreadsheet for Injury Indicators  
Hospital Discharge Data – 2013**

This spreadsheet is to be used for the calculation and submission of the hospitalization related Injury Indicator Rates for 2013.

Please keep the following items in mind as you complete the spreadsheets.

- The spreadsheet should be completed after individual indicator case counts have been determined using the methodology specified in the accompanying manual.
- Only cells outlined in red will accept data input. Information copied on subsequent pages does not appear in a red box. To update information in these cells, you must return to the original red-outlined cell.
- All case count cells should be populated.
  - o Small case counts (<5) will be suppressed at CDC.
  - o Rates will not be calculated for age groups with fewer than 20 cases.
  - o Age-adjusted rates, while calculated on this spreadsheet, will not be presented for categories with fewer than 20 cases total.
- Rates will not be calculated until the population data has been entered. The default rate of 0 will be replaced when data is input.
- The spreadsheet file should be renamed inserting the appropriate state postal abbreviation into the file name in place of the 'CC'. If more than one submission is required, then the 01 should be updated to reflect submission number.
- Each sheet within workbook with the exception of the last 'Reports' sheet can be printed using the following sequence of EXCEL settings:

File

   Adjust to 75% of Normal Size  
Print or Print Preview

Public reporting burden of this collection of information is estimated to average 14 hours per response for awardees funded for base component, 1-enhanced component or 2-enhanced components. The response time includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX).

**The answers to the following questions will be used to assess the quality and comparability of state hospital discharge data sets. Please complete all questions, including the Footnote for Report Credit.**

Number of discharges with  
an injury primary diagnosis

Number of discharges with a valid external  
cause of injury other than E000-E030, E849,  
E967, E869.4, E870-E879, or E930-E949

Percentage of HDD injury hospitalizations  
with external-cause-of-injury coding

0.0%

Number of discharges with E967 or E869.4  
as the **only** valid external cause of injury

Percentage of cases with E967 or  
E869.4 as **only** valid e-code

0.0%

Number of discharges with "Other specified NEC"\*  
as the **first** valid external cause of injury

Percentage of cases with "Other specified  
NEC" as **first** valid e-code

0.0%

\*Other specified, not elsewhere classifiable: E928.8, E929.8, E958.8, E959, E968.8, E969, E977, E988.8, E989, E995.8, E995.9, E997.8, E998, E999.0, E999.1

Number of discharges with "Unspecified"\*\* as the **first** valid external cause of injury

Percentage of cases with "Unspecified" as **first** valid e-code

0.0%

\*\*Unspecified: E887, E928.9, E929.9, E958.9, E968.9, E976, E988.9, E997.9

### Factors Affecting Representativeness of State Hospital Discharge Data Sets for Injury Surveillance

Please answer the following questions by putting an "x" in the appropriate column.

#### QUESTION

YES

NO

Do you estimate that all required hospitals are participating in the system?

--	--

Are sufficient numbers of your state's residents who are injured in-state hospitalized for injury in neighboring states (cross-border hospitalization) such that it affects your rates?

--	--

Did you include re-admissions and transfers?

--	--

Do you receive data on state residents hospitalized in other states? (If yes, please include them in your data.)

--	--

Did use the test dataset to check your programming code? (This is not required. We are just tracking usage of the tool.)

--	--

**Footnote - if you want to add information**

--

**Footnote for Report Credit**

**Individuals to be Credited (please list all names and include degrees such as BS, MS, MPH, PhD, etc):**

## Rate Calculation and Submission Spreadsheet for Injury Indicators Emergency Department Data – 2013

This spreadsheet is to be used for the calculation and submission of the emergency department related Injury Indicator Rates for 2013.

Please keep the following items in mind as you complete the spreadsheets.

- The spreadsheet should be completed after individual indicator case counts have been determined. Use the methodology specified in STIPDA: Injury Surveillance Workgroup 5: Consensus recommendations for injury surveillance in state health departments. State and Territorial Injury Prevention Directors Association, Atlanta, GA. 2007 (p.24) to develop the injury data set.
  - "Include initial visits to an ED for an injury episode when either:
    - The first-listed diagnosis reflects an injury based on the Barell matrix definition of an injury (Barell, 2002), regardless of any mention of an external cause of injury code [**same as the current HDD instructions**]
    - OR**
    - Valid external cause of injury code (see <http://www.cdc.gov/ncipc/whatsnew/matrix2.htm>), based on the recommended framework for external cause of injury.
  - Complications of care and adverse effects are excluded from both the diagnosis codes as well as the external cause codes."
- After creating the initial ED data set, the codes for the specific indicators are the same as those for the corresponding HDD indicators.
- Only cells outlined in red will accept data input. Information copied on subsequent pages does not appear in a red box. To update information in these cells, you must return to the original red-outlined cell.
- Please answer all the questions on the background information sheets.
- Please do not insert lines into the spreadsheet pages. Additional information may be highlighted in footnotes.
- All case count cells should be populated.
  - o Small case counts (<5) will be suppressed at CDC.
  - o Rates will not be calculated for age groups with fewer than 20 cases.
  - o Age-adjusted rates, while calculated on this spreadsheet, will not be presented for categories with fewer than 20 cases total.
- Rates will not be calculated until the population data has been entered. The default rate of 0 will be replaced when data is input.
- The spreadsheet file should be renamed inserting the appropriate state postal abbreviation into the file name in place of the 'CC'. If more than one submission is required, then the 01 should be updated to reflect submission number.
- Each sheet within workbook with the exception of the last 'Reports' sheet can be printed using the following sequence of EXCEL settings:
  - File
  - Page Setup
  - (within Page Setup) Orientation Landscape
  - Adjust to 75% of Normal Size
  - Print or Print Preview

The answers to the following questions will be used to assess the quality and comparability of state emergency department data sets. *Please complete all questions, including the Footnote for Rep*

Number of ED visits with an injury primary diagnosis OR an external cause of injury code

Number of ED visits with a valid external cause of injury other than E000-E030, E849, E967, E869.4, E870-E879, or E930-E949

Percentage of ED visits with external-cause-of-injury coding

0.0%

Number of ED visits with E967 or E869.4 as the **only** valid external cause of injury

Percentage of ED visits with E967 or E869.4 as **only** valid e-code

0.0%

Number of ED visits with "Other specified NEC"\* as the **first** valid external cause of injury

Percentage of ED visits with "Other specified NEC" as **first** e-code

0.0%

\*Other specified, not elsewhere classifiable: E928.8, E929.8, E958.8, E959, E968.8, E969, E977, E988, E997.8, E998, E999.0, E999.1

Number of ED visits with "Unspecified"\*\*\* as the **first** valid external cause of injury

Percentage of ED visits with "Unspecified" as **first** e-code

0.0%

\*\*Unspecified: E887, E928.9, E929.9, E958.9, E968.9, E976, E988.9, E997.9

**Factors Affecting Representativeness of State Emergency Department Data Sets for Injury Surve**

*Please answer the following questions by putting an "x" in the appropriate column.*

**QUESTION**

**YES**

**NO**

Do you estimate that all required hospitals are participating in the system?

--	--

Are sufficient numbers of your state's residents who are injured in-state treated in neighboring states (cross-border ED visits) such that it affects your rates?

--	--

Are ED visits that result in hospital admission included?

--	--

**Beginning**

Are follow-up visits and transfers from other EDs included?

--	--

Do you receive data on state residents treated in other states? (If yes, please include them in your data.)

--	--

Did use the test dataset to check your programming code? (This is not required. We are just tracking usage of the tool.)

--	--

**Footnote - if you want to add information**

--

**Footnote for Report Credit**

**Individuals to be Credited (please list all names and include degrees such as BS, MS, MPH, P**

ate  
ort Credit.

.8, E989, E995.8, E995.9

illance

with 2010, ED visits that result in hospitalization, should be EXCLUDED

## Rate Calculation and Submission Spreadsheet for Injury Indicators Death Data – 2013

This spreadsheet is to be used for the calculation and submission of the death related Injury Indicator Rates for 2013.

Please keep the following items in mind as you complete the spreadsheets.

- The spreadsheet should be completed after individual indicator case counts have been determined using the Injury Indicator Case Count Spreadsheet.
- Only cells outlined in red will accept data input. Information copied on subsequent pages does not appear in a red box. To update information in these cells, you must return to the original red-outlined cell.
- Please answer all the questions on the background information sheet.
- Please do not insert lines into the spreadsheet pages. Additional information may be highlighted in footnotes.
- All case count cells should be populated.
  - o Small case counts (<5) will be suppressed at CDC.
  - o Rates will not be calculated for age groups with fewer than 20 cases.
  - o Age-adjusted rates, while calculated on this spreadsheet, will not be presented for categories with fewer than 20 cases.
- Rates will not be calculated until the population data has been entered. The default rate of 0 will be reported if no data is entered.
- The spreadsheet file should be renamed inserting the appropriate state postal abbreviation into the file name. If more than one submission is required, then the 01 should be updated to reflect submission number.
- Each sheet within workbook with the exception of the last 'Reports' sheet can be printed using the following sequence of EXCEL settings.
  - File
  - Page Setup
  - (within Page Setup) Orientation Landscape
  - Adjust to 75% of Normal Size
  - Print or Print Preview
