General Comment

the us doj collects statistics on injuries and violence. there is absolutely no need for this agency to collect its own statistics and cause American taxpayers to be gouged even more so that every agency has its own little separate collection going on. there should be one agency in charge of collecting statistics on violence and that should be the usdoj. use their statistics. this agency is power mad and wants huge budgets to keep overspending and overspending. this agency is usually lax and negligent in doing all of its assigned duties and responsibilities. I am in favor of a budget cut for this agency. this agency needs new management so it does the job for the American people. right now it appears to be out to lunch most of the time.
