

comply with the Standard to persons responsible for compiling process safety information.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed collection of information requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the collection of information requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB approve the proposed extension and revision of the collections of information contained in OSHA's PSM Standard. The Agency is requesting a decrease in burden hours of 547,491 hours, from 4,630,107 to 4,082,616 burden hours in the initial year. There is an "adjustment" reduction of 726,317 hours as a result of reducing the number of establishments and processes covered in the existing ICR. This reduction is offset by a "program change" increase of 178,826 burden hours. The burden hour increase mainly results from this ICR including additional establishments as a result of OSHA (1) revising its interpretation of the Standard's retail exemption, and (2) revising its enforcement policy on the minimum concentration of a chemical in a process needed in order to count that chemical toward the threshold quantity levels that trigger coverage under the PSM Standard.

In subsequent years, OSHA seeks a 2,195,202 burden hours increase from the initial proposed burden hours from 4,082,616 to 6,277,818 as a result of including retail exemption and concentration change establishments in recurring collections of information such as updating and revalidating process hazard analyses.

Type of Review: Revision of a currently approved collection.

Title: Process Safety Management of Highly Hazardous Chemicals (PSM) (29 CFR 1910.119).

OMB Control Number: 1218-0200.

Affected Public: Businesses or other for-profits.

Number of Respondents: Initial

11,114; Recurring: 11,114.

Frequency of Response: On Occasion: Annually.

Total Responses: Initial 833,007;

Recurring 832,608.

Average Time per Response: Time varies per response from three minutes (.05 hour) to generate and maintain an employee training record to 55 hours per process for large establishments to develop written management of change procedures and update process safety operating procedures.

Estimated Total Burden Hours: Initial 4,082,616; Recurring 6,277,818.

Estimated Cost (Operation and Maintenance (capital)): \$0.

SUPPLEMENTARY INFORMATION:

I. Background: The Wage and Hour Division of the U.S. Department of Labor administers the McNamara-O'Hara Service Contract Act (SCA), 41 U.S.C. 351 *et seq.* The McNamara-O'Hara Service Contract Act (SCA) applies to every contract entered into by the United States or the District of Columbia, the principal purpose of which is to furnish services to the United States through the use of service employees. The SCA requires contractors and subcontractors performing services on covered federal or District of Columbia contracts in excess of \$2,500 to pay service employees in various classes no less

than the monetary wage rates and to furnish fringe benefits found prevailing in the locality, or the rates (including prospective increases) contained in a predecessor contractor's collective bargaining agreement. Safety and health standards also apply to such contracts. The compensation requirements of the SCA are enforced by the Wage and Hour Division.

A. Vacation Benefit Seniority List

Service Contract Act section 2(a), provides that every contract subject to the Act must contain a provision specifying the minimum monetary wages and fringe benefits to be paid to the various classes of service employees performing work on the contract. Many wage determinations (WDs) issued for recurring services performed at the same Federal facility provide for certain vested fringe benefits (e.g., vacations), which are based on the employee's total length of service with a contractor or any predecessor contractor. *See* 29 CFR 4.162. When found to prevail, such fringe benefits are incorporated in WDs and are usually stated as "one week paid vacation after one year's service with a contractor or successor, two weeks after two years", etc. These provisions ensure that employees receive the vacation benefit payments that they have earned and accrued by requiring that such payments be made by successor contractors who hire the same employees who have worked over the years at the same facility in the same locality for predecessor contractors.

B. Conformance Record

Section 2(a) of the SCA provides that every contract subject to the Act must contain a provision specifying the minimum monetary wage and fringe benefits to be paid the various classes of service employees employed on the contract work. *See* 41 U.S.C. 351, *et seq.* Problems sometimes arise (1) when employees are working on service contracts in job classifications that DOL was not previously informed about and (2) when there are job classifications for which no wage data are available.

Section 4.6(b)(2) of 29 CFR part 4 provides a process for "conforming" (i.e., adding) classifications and wage rates to the WD for classes of service employees not previously listed on a WD but where employees are actually working on an SCA covered contract. This process ensures that the requirements of section 2(a) of the Act are fulfilled and that a formal record exists as part of the contract which documents the wage rate and fringe benefits to be paid for a conformed classification while a service

employee(s) is employed on the contract.

The contracting officer is required to review each contractor-proposed conformance to determine if the unlisted classes have been properly classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications (and wages) listed in the WD. *See* 29 CFR 4.6(b)(2). Moreover, the contracting agency is required to forward the conformance action to the Wage and Hour Division for review and approval. *Id.* However, in any case where a contract succeeds a contract under which a class was previously conformed, the contractor may use an optional procedure known as the indexing (i.e., adjusting) procedure to determine a new wage rate for a previously conformed class. *See* 29 CFR 4.6(b)(2)(iv)(B). This procedure does not require DOL approval but does require the contractor to notify the contracting agency in writing that a previously conformed class has been indexed and include information describing how the new rate was computed. *Id.*

C. Submission of Collective Bargaining Agreement (CBA)

Sections 2(a) and 4(c) of the SCA provide that any contractor which *succeeds* to a contract subject to the Act and under which substantially the same services are furnished, shall pay any service workers employed on the contract no less than the wages and fringe benefits to which such workers would have been entitled if employed under the *predecessor* contract. *See* 29 CFR 4.163(a).

Section 4.6(l)(1) of Regulations, 29 CFR part 4, requires an incumbent (predecessor) contractor to provide to the contracting officer a copy of any CBA governing the wages and fringe benefits paid service employees performing work on the contract during the contract period. These CBAs are submitted by the contracting agency to the Wage and Hour Division of the Department of Labor where they are used in issuing WDs for successor contracts subject to section 2(a) and 4(c) of SCA. *See* 29 CFR 4.4(c).

The Wage and Hour Division uses this information to determine whether covered employers have complied with various legal requirements of the laws administered by the Wage and Hour Division. The Wage and Hour Division seeks approval to renew this information collection related to the Labor Standards for Federal Service Contracts.

II. Review Focus: The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Enhance the quality, utility, and clarity of the information to be collected;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions: The Department of Labor seeks an approval for the extension of this information collection that requires employers to make, maintain, and preserve records in accordance with statutory and regulatory requirements.
