TOTAL LABOR BURDEN AND COST (rounded) ⁱ					
Capital and O&M Cost (see Section 6(b)(iii)): ⁱ					
TOTAL COST: ⁱ					

Assumptions:

^a We have assumed that the average number of respondents potentially subject to this rule is 42. There will be one addition.

^b This ICR uses the following labor rates: \$129.93 per hour for Executive, Administrative, and Managerial labor; \$103.97 per hour for Clerical labor. These rates are from the United States Department of Labor, Bureau of Labor Statistics, June 2008.

^c We have assumed that it will take 0.87 hours for new respondent to read instructions.

^d We have assumed that 20 percent will have to repeat performance tests because of failure.

^e We have assumed that each source submits one excess emission report every year, in addition to the required semiannual reports.

^f We have assumed that 80 percent of sources will use incineration to control emissions.

^g We assume that each respondent will take 0.87 hours once per month to record performance test.

^h We assume that each respondent will take 0.22 hours 250 time per year to record operating parameters.

ⁱ Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

\$129.93

TOTAL ANNUAL BURDEN AND COST (rounded) ^g					

Assumptions:

^a We have assumed that the average number of respondents potentially subject to this rule is 42. There will be one addi

^b Labor rates for Federal agency personnel were applied to State/Local agencies, and are based on the average hourly lat Managerial \$62.90 (GS-13, Step 5, \$39.31 + 60%); and Clerical \$25.25 (GS-6, Step 3, \$15.78 + 60%). This ICR assum Managerial hours are 5 percent of Technical hours, and Clerical hours are 10 percent of Technical hours. These rates ar which excludes locality rates of pay. The rates have been applied to local agencies and have been increased by 60 perce available to government employees.

^c We assume that each of the new facility will have to review reports

^d We assume that each source submits one excess emission report every year, in addition to the required semiannual repc

^e We assume that 80 percent of sources use incineration.

^f We assume that temperature reports are conducted two times per year.

^gTotals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
