STEP 3 – PROVIDE PHMSA-REQUIRED PIPELINE SAFETY PROGRAM OR LNG SAFETY PROGRAM INFORMATION

This STEP serves to notify PHMSA of relationships among OPIDs so that compliance performance can be accurately portrayed, as well as to facilitate PHMSA’s resource planning and preparation in the conduct of inspections of these PHMSA-required safety programs.

Important Instruction to Operator: When a common PHMSA-required pipeline safety program(s) or LNG safety program(s) exists which covers assets having multiple OPID numbers, the Operators assigned those OPIDs are required to inform PHMSA as to which one of the various OPIDs is “primary” for the purposes of PHMSA inspections and Operator Registry Reporting (e.g., which OPID should be contacted and referred to when PHMSA or a state exercising jurisdiction intends to inspect that safety program), and must do so for each PHMSA-required pipeline safety program or LNG safety program listed below.

[For ALL facilities] Anti-Drug Plan and Alcohol Misuse Plan (199.101, 199.202); Procedure Manual for Operations, Maintenance, and Emergencies (192.605, 192.615, 195.402, 193.2017);

[For Gas Distribution, Gas Gathering, Gas Transmission, and Hazardous Liquid Pipeline Facilities] Damage Prevention Program (192.614, 195.442); Public Awareness/Education Program (192.616, 195.440); Control Room Management Procedures (192.631, 195.446); and Operator Qualification Program (192.805, 195.505).

[For Gas Distribution, Gas Transmission, and Hazardous Liquid Pipeline Facilities] Integrity Management Program (192.907, 192.1005, 195.452).

[For Hazardous Liquid Pipeline Facilities ONLY] Response Plan for Onshore Oil Pipelines (or Alternative State Plan) (194.101).

1. Are the pipelines and/or facilities covered by this OPID Assignment Request included with other OPIDs for the purposes of compliance with one or more PHMSA-required pipeline safety program(s) or LNG safety program(s)? *(select only one)*

Not known at this time. (Note: The Operator must submit an Operator Registry Notification informing PHMSA of the primary responsibility for managing or administering these PHMSA-required safety programs within 60 days after they are known. Operators should note that many of these programs are required to be in place before initial operations of the pipelines and/or facilities commence.)

No, the pipelines and/or facilities covered by this OPID Assignment Request have their own independent PHMSA-required safety programs which include no other OPIDs for the following, when applicable:

Yes, the pipelines and/or facilities covered by this OPID Assignment Request have one or more PHMSA-required pipeline safety program(s) or LNG safety program(s) that also apply to pipeline assets with other OPID numbers for the purposes of compliance with PHMSA regulations.

If Yes, list the Operator-designated “primary” OPID for each common PHMSA-required pipeline safety program associated with this OPID Assignment Request. Those programs not selected will be considered to be either not required or independent programs which cover only the pipelines and/or facilities covered by this OPID Assignment Request: *(select all that apply)*
