About the Survey

Purpose
The Industry Classification Report is used to determine a North American Industry Classification System (NAICS) code for single-unit establishments where the Census Bureau does not have a complete NAICS code.

Obtaining a complete and accurate NAICS code through this report allows the Census Bureau to determine whether more information is required later in the Economic Census, and, if so, the most appropriate questions to ask for that type of business.

Title 13 United States Code (U.S.C.), Sections 131 and 193, authorizes this collection. Title 13 U.S.C, Sections 224 and 225, requires your response. Title 13 U.S.C, Section 9 also requires that we keep your answers strictly confidential.

Coverage
All domestic non-farm business establishments, other than those operated by governments.

Content
Establishments provide data on physical location and principal business or activity. Additionally, the Industry Classification Report asks class of customer related questions for wholesale and retail businesses.

Frequency
Letters with instructions on how to report online are mailed the year prior to the Economic Census and during the Economic Census (years ending in "2" or "7").

Methods
The Census Bureau will mail a letter to respondents with instructions on how to report electronically.

Uses
Information obtained from these forms will be used to update the classification codes in the Business Register, the basic sampling frame for many of the Census Bureau's current surveys, and to ensure that establishments are tabulated in the correct detailed industry for the economic census.
