Title: Partner Feedback Assessment Of Sexually Transmitted Disease (STD) Clinic Processes For Conducting And Documenting Routine HIV Testing

- Goal of this study is to receive feedback from STD Surveillance Network (SSuN) sites that will allow CDC staff to better understand clinic processes and may assist CDC staff in further supporting SSuN sites.
- Intended use of the resulting data is to facilitate the ability of CDC staff to make timely suggestions for, 1) providing HIV testing, 2) documenting HIV testing, and 3) pre-exposure prophylaxis (PrEP) implementation in clinic data systems.
- Data will be collected using structured Provider and Clinic/Data Manager Interview Guides.
- The subpopulation to be studied are the Clinic Providers and Clinic/Data Managers at STD clinics participating in the SSuN, who are supported, in part, by the CDC STD SSuN Cycle III Cooperative
