Mine Worker Survey

Form Approved OMB No. 0920-15BM
 Exp. Date xx/xx/2015

Introduction/Consent

This study involves filling out a short survey questionnaire. The purpose of these questions is to try to understand what you think has the biggest impact on health and safety at this operation. Your participation is completely voluntary. If you choose to participate, it should take about 15 minutes to complete. Please do not write your name on this questionnaire as it is completely anonymous and you will not be linked to your responses. Information collected from you will be kept confidential and no individual data will be reported from this study – only results reported by groups. Answering the questions on this survey pose minimal risk to you, if you participate. This study involves minimal risk. Questions are not of a sensitive nature and you may choose not to answer any or all of them. Only NIOSH staff that collect and prepare the information for analysis will have access to your answers. There are no individual benefits to participation. Your participation is entirely voluntary and you have the right to discontinue your participation without penalty at any time. To protect your identity: • Your supervisors will not see your individual responses. • These forms will not be made available to any management personnel. • We will combine the data from everyone into larger groups to describe the results. If you have any comment about the tests/procedures, you should contact Emily Haas, Principal Investigator, 412.386.4627. For questions about your rights, your privacy, or harm to you, contact Mark Torason, Human Research Protection Program, mtorason@cdc.gov, 513-533-8591. By clicking "Next" you are agreeing to participate in this survey.
