General Comment

the cdc is on a power trip, seeking to get a lot of tax dollars for work they do ineffectively and this project should be shut down. its budget should be zero tax dollars. this agency deserves a grade of f minus. it is completely negligent and ineffective. it lies to the public too. this agency is a fat cat bloated bureaucracy secreted totally corrupt Washington dc. its work is seriously flawed. cdc can and will do nothing about this but take the public's money. the local cop and judges can do far more on this issue than the fat cat bloated bureaucrats who could care less in corrupt Washington dc. the high salaries and costs of bureaus like this one cause the extremely high taxes that are taking most of the wages that the average working person makes so nothing is left to live on. that causes quarrels about money in the partnership the main violence that happens is over money and Washington dc and the other taxing authorities, local, county, state together take so much in taxes nothing is left to live on. this causes conflict. so that shutting down stupid project proposals like this one that hurt the public will help save these situations. we need less taxation so people have some money left to live on. the poverty rate is exploding for everybody in America. we have no jobs here. we allow china to ship in all this crap that breaks down 1 mnth after you buy it. we need to make products here in America. I oppose any funding of this project. this agency needs new management and to produce more for less money. they need to step up and do the jobs they are already assigned. they do not need more projects or to stick their fingers into any more projects. they need to find the reason the autism rate is one in 25 kids in new jersey caused by their vaccines. their research is way off the beam. shut down this project and do better at the jobs you already have.
