Study of Digital Learning Resources (DLRs) for Instructing English Learner Students Teacher Survey

For hard copy only:

Name: _____ Title: _____
School: _____ District: _____ State: _____

PURPOSE OF THE SURVEY

- The goal of this nationally representative survey is to inform the U.S. Department of Education on the use of Digital Learning Resources (DLRs) in the instruction of English learner (EL) students.
- The findings will be used to guide future educational research and policy.
- Your responses will help to ensure that the findings accurately inform educators and decision-makers.
- The survey findings will inform the development of a guide for educators in using DLRs to support EL students.

INSTRUCTIONS

The focus of this survey is on your use of DLRs in the instruction you provide to EL students. In responding:

- (1) Consider **all instruction that you provide to your EL students**, including instruction you provide as a mainstream teacher in a general education class that includes EL students and/or any specialized instruction for ELs that you may provide, as appropriate to your instructional responsibilities; and,
- (2) Respond based on **the current 2016–17 school year, except where otherwise noted.**

Thank you for your assistance!

Your survey responses will inform the educator guide to be developed in this study. An electronic copy of the guide will be sent to you and your school after its publication by U.S. Department of Education.

CONFIDENTIALITY

We will not present any personally identifiable information in any report or publication resulting from the study; we will not identify you or your school or district in any study report or publication; and no responses will be linked with any identifying information in any data files created for the study. All responses will be aggregated and summarized across respondents. The study team will protect or maintain confidentiality of your responses except as may be required by law. No individuals other than research staff will see any individually identifying data (for example, names or addresses). Your participation is voluntary. However, your responses are needed to make the study comprehensive and accurate and to provide policymakers with accurate and complete information. Data collection is being conducted in only a sample of schools throughout the nation. This greatly increases the importance of your participation since your responses will represent many other similar teachers.

If you have any questions about the study, please call (800) xxx-xxxx. If you have questions about your rights as a study participant, please call the Westat Human Subjects Protections office at 1-888-920-7631. Please leave a message with your full name, the name of the research study that you are calling about (*Study of DLRs for Instructing English Learner Students*), and a phone number beginning with the area code. A research office staff person will return your call as soon as possible.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such a collection displays a valid OMB control number. The valid OMB control number for this information collection is xxxx-xxxx. The time required to complete this information collection is estimated to average 35 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate or suggestions for improving the survey, please write: U.S. Department of Education, Washington D.C. 20202-4651. If you have comments or concerns regarding the contents or the status of your individual survey, write directly to: Study of Digital Learning Resources (DLRs) for Instructing EL Students, Policy and Program Studies Service, Office of Planning, Evaluation and Policy Development, 400 Maryland Ave, SW, Washington DC 20202.

Definitions: Digital Learning Resources

Digital Learning Resources (DLRs) refers to digital resources such as applications, software, programs, or websites that engage students in learning activities and support students' learning goals. There are three categories of DLRs: digital academic content tools, digital productivity tools, and digital communication tools. DLRs as defined here do not include the hardware or infrastructure needed to use the digital resources.

<i>DLR Category</i>	<i>Definition</i>	<i>Category</i>	<i>Types and Examples</i>
Digital Academic Content Tools	Software, applications, programs, or websites that offer academic content resources and/or engage students in activities to learn academic content or skills, including but not limited to language and literacy content or skills.	Designed Learning Activities	• Interactive tutorials or lessons (adaptive and other) such as an interactive lesson on life cycle of a butterfly or a math tutorial on fractions.
			• Practice and assessment tools such as a math program that provides multiple opportunities to practice addition skills.
			• Dynamic modeling or simulation tools such as a physics simulation that lets students manipulate virtual equipment, change parameters, and see the results.
			• Virtual worlds that immerse a student in a fully interactive environment such as one that allows a student to roam in a period of past history or explore a desert environment.
		References/ Resources	• Dictionaries, encyclopedias, e-books, topic blogs, and/or topic-focused websites that serve as information resources, such as an online encyclopedia that offers students pictures, facts, and videos about mammals or a digital dictionary.
			• Visual and auditory topic-related resources such as a <i>YouTube video</i> on earthquakes and plate tectonics.
Language Resource Tools	• Translation tools that assist students by providing a translation to another language; and		
	• Language articulation tools that assist a student to accurate production of a language such as by showing images of how a sound should be produced and/or by letting a student record and listen to his/her own voice to compare with the model.		
Digital Productivity Tools	Software or online programs or websites that students use to plan, document, organize, and analyze content. They do not contain academic content.	Presentation Tools	• Presentation/Publication Tools such as slide presentation software that allows students to create a series of slides to communicate what they have learned about a topic; or to publish a digital story about a memorable day. Both may include music, images, and/or video.
		Word Processing Tools	• Word Processing software that allows students to write text to support their learning activities in a variety of ways.
		Information Organization Tools	• Spreadsheet tools that allow students to organize and track information, such as entering and tracking local rainfall over time;
• Data analysis and representation tools that allow students to analyze and represent information such as using a tool to analyze and summarize the characteristics of selected Native American groups or tribes in the Southwest;			
Digital Communication Tools	Software or online programs or websites that students use to communicate, collaborate, network, or present information. They do not contain academic content.	Asynchronous/ Synchronous Text Communications	• Discussion boards or forums where individuals can post reactions and/or comments to provide feedback and/or share perspectives, such as where students write in-depth analysis of the novel they are reading and give feedback to their peers' analyses; and
			• Emails, text messaging, chats , for example, used as means of providing feedback to support student learning.
		Reflection Tools	• Blogs or student journals allow students opportunities to share and/or reflect on their learning experiences, such as a student who uses a journal entry to reflect on her understanding of particular math concepts.
			Videoconferencing/ Meeting Tools
Project Collaboration Tools	• Document-sharing tools or other tools that provide an online platform where students can work on products together, as in cases where students have access to and jointly edit a shared book report.		

Multiple individual DLRs can be combined in an Integrated DLR Set

Integrated DLR Sets	A structured combination of individual DLRs to provide a complete core or supplemental curriculum. Often, DLR sets are licensed as a package by a school district.	Core Curriculum Integrated DLR Set	A math program for grades 6–8 that combines visual lessons with embedded assessments, productivity tools, and flexible class management tools into one package.
		Supplemental Integrated DLR Set	A math intervention for at-risk students in grades 6–12 that provides tutorials, practice activities, and progress monitoring tools to inform instruction.

DEFINITIONS, *continued*

English learner (EL) student refers to students who are individuals not born in the United States or whose native language is other than English and individuals who come from non-English-dominant environments whose skills in English are so limited that they derive little benefit from regular school instruction. “English learner” also refers to students who have no proficiency in English. *Note: If your district has an operational definition for EL students, then use your district’s definition in responding.*

General education or mainstream instruction refers to instruction in grade-level classrooms or academic content area classes that is provided as the instruction for the school’s general student population, and that is not a classroom or class structured as English learner instructional services (*see below*). *Note: General education classrooms or classes can include English learner students.*

English learner instructional services are instructional programs or services designed specifically to meet the needs of EL students in gaining proficiency in English and learning academic content. These include:

- **Bilingual instruction:** An educational program or instructional approach in which two languages, English and the students’ native language, are used to provide content instruction *to classes of EL students*. Bilingual programs may promote proficiency in both languages with the goal of students’ becoming fully bilingual, or the students’ native language is used initially to assist in students’ transition to all-English instruction and then decreased over time.
- **English as a Second Language (ESL) instruction:** ESL programs (also English language development (ELD) or English for Speakers of Other Languages (ESOL)) provide instruction that focuses on the structure and use of the English language, using carefully articulated English language instruction designed to meet the needs of students at various levels of English proficiency. The instruction may use content materials related to the curriculum and typically involves little or no use of the native language. ESL instruction can be provided in scheduled class periods or as *push-in* instruction (the ESL instructor works with students within an ongoing content class) or as *pull-out* instruction (students move out of an ongoing class for an ESL session).
- **Newcomer program:** A specialized academic environment that serves newly arrived, immigrant EL students for a limited period of time. Newcomer programs typically focus on developing basic English language and literacy skills, instruction in core content, and acculturation to U.S. schooling. Students transition to a school’s regular language support program for EL after they have participated in the newcomer program.
- **Sheltered English content instruction:** Sheltered instruction refers to regular grade-level instruction in core content areas that are provided in English through instructional strategies that make the academic content accessible to EL students while also assisting them to acquire academic English.
- **Two-way bilingual education or dual-language program:** Also known as two-way immersion programs, two-way or dual language programs provide instruction using both English and a non-English language *to classes that include both EL and English-proficient students*. The program goals are for all students to become bilingual and biliterate, to succeed academically, and to develop cross-cultural awareness.
