A. Overview of Information Collection

Title of Information Collection: Continuum of Care Homeless Assistance-Technical Submission.

OMB Control Number: 2506–0183.
Form Number: HUD–40090–3a, HUD–40090–3b.

Type of Request: Extension without change of a currently approved.

Description of the need for information and proposed use: This submission is to request an extension of a currently approved collection associated with the Technical Submission phase of the Continuum of Care (CoC) Program Application. This submission is limited to the Technical Submission process under the CoC Program interim rule, as authorized by the HEARTH Act. Applicants who are successful in the CoC Program Competition are required to submit more detailed technical information before a grant agreement. The information to be collected will be used to ensure that technical requirements are met prior to the execution of a grant

agreement. The technical requirements relate to a more extensive description of the budgets for administration costs, timelines for project implementation, match documentation and other project specific documentation, and information to support the resolution of grant conditions. HUD will use this detailed information to determine if a project is financially feasible and whether all proposed activities are eligible. All information collected is used to carefully consider conditional applicants for funding. If HUD collects less information, or collected it less frequently, the Department could not make a final determination concerning the eligibility of applicants for grant funds and conditional applicants would not be eligible to sign grant agreements and receive funding. To see the regulations for the CoC Program and applicable supplementary documents, visit HUD’s Homeless Resource Exchange page at <https://www.hudexchange.info/programs/coc/>. The statutory provisions and the implementing interim rule (also found at 24 CFR part 587) that govern the program require the information provided by the Technical Submission.
