Contact 1: Prenotification Letter

[Date]

[Name]

[Title]

[Name of Nonprofit Organization]

[Address]

[City, State, ZIP Code]

Dear [Dr. /Mr. /Ms.] [Last Name]:

To better understand the important contributions that nonprofit organizations make to society and the economy, the National Science Foundation (NSF) needs your help with a brief survey. In a couple of days, you will receive an e-mail providing a link to a web survey asking about your organization's research activities.

We are conducting this pilot survey with a selected number of nonprofits to test the process of collecting the necessary information prior to the launch of a nationally representative survey in 2017. Please review the other side of this letter for more details on this survey effort. We have also included a brief handout which provides an overview of the topics included in the survey and guidance on what we mean by research activities.

Your invitation to the web survey will be sent in a couple of days from our official survey e-mail address: support@NPRASurvey.org. The e-mail invitation will be sent to <insert e-mail address>, or you can access the survey now at www.NPRASurvey.org. Your organization's ID is XXXXXX. We are asking for your survey response by [insert date].

Please contact ICF International, our survey contractor, toll-free at 877-xxx-xxxx or at support@NPRASurvey.org to let us know any of the following:

- The e-mail address or contact within your organization should be changed.
- Your organization no longer has 501(c) status.
- Your organization is part of a university or other higher education institution.

If you have any questions about the survey, please contact Ronda Britt, Project Officer, National Science Foundation, at rbritt@nsf.gov or 703-292-7765.

Thank you for your participation in this important effort.

Sincerely,

John R. Gawalt
Director
National Center for Science and Engineering Statistics
National Science Foundation

NSF Nonprofit Research Activities Survey Frequently Asked Questions

Who is NSF?

The National Science Foundation (NSF) is an independent federal agency created by Congress in 1950 "to promote the progress of science; to advance the national health, prosperity, and welfare; to secure the national defense..." We have an annual budget of \$7.5 billion (FY 2016), and provide approximately 12,000 new awards each year for research and science and engineering education.

In addition to providing grants for research and science education, NSF houses the National Center for Science and Engineering Statistics (NCSES). NCSES is a federal statistical agency that, by law, serves as a central federal clearinghouse for the collection, interpretation, analysis, and dissemination of objective data on science, engineering, technology, and research and development.

Why is NSF collecting this information?

To fulfill our mission to collect and disseminate information on the U.S. research enterprise, NSF (through NCSES) conducts surveys to measure the national level of research activity across all sectors of the U.S. economy. Currently, we have ongoing surveys of the government, business, and higher education sectors, but we have not conducted a survey of nonprofit organizations since 1997. We need your help to gather more current information.

How was my organization selected?

Your organization was randomly selected to participate in this survey. On the basis of data found in your organization's IRS Form 990 or 990-PF, we grouped your organization with similar nonprofit organizations. We then randomly selected a statistical sample of organizations to represent nonprofit research activities at a national level.

How will the data be used?

The primary purpose of this study is to test the process of collecting the necessary information prior to the launch of a nationally representative survey in 2017. The data you provide for this pilot also will be used to improve our national estimates of nonprofit research spending in our annual publication, *National Patterns of R&D Resources* (<http://www.nsf.gov/statistics/natlpatterns/>).

Organization-level results of the pilot study will not be published; however, NSF does intend to publish detailed results of the 2017 survey with tables showing research spending and funding for the nonprofit organizations surveyed.

NSF Nonprofit Research Activities Survey

Below you will find a list of topics covered in the NSF Nonprofit Research Activities Survey. The types of information requested are generally available from the following offices within a nonprofit organization:

- Chief Financial Officer / Finance Department
- Human Resources
- Director of Research / Chief Science Officer / Research Department

On the reverse side of this sheet is the definition that NSF is using to identify research activities, as well as some general examples of activities that should be included and excluded from your responses.

❖ General Information About Your Organization

- Total expenses
- Fiscal year dates
- Number of Full-Time Equivalent Employees (FTEs)
- Contact information

❖ Research Performed

- Financial expenditures on research activities
- Sources of funding for research activities
- Type of research activities performed
- Full-time staff working on research activities

❖ Research Funded

- Amount of funding provided to external organizations for research
- Types of organizations funded
- Types of research funded
- Source of your research funding

RESEARCH DEFINITION AND GUIDANCE

By research, we mean ...

For the purposes of this survey, research includes research and experimental development.

Research and experimental development comprise creative and systematic work to

- increase the stock of knowledge, including knowledge of humankind, culture, and society; OR
- devise new applications of available knowledge (including materials, products, devices, processes, systems, or services).

Research activities *must be* ...

- **Novel:** projects that advance current knowledge or create new knowledge
- **Creative:** projects based on original concepts and hypotheses
- **Uncertain:** project outcomes are unable to be completely determined at the outset
- **Systematic:** projects are planned and budgeted
- **Transferable/Reproducible:** project methodology and results are transferable/reproducible to other situations and locations

Examples of projects that ...

May meet the criteria for research

- Laboratory or animal studies
- Clinical trials
- Prototype development
- Outcomes research
- Development/measurement of new methods to deliver/measure social service outcomes
- Policy research
- Humanities research
- Research traineeships
- Other experimental studies

Most likely do not meet the criteria for research

- Internal program monitoring or evaluation
- Public service grants or outreach programs
- Education or training programs
- Quality control testing
- Market research
- Management studies/efficiency surveys
- Literary, artistic, or historical projects, such as films, music, or books and other publications
- Feasibility studies, unless included as part of an overall research project

Contact 2a: Invitation [E-mail] High Likelihood

To: Primary contact e-mail
From: NSF Nonprofit Research Activities Survey
Re: NSF Nonprofit Research Activities Pilot Survey

Dear [Dr. /Mr. /Ms.] [Last name]:

Recently, we mailed you a letter inviting you to participate in the National Science Foundation's Pilot Survey of Nonprofit Research Activities.

We are conducting this pilot survey with a selected number of nonprofits to test the process of collecting the necessary information and improve our estimates of nonprofit research spending. We will use the lessons learned from the pilot to make revisions prior to the launch of a nationally representative survey in 2017.

If your organization no longer has 501(c) status or is part of a university or other higher education institution, please contact us at 877-xxx-xxxx or by e-mail at support@NPRAsurvey.org to determine your organization's eligibility to complete this survey.

The survey is currently available online at the website below. Please click on the link below to create your own personal user name and password and access the survey.

Survey website: www.nprasurvey.org Organization name: [organization name] Organization ID: [ID]

We have developed a password-secured system to protect your data and allow you to pause and resume the survey at your convenience. Once you have created your password, you may designate up to two other individuals who will be able to create their own passwords to access your organization's survey and assist in its completion.

If you would like someone else within your organization to be the primary contact for this survey for future notifications, please reply to this e-mail with their name and contact information.

The survey deadline is **Month dd, 2016**.

NSF has contracted with ICF International to conduct the survey. If your organization no longer has 501(c) status, or if you have any questions about the survey, please contact survey support at 877-xxx-xxxx or send an e-mail to support@NPRAsurvey.org.

Thank you for completing the survey.

Sincerely,

Ronda Britt
Project Officer, Nonprofit Research Activities Survey
National Center for Science and Engineering Statistics
National Science Foundation
rbritt@nsf.gov

Contact 2b: Invitation [E-mail] Moderate/Low Likelihood

To: Primary contact e-mail
From: NSF Nonprofit Research Activities Survey
Re: NSF Nonprofit Research Activities Pilot Survey

Dear [Dr. /Mr. /Ms.] [Last name]:

Recently, we mailed you a letter inviting you to participate in the National Science Foundation's Pilot Survey of Nonprofit Research Activities.

We are conducting this pilot survey with a selected number of nonprofits to test the process of finding nonprofit organizations that fund or perform research. We will use the lessons learned from the pilot to make revisions prior to the launch of a nationally representative survey in 2017.

If your organization no longer has 501(c) status or is part of a university or other higher education institution, please contact us at 877-xxx-xxxx or by e-mail at support@NPRAsurvey.org to determine your organization's eligibility to complete this survey.

NSF is seeking participation from a wide range of nonprofit organizations. **Whether your organization participates in research or not, use the link below to confirm your contact information and complete the survey.** Clicking the link will allow you to create your own personal user name and password and access the survey.

Survey website: www.nprasurvey.org Organization name: [organization name] Organization ID: [ID]

We have developed a password-secured system to protect your data and allow you to pause and resume the survey at your convenience. Once you have created your password, you may designate up to two other individuals who will be able to create their own passwords to access your organization's survey and assist in its completion.

If you would like someone else within your organization to be the primary contact for this survey for future notifications, please reply to this e-mail with their name and contact information.

The survey deadline is **Month dd, 2016**.

NSF has contracted with ICF International to conduct the survey. If your organization no longer has 501(c) status, or if you have any questions about the survey, please contact survey support toll-free at 877-xxx-xxxx or send an e-mail to support@NPRAsurvey.org.

Thank you for completing the survey.

Sincerely,

Ronda Britt

Contact 7a: Incomplete Follow-up 1 [Telephone]

Call primary contact at organizations that **have not completed Performance or Funding sections**.

Talking directly to the primary contact

Issues to be highlighted during a telephone call to incomplete from data collection staff:

1. Indicate that you are calling on behalf of the National Science Foundation regarding the Nonprofit Research Activities Pilot Survey.
2. Point out the latest activity on the survey by someone in their organization. For example: “It looks like you logged on to the survey back in **Month**, but there are a couple of questions that had not been completed. Can you take a few minutes to complete the survey? Do you still have the survey information?”
3. Tell the respondent that we are trying to get complete information on some specific question(s) that have not been answered or we have incomplete information.
4. Tell the respondent you will e-mail the survey web address and their organization ID if they do not have the information. Be sure to verify the correct e-mail address. Let them know that they will need to set up a new password through the website, if they have forgotten theirs.
5. Ask the respondent if he or she has any questions. Let them know they can send an e-mail to support@NPRAsurvey.org or call you toll-free at 877-xxx-xxxx if they have any additional questions.

Leaving a message

1. If the respondent cannot be reached, leave a voicemail identifying yourself and the survey, the purpose of the call, the date of the e-mail referenced, and the action the respondent must take.

Voice-mail example: “Hello my name is [survey staff], and I’m calling on behalf of the National Science Foundation about the Nonprofit Research Activities Pilot Survey. We noticed that you have responded to some of the items but have not completed the survey. Please take some time to complete your survey. If you have questions, feel free to call us at 877-xxx-xxxx.”

A similar message, with needed revisions, can be left with an administrative assistant or coworker.

2. During a call cycle, typically a week, leave only one message, but continue to try to contact respondents at different times of the day throughout the cycle.

Contact 7b: Non-response Follow-up 1 [Telephone]

Call primary contact at organizations **that have not logged into the survey**.

Talking directly to the primary contact

Issues to be highlighted during a telephone call to primary contact from data collection staff:

1. Indicate that you are calling on behalf of the National Science Foundation regarding the Nonprofit Research Activities Pilot Survey.
2. Point out that we have tried to contact them to participate in this survey.
“We have been trying to contact you about NSF’s Nonprofit Research Activities Survey. At this point, we have not heard from you regarding the survey and can you take a few minutes to tell us about your organization and any research activities you are funding or performing?”
3. If needed, tell contact: “We are conducting this pilot survey with a selected number of nonprofits to test the process of collecting the necessary information. We will use the lessons learned from the pilot to make revisions prior to the launch of a nationally representative survey in 2017.”
4. Tell the respondent you will e-mail the survey web address and the ID for his or her organization if the respondent does not have it. Be sure to verify the correct e-mail address.
5. Ask the respondent if he or she has any questions and let them know that if they have any questions in the future, they can send an e-mail to support@NPRAsurvey.org or call you toll-free at 877-xxx-xxxx.

Leaving a message

1. If the respondent cannot be reached, leave a voice-mail identifying yourself and the survey, the purpose of the call, the date of the e-mail referenced, and the action the respondent must take.

Voice-mail example: “Hello my name is [survey staff], and I’m calling on behalf of the National Science Foundation about the Nonprofit Research Activities Pilot Survey. We have been trying to contact you about participating in the survey and hope that you might be willing to complete the survey. Please call us at 877-xxx-xxxx when you have some time to discuss your participation in the survey.”

A similar message, with needed revisions, can be left with an administrative assistant or coworker.

2. During a call cycle, typically a week, leave only one message, but continue to try to contact respondents at different times of day throughout the cycle.

rbritt@nsf.gov

In-person by telephone

Issues to be highlighted during a phone call to a non-respondent from data collection staff:

1. Indicate that you are calling on behalf of the National Science Foundation regarding the Nonprofit Research Activities Pilot Survey
2. Remind respondent that the survey website will close on Month dd.
3. Ask if they will be able to respond to the survey.
4. If possible determine if the organization is a research performer or funder by asking these questions:
 - a. Do the staff in your organization conduct research?
 - b. Does your organization provide grants or other funds for research?
 - c. If either of these responses is 'Yes', stress the importance of getting their responses to the questionnaire.
5. Ask the respondent if he or she has any questions and refer him or her to the e-mail address (support@nprasurvey.org) or toll-free number 877-xxx-xxxx as needed.

Leaving a message

1. If the respondent cannot be reached, leave a voice-mail identifying yourself and the survey, the purpose of the call, the date of the e-mail referenced, and the action the respondent needs to take.

Voice-mail Example: "Hello my name is [survey staff], and I'm calling on behalf of the National Science Foundation about the Nonprofit Research Activities Pilot Survey. I just wanted to remind you that the survey website is closing on Day, Month dd Year. Please call us at 877-xxx-xxxx and let us know when you will be able to submit your survey. If you have any questions about the survey, give us a call."

A similar message, with needed revisions, can be left with an administrative assistant or coworker.

2. During a call cycle, typically a week, only one message should be left, but continue to try to contact respondents at different times of day throughout the cycle.
