

Attachment N: Guideline for in-depth interviews (English)

Research Objectives: To understand provider's perception of the recipes and activities, as well as any barriers/supports to implementation.

Note: *Optional probing questions appear in italics. These probes are intended to provide options for the researcher to obtain feedback that supports the study objectives.*

INTRODUCTION (2 MINUTES)

Thank you for speaking with me today. Your involvement in this project is critical so we're very grateful for your time.

My name is [*moderator name*] and I work for Applied Curiosity Research. Our company is helping the United States Department of Agriculture, Food & Nutrition Service gather feedback about a handout and video concepts that are designed to help child care providers feed young children. We'll get into the details of that in a minute.

Before we start, here are a couple of ground rules for our conversation:

- First, there are no wrong answers. I want to hear what you think!
- Participation is voluntary, so you don't have to answer every question.
- I **did not** create anything you'll be seeing and I don't work for the USDA/FNS. So, please be honest if there are things you liked or didn't like. Your responses won't affect me either way.
- Our conversation will be kept private. That means we will not use your name in any of our reports, and we ask that you do not share the details of what was said here today.

Finally, I'd like to audio record our conversation. The recording will be used to confirm our notes and create a transcription. Neither our notes nor the transcription will include your name. Is that ok with you?

(Note to moderator: *If participant is uncomfortable with a recording, do not proceed. Thank them for their time and end the interview).*

Do you have any questions?

Were you able to review the entire handout that we sent?

- **If not** – Ok. Unfortunately, we won't be able to continue this conversation. I'd like to reschedule this call and give you time to review the handout. Is there another good time for us to speak?
- **If yes** – Great. Please have the handout and the document titled "Key Frames" in front of you so you can reference it. Let's get started.

SECTION III: VIDEO CONCEPTS AND AUDITIONS (10 MINUTES)

Section III Objectives:

- Ensure the video concepts are perceived as welcoming for diverse CACFP providers;
- Understand participants' preferences and usage patterns for instructional videos;
- Understand variables that may prevent or encourage use of the videos.

Video Concepts (5 Minutes)

(Note to moderator: Three video concepts will be tested and rotated across participants. Each participant will review one concept. See Table 3.2 Video concept rotation chart on page 8.)

Now we're going to review a concept for a video that will go with these handouts we've been discussing. When completed, the video will feature live actors. This is just a concept and will be revised based on your feedback.

I'm going to read a few passages to describe the video (*Attachment S*). Please look at the document titled "Key Frames" (*Attachment V*) as I read (**Note to moderator:** read *Attachment S*).

- How might you use a video like this and the handouts we discussed together?
 - o *If you knew there was a video, would you only watch the video and not look through the handout?*
- What would you want to see in a video like this to help you try out these suggestions?
- How do you currently use videos to learn new ideas about working with children?
 - o *What kinds of videos do you watch?*
 - o *Where do you go to find these videos?*

- o *How does this video idea compare to those videos? Why?*

Audition Clips (5 Minutes)

I'm going to [text/email] you a link to a few videos for you to review (Attachment U). Let me know when you get the link.

Now I'm going to show you a few clips of actors/actresses that might be cast in these videos. Please keep in mind everything we've discussed so far as you watch and then we'll discuss the clips after we review.

Great, let me know when you're ready to watch the video.

[Note: Show provider the 2-4 casting videos. See Table 3.3 on page 8 for audition rotation chart.]

- Which of these actors do you think would be more motivational if they explained this concept? Why?
- Which did you find was the most engaging? Why?
- Which seems the most knowledgeable about the concepts? Why?
- Which would you cast if you were directing the video? Why?
- Is there anything else we should know about who you would prefer to be in this video?
